Suggested materials for online ES-111

Although the course can be completed entirely online, we recommend using equipment you may have in your shop and practicing the concepts you will be exposed to throughout the course. Here is a list of items that you may want to have available during your training.

1. Laptop with current version of Revolution installed.
2. USB to Serial converter
3. A Rice Lake indicator to connect with Revolution (420 or 480 is a good option)
4. DB9 female to blunt end cable
5. Digital voltmeter
6. A load cell for practice taking resistance measurements
7. A ticket printer such as a TM-U295 or TicketPress
8. Appropriate hand tools such as a tweaker, screwdriver, or nut driver
9. A calculator
10. A load cell simulator
