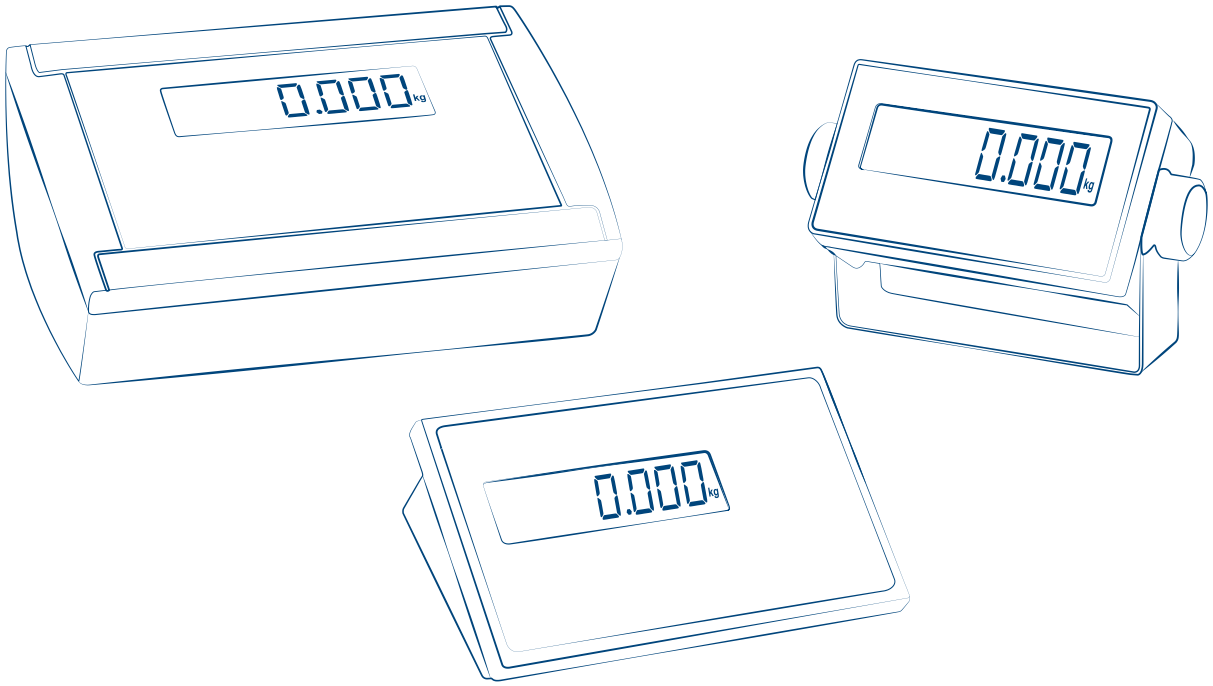
DINI ARGEO
Scales - Weighing systems

DFW SERIES

USER MANUAL - v5

ENGLISH



INTRODUCTION

The purpose of this manual is to familiarise the user with the different weight indicator operating modes, key functions and display instructions.
We recommend carefully following the instructions when programming the weight indicator, as to do otherwise could jeopardise proper scale operation.
In addition to having all the conventional features of a high precision scale, the indicator offers extra user features such as the function of converting the unit of measurement into pounds, converting net weight/gross weight, gross weight or net weight setpoint, in-out truck weighing, single scale universal repeater, multi-scale repeater, approved weight transmission to PC with alibi memory, +/- checkweighing, sample weight percentage, weight hold on display, peak sensor, weighing accumulator, piece counting.
These features make it suitable both for industrial use as well as for legal use with third parties and in trade, meeting the most up to date needs as far as transmission and data printing via the two bidirectional serial ports.

This manual was written with the utmost care but we always welcome feedback on any inaccuracies you may find.

WARNINGS

The instrument is covered by warranty and **MUST NOT BE OPENED BY THE USER** for any reason. Any attempt to repair or modify the unit could expose the user to the risk of electrical shock and will render all warranty conditions null.
All problems with the unit or the system must be communicated to the manufacturer or the dealer from which it was purchased. In any case, **DISCONNECT POWER** before any operations.
The instrument is insulated between the dangerous voltage area and the parts that are accessible to the user.

- Do not pour liquids onto the indicator (eccept for models with IP65 protection or higher).
- Do not use solvents to clean the indicator.
- Do not expose the instrument to direct sunlight or sources of heat.
- Set or secure the indicator and the platform on a base with no vibrations.
- All the indicator connections must be made respecting the applicable standards in the installation area and environment.

Whatever is not explicitly described in this manual is to be considered improper use of the equipment.

Do not install in atmospheres with the risk of explosion.

The crossed out wheelie bin symbol on the product shows that it must be brought to appropriate separate waste collection centres at the end of its life cycle or returned to the dealer when purchasing a new equivalent product. Proper separate collection to then send the product to recycling contributes to preventing possible negative effects on the environment and to health and promotes recycling. Users who dispose of the product illegally shall face administrative sanctions as provided for by law.

MAIN FEATURES
of the scale

POWER SUPPLY VIA MAINS

Every DFW range indicator is equipped with a specific power cable or charger, depending on the model.
The only exceptions are the specific models for explosive atmospheres, in which case refer to the specific manual. The safety standards in force must be respected when connecting the unit to the 110/240V mains, including the use of a “clean” line with no disturbances or interferences caused by other electronic equipment. The power-on LED (if available) on the front panel comes on if the instrument is powered correctly. If there is an internal rechargeable battery, it is charged automatically.

POWER SUPPLY VIA BATTERY

Internal battery charge level indicator

Charged battery

Low battery

The LOW.BATT message precedes automatic instrument switching off.

Battery charging indicator

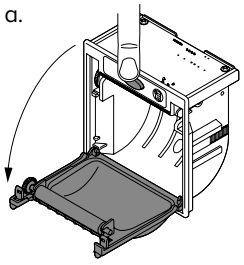
INTEGRATED THERMAL PRINTER

The printer is usually in STAND-BY and is only powered by the weight indicator when it is time to print in order to ensure the battery holds it charge longer.
Once printing is complete, the printer automatically goes back into STAND-BY.

How to manually switch on the printer
Go into the configuration menu and enable the on.Pr in function *(see page 49)*

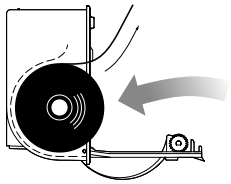
How to replace the roll

a.



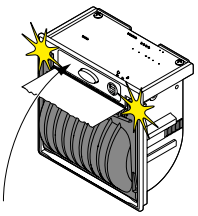
Open the door by pressing the centre button.

b.



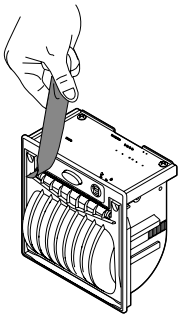
Put the roll in, keeping the thermal surface facing outward.

c.



Close the door by pressing on both sides.

d.



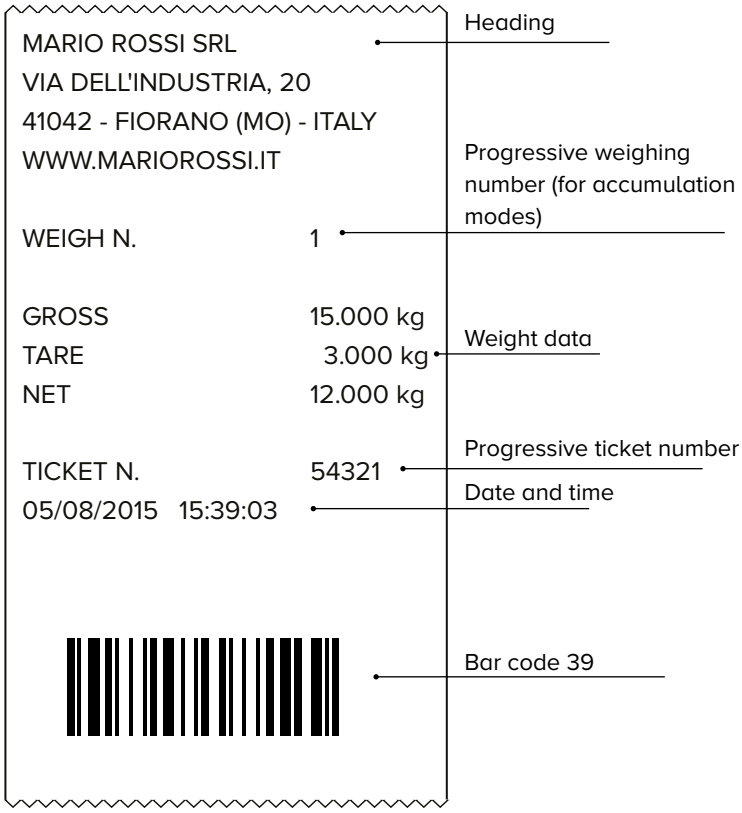
Remove the excess paper.

CUSTOMISABLE PRINTOUTS

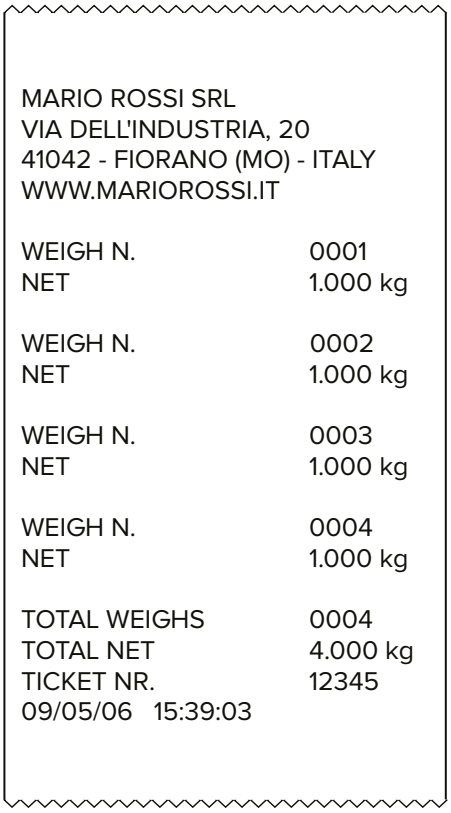
If the instrument is equipped with a printer, the ticket or label can be customised as shown in the following example.

Customising printouts requires advanced configuration.

Example of ticket/label



Esempio di packing list



AUTOMATIC RESET WHEN SCALE IS SWITCHED ON

If a weight less than 10% of the capacity is on the scale when it is switched on, the weight is automatically reset.
This function is useful in automatically resetting a container, pallet or small structure without having to recalibrate the scale.

Weights over 10% can be reset by changing the original calibration. Automatic reset when the scale is switched on can be deactivated.

Automatic reset when the scale is switched on requires advanced configuration.

KEYBOARD LOCK

The indicator keyboard can be deactivated in order to avoid accidentally carrying out the available functions.

Keyboard lock requires advanced configuration.

SAVING BATTERY POWER

The instrument is equipped with advanced battery power saving functions designed to increase operating time.

Saving battery power requires advanced configuration.

AUTOMATIC SWITCHING OFF

This function activates when the scale is completely unloaded and has not been used for a set amount of time *(standard 5 minutes)*. To activate or deactivate automatic switching off, go into the autoff section in the configuration menu *(see page 49)*.

WARNING
In accumulation and formulation mode, automatic switching off causes the accumulation in progress to be lost.

AVAILABLE TARE FUNCTIONS

The instrument allows you to choose from specific tare functions for your needs:

- "Locked" tare (standard factory configuration).
- "Unlocked" tare: automatically deleted every time the scale is unloaded. Useful in preventing errors when the tare is different for every weighing.
- Tare acquired automatically by the scale. Tare is only acquired if there is no other saved tare value.
- Tare function disabled.

To customise the tare function, go into the tArE section in the configuration menu *(see page 49)*.

REMOTE CONTROL

The instrument can be equipped with an infrared or radio frequency remote control.

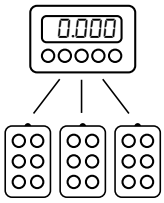
Remote control functions

KEYBOARD	FUNCTION		
	TARE MODE	MULTI-FUNCTION	
		SHORT	LONG
ZERO	TARE	Zero	-
TARE	TARE	Tare	Manual tare (PT)
MODE	TARE	Operating mode	-
PRINT	TARE	Print	-
C	TARE	Cancel/Delete	Stand-by/Switch-on
NUMERICAL KEYS	TARE	-	-
F1	TARE	-	-
F2	TARE	-	-
F3	TARE	-	-

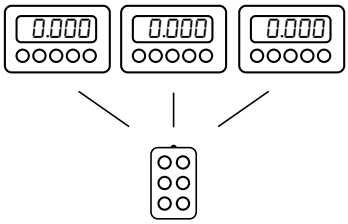
The remote control requires advanced configuration.

Additional radio frequency remote control configurations

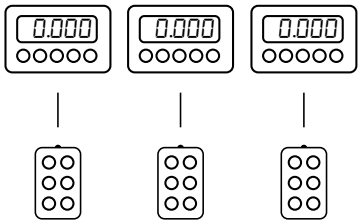
Multi-remote control
Useful when several operators are using the same scale (up to 3).



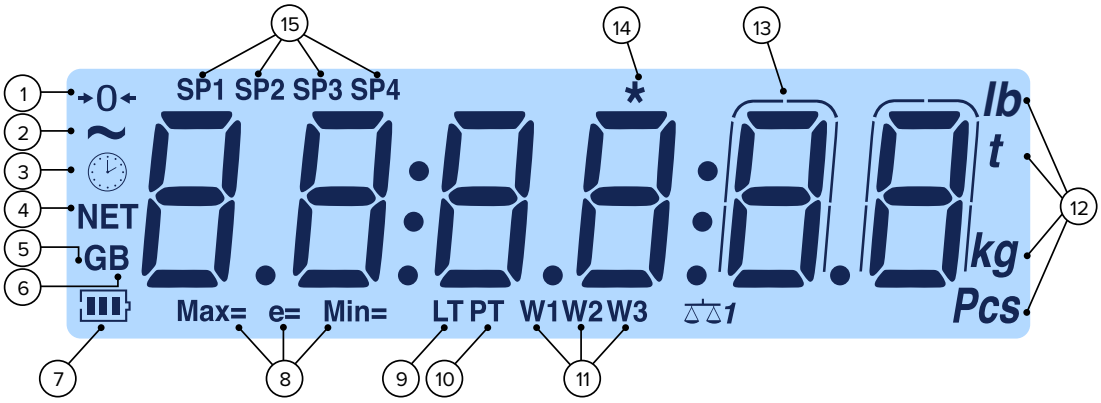
Broadcast
Useful when you need to command several scales with the same remote control.



Ad hoc
Useful when there are several scales installed in the same area, each managed by its own remote control.



THE DISPLAY



Number	Symbol	Description
(1)	→0←	The scale is unloaded and at zero (gross).
(2)	~	The weight is unstable.
(3)	🕒	The time is being shown on the display.
(4)	NET	The weight displayed is net. There is a saved tare.
(5,6)	G B	The weight displayed is gross.
(7)	🔋	Battery level.
(8)	Max= Min= e=	Metrics are being displayed.
(9)	LT	A locked tare is active.
(10)	PT	A manual tare is active.
(11)	W1 W2 W3	Indicate the range of active weighing.
(12)	lb ··· Pcs	Units of measurement - Pounds (lb), tonnes (t), kilograms (kg), grams (g), number of pieces (Pcs).
(13)	⎍	The weight is being displayed in high resolution.
(14)	*	Indicates a key is pressed. In some operating modes, it indicates that a specific function is active.
(15)	SP1... SP4	Indicate the active relay ports (only with the optional board).

LETTERS:

e.

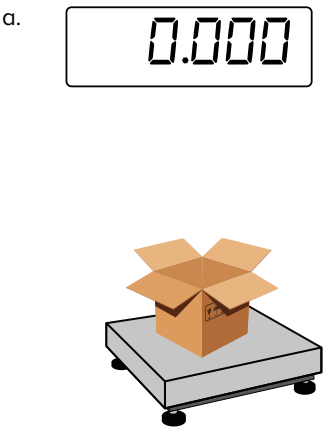
Automatic deletion disabled.

Automatic deletion enabled: the entered ID will be deleted automatically when the pallet truck is completely unloaded.

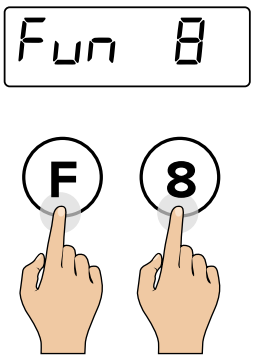
i The numerical IDs zero automatically when turning off the scale.

DATE AND TIME

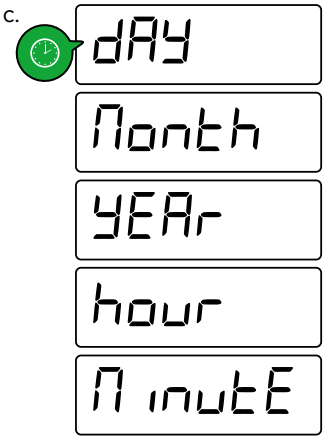
a.



b.



c.

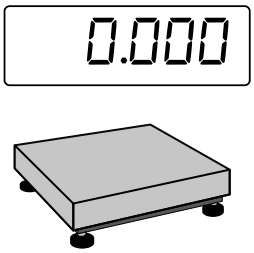


i Only if the option date and hour is present.

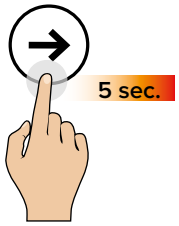
ADVANCED FUNCTIONS
of the scale

HOW TO ACCESS THE FUNCTION MENU AND SELECT THE DESIRED ONE

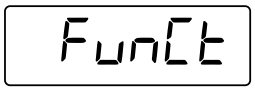
a.



b.

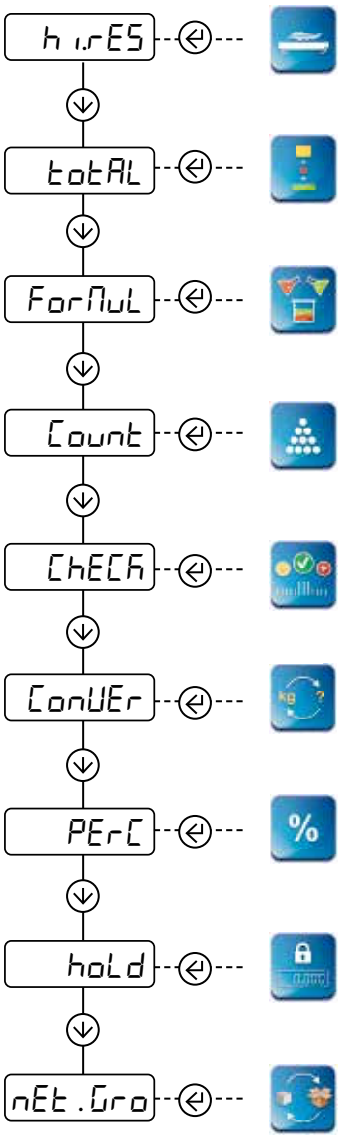


c.



The indicator is in the function menu: the currently active function appears.

d. Select the function



Weighing with high resolution display (for in-factory use)

See page 26

Horizontal accumulation: sum of the weight of several objects to obtain the total weight

See page 28

Vertical formulation or accumulation: mixing several components

See page 30

Counting

See page 32

Weight check compared to a reference sample.

See page 35

Unit of measure conversion

See page 38

Weighing in % compared to a reference sample

See page 39

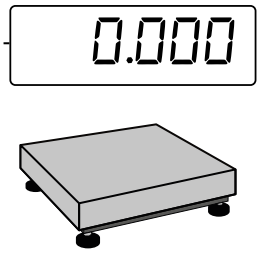
Holding weight on the display

See page 42

Net weight - gross weight exchange

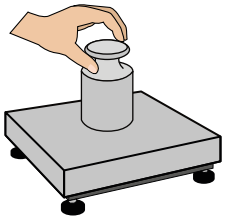
See page 43

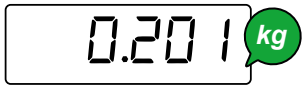
Once you have selected the function, the scale goes back to weighing mode.



WEIGHING WITH HIGH RESOLUTION DISPLAY - hi.rES

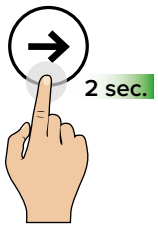
How to check calibration, if necessary



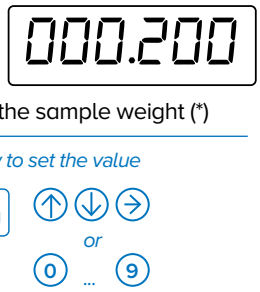


How to adjust calibration, if necessary

a.

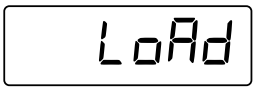


b.

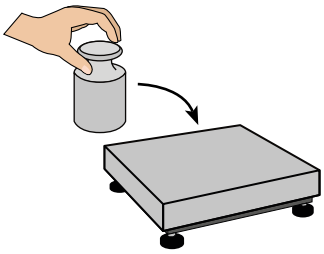


c.

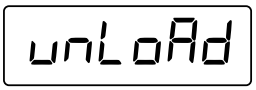
d.



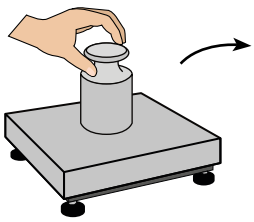
e.



f.

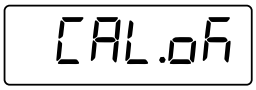


g.



h.

i.

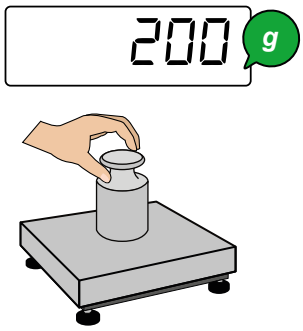


(*) The weight used may not differ by more than 2 % from the weight by which the balance was calibrated.
Check finished calibration

WEIGHING WITH HIGH RESOLUTION DISPLAY - hi.rES

How to select the desired reading division

a.



b.

c.

d.

e.

f.

g.

h.

i.

This operating mode requires configuring an appropriate filter (hi.rES0...hi.rES7) (see page 25).
the maximum number of decimal digit is 3.

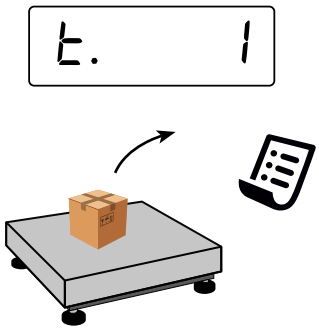
HORIZONTAL ACCUMULATOR - totAL

How to sum the weighs

a.

b.

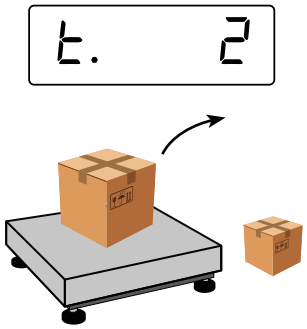
c.



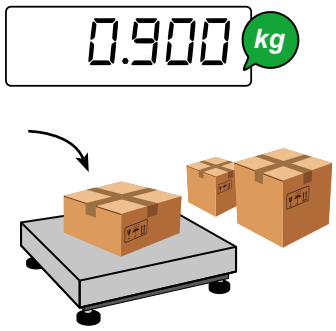
d.

e.

f.

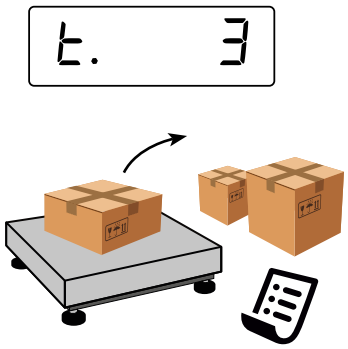


g.



h.

i.

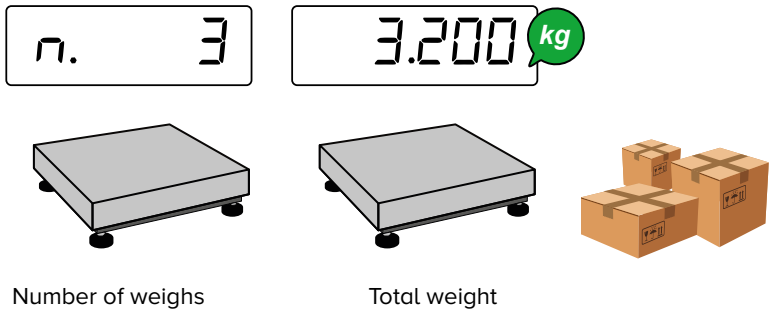


HORIZONTAL ACCUMULATOR - totAL

How to momentarily read the total

a.

b.

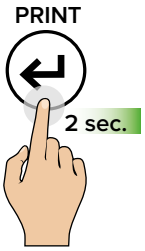


Number of weighs Total weight

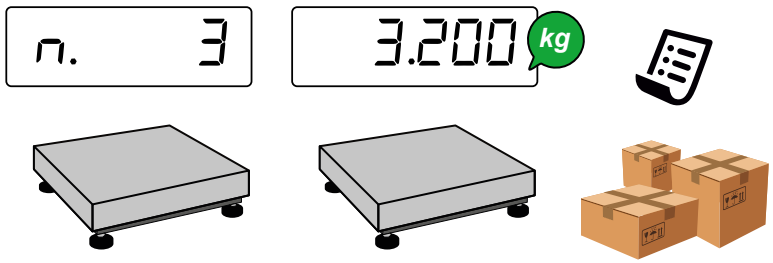
With numerical keyboard, (F) + (7) simply shows the current total without any printout/reset.

How to end accumulation and reset the total

a.



b.

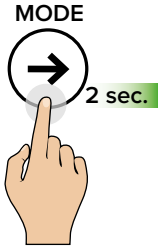


Number of weighs Total weight

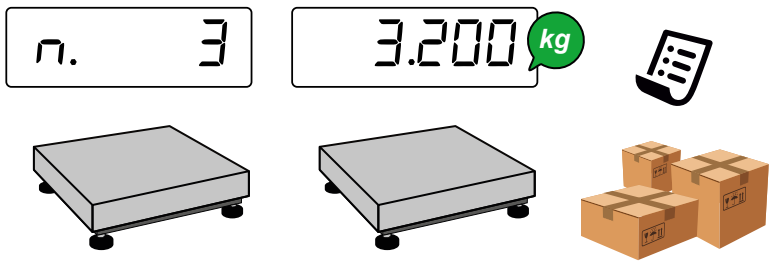
With numerical keyboard, (F) + (7) simply shows the current total without any printout/reset.

How to print and reset the grand total

a.



b.



Number of weighs Total weight

With numerical keyboard, (F) + (6) simply shows the current total without any printout/reset.

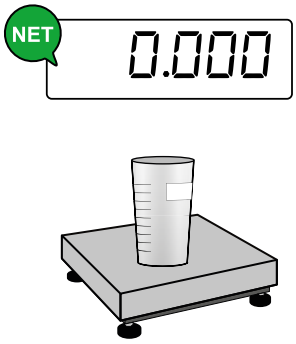
MIXING SEVERAL COMPONENTS - FORMUL

How to sum the weighs

a.

b.

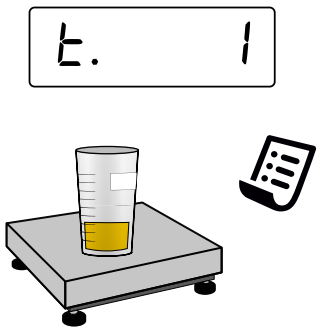
c.



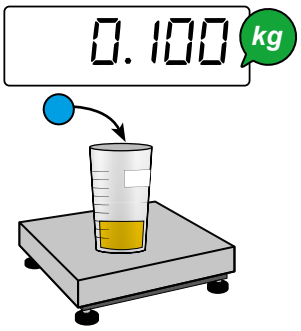
d.

e.

f.

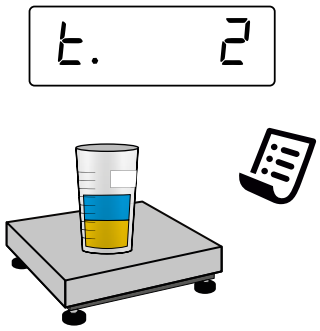


g.



h.

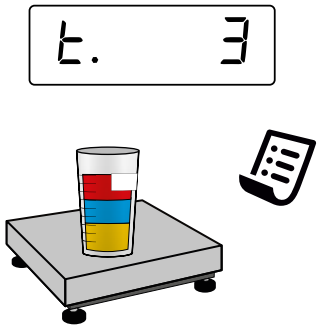
i.



j.

k.

l.

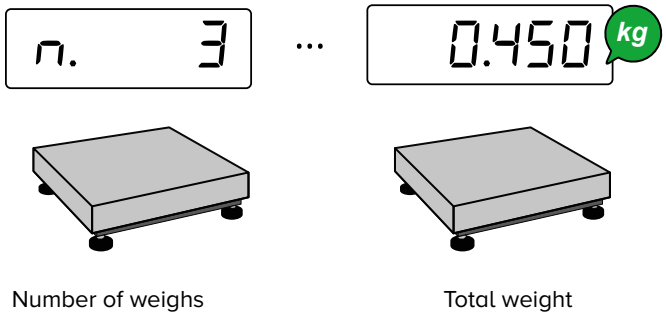


MIXING SEVERAL COMPONENTS - FORMUL

How to momentarily read the total

a.

b.



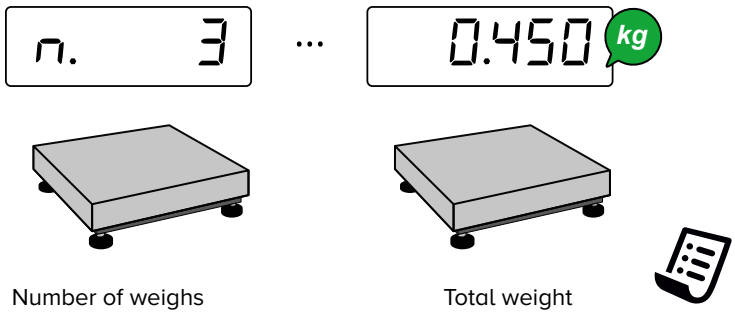
Number of weighs — Total weight

With numerical keyboard, (F) + (7) simply shows the current total without any printout/reset.

How to reset the total

a.

b.

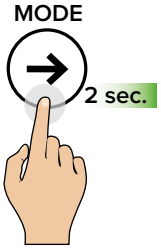


Number of weighs — Total weight

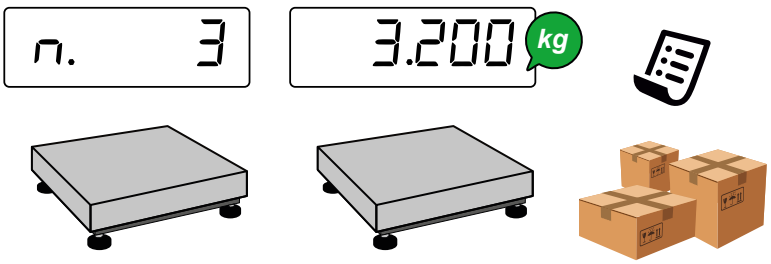
With numerical keyboard, (F) + (7) simply shows the current total without any printout/reset.

How to print and reset the grand total

a.



b.



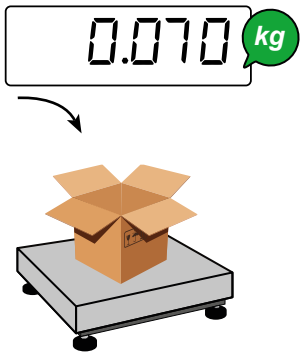
Number of weighs — Total weight

With numerical keyboard, (F) + (6) simply shows the current total without any printout/reset.

COUNTING - Count

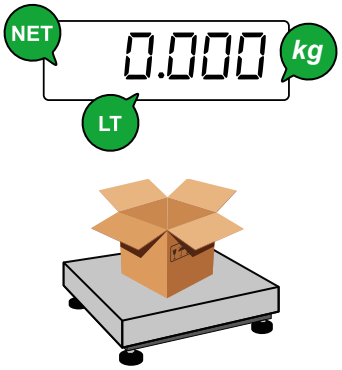
How to sample and count

a.



b.

c.



d.

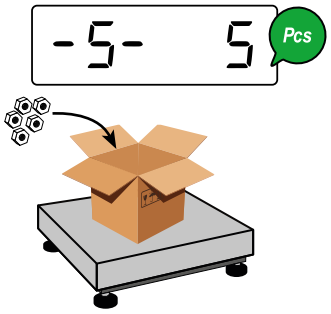
e.

Select the desired reference quantity (5, 10, 20, ... 200 pieces)

How to set the value

With the numerical keyboard, the combination of the (F)+(5) keys allows to type the desired quantity (in any amount).

f.



Load the selected reference quantity

For a correct sampling, the reference quantity must have a weight of at least 0.1% of the maximum scale capacity.

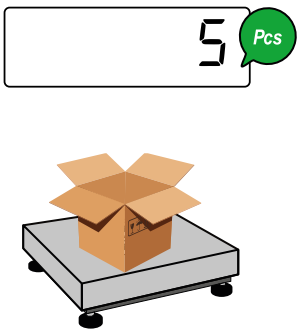
g.

h.

Sampling in progress, please wait...

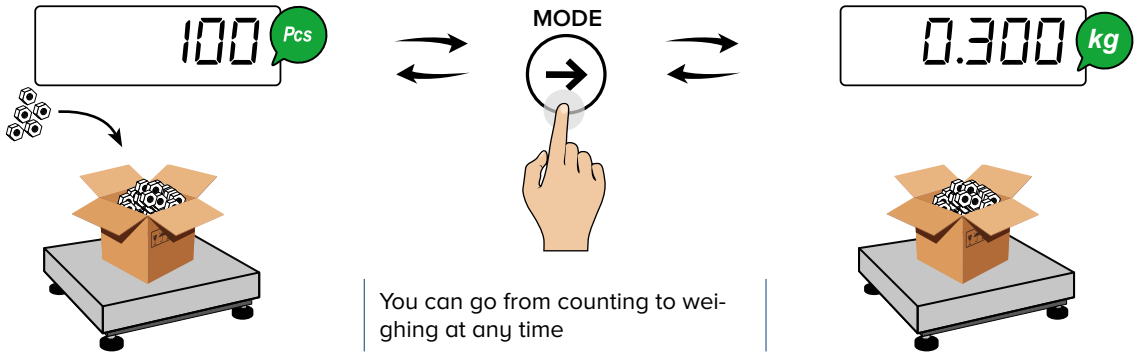
** With the numerical keyboard, the combination of the (F) + (7) keys allows to modify the sampling time. The more the time, the more the sampling precision.*

i.



COUNTING - Count

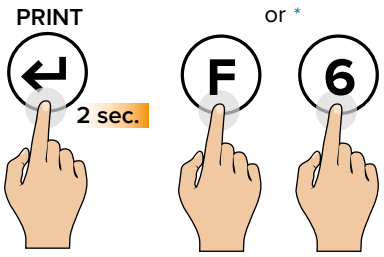
How to switch between pieces count and weight



You can go from counting to weighing at any time

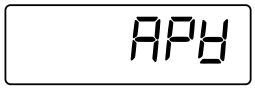
How to enter the average unit weight (PMU)

a.

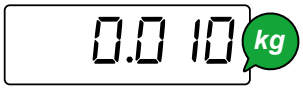


*With the numerical keyboard, it is possible to use the rapid combination (F) + (6).

b.



c.



Enter the average unit weight

Example: = 0,010 kg

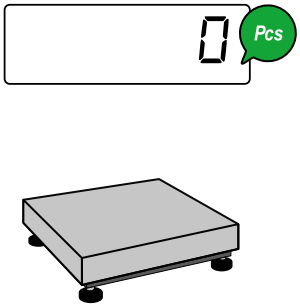
How to set the value

oppure

(0) ... (9)

d.

e.



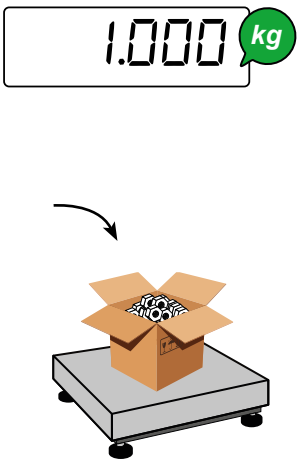
f.

For correct counting, you must set the known tare value *(see page 15)* or tare the empty container and fill it with the pieces to count.

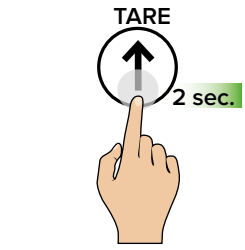
COUNTING - Count

Pieces counting of the total load

a.



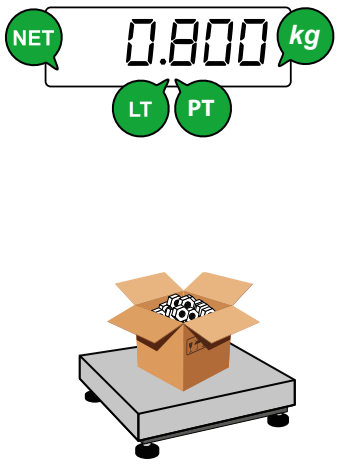
b. Insert the tare value



How to set the value

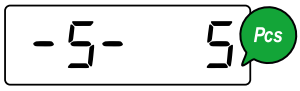
or

c.



d.

e.

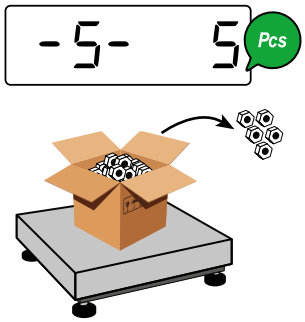


Select the desired reference quantity (5, 10, 20, ... 200 pieces)

How to set the value

With the numerical keyboard, the combination of the (F) + (5) keys allows to type the desired quantity (in any amount).

f. Take the samples (5, 10, 20, 30, 40, 50, 60, 75, 100, 200 pezzi).



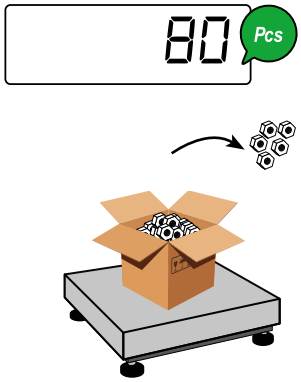
g.

h.

Sampling in progress, please wait...

** With the numerical keyboard, the combination of the (F) + (7) keys allows to modify the sampling time. The more the time, the more the sampling precision.*

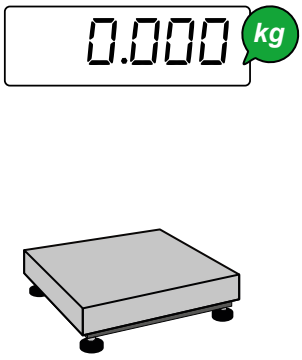
i.



WEIGHT CHECK - CHECK

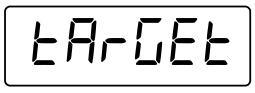
How to start the check with known reference weight

a.



b.

c.



d.

How to set the value

or

0 ... 9

e.

f.

Enter the lower tolerance

How to set the value

or

0 ... 9

g.

h.

Enter the higher tolerance

How to set the value

or

0 ... 9

i.

Example 1
To check a weight of 1000 g with +/- 5 g tolerance (that is, between 995 g and 1005 g), set:
t0 1000
L00005
h00005

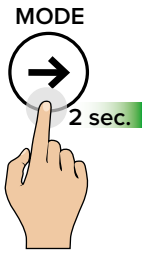
Example 2
To check a weight of 500 g with + 10 g / - 20 g tolerance (that is, between 480 g and 510 g), set:
t00500
L00020
h000 10

WEIGHT CHECK - CHECK

How to start the check with automatic target acquisition

a.

b.



c.

Enter the lower tolerance

How to set the value

or

0 ... 9

d.

e.

Enter the higher tolerance

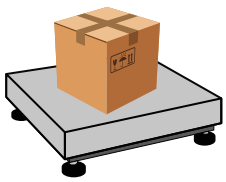
How to set the value

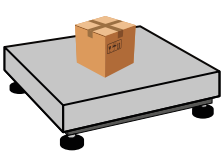
or

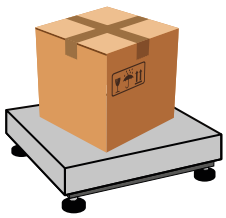
0 ... 9

f.

How to check the weight



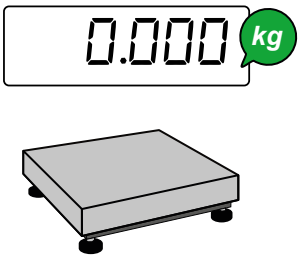




WEIGHT CHECK - CHECK

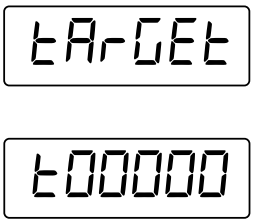
How to update the nominal weight with known reference weight

a.



b.

c.



How to update the nominal weight with automatic target acquisition

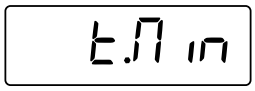
a.

b.

How to edit the check thresholds

a.

b.



c.

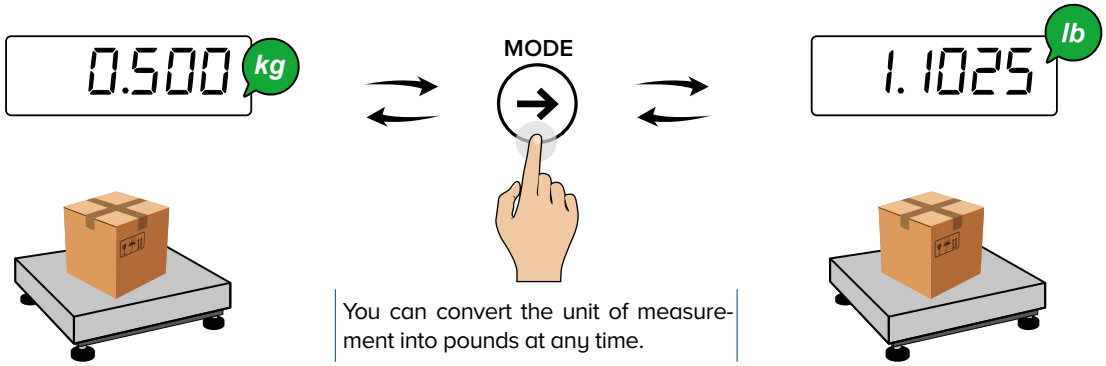
UNIT OF MEASUREMENT CONVERSION - ConUEr

How to convert the unit of measurement into pounds (standard mode)



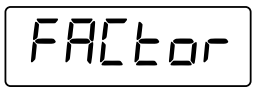
You can convert the unit of measurement into pounds at any time.

Converting the unit of measurement with free conversion factor

a.

b.

c.



d.

Enter the average unit weight

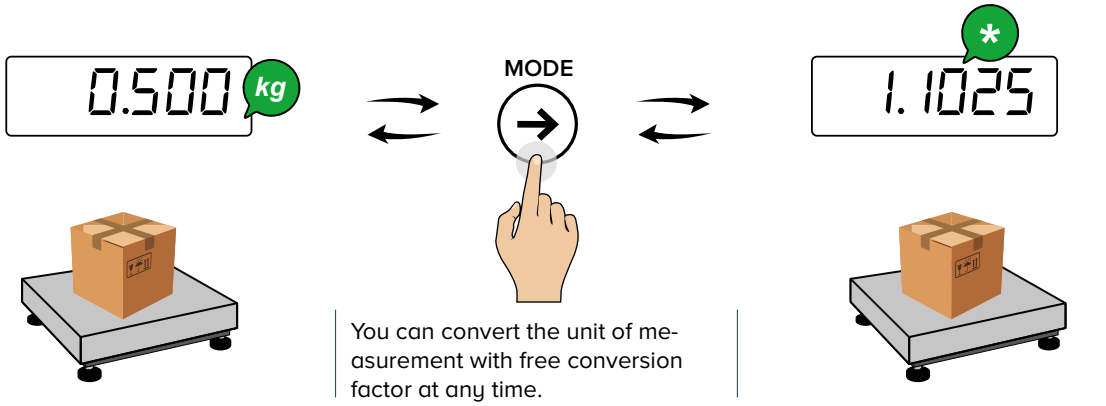
How to set the value

Pounds (lb)	1g = 0.00220
Ounces (oz)	1g = 0.03527
Stones (st)	1g = 0.00016
Karats (kt)	1g = 5.00000
Grains (gr)	1g = 15.43240
...	

Any conversion factor must be multiplied to the weight.

e.

f.



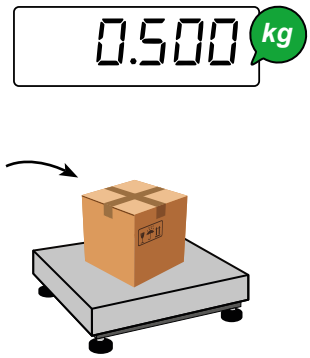
You can convert the unit of measurement with free conversion factor at any time.

PERCENTAGE WEIGHING - PErC

Percentage check

I. How to acuire the 100% reference

a.

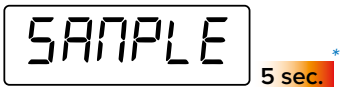


b.

c.

d.

e.

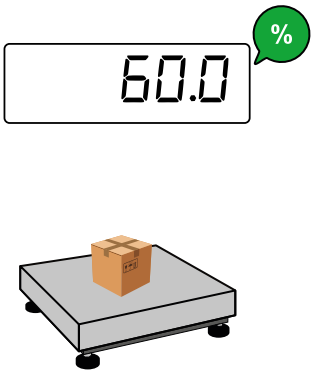


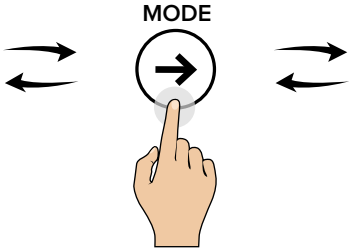
Sampling in progress, please wait...

** With the numerical keyboard, the combination of the (F) + (7) keys allows to modify the sampling time. The more the time, the more the sampling precision.*

f.

II. How to check the weight





You can go from weight in % to weight in kg at any time.

PERCENTAGE WEIGHT - PEr[

Percentage metering

Example of formula

Product: RP28K
1. 2127A3 - 50%
2. 23AB4 - 30%
3. Water - 20%

Dose 500g

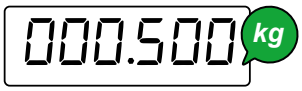
a.

b.

c.

d.

e.

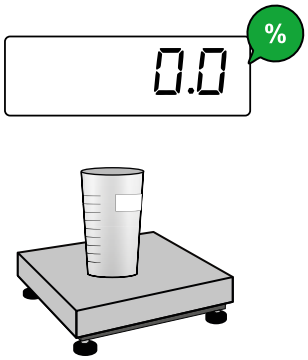


Enter the total quantity to achieve

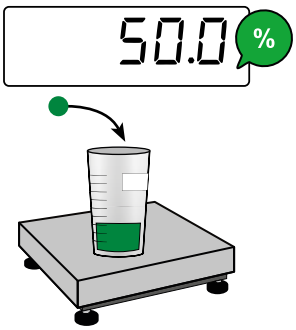
How to set the value

f.

g.



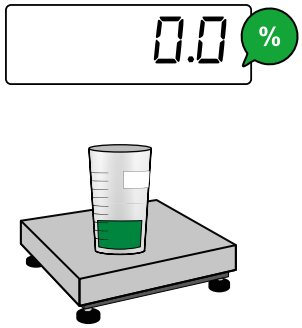
h.



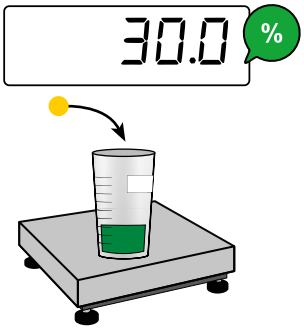
i.

PERCENTAGE WEIGHT - PErC

j.

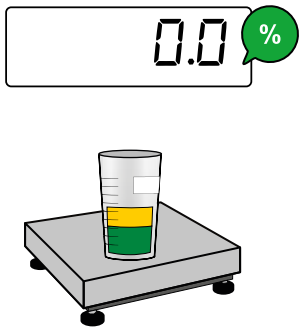


k.

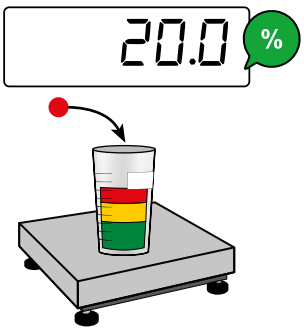


l.

m.

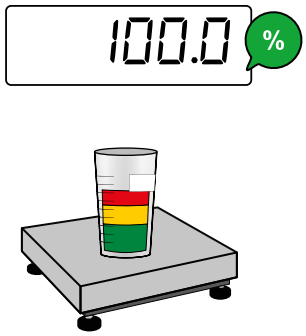


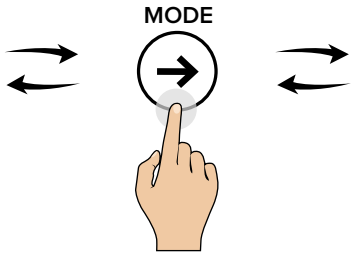
n.



o.

p.



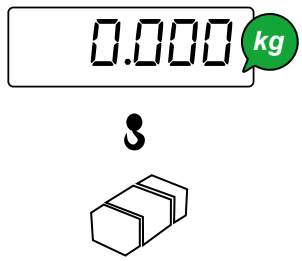


You can go from weight in % to weight in kg at any time.

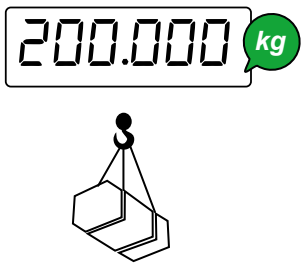
HOLDING WEIGHT ON THE DISPLAY - hoLd

How to activate the function

a.

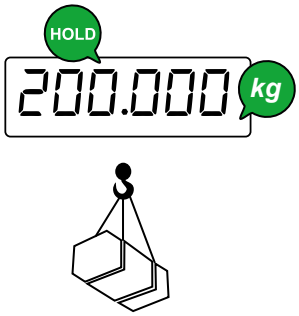


b.

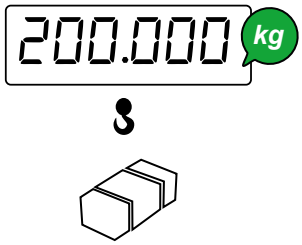


c.

d.



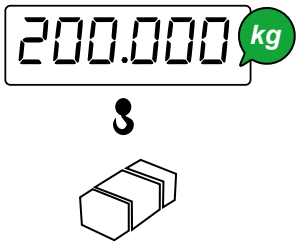
e.



The weight on the display is held even when the scale is unloaded.

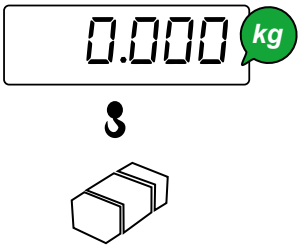
How to deactivate the function

a.



b.

c.

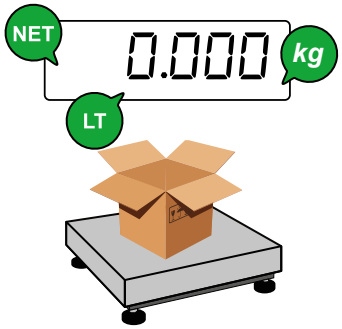


EXCHANGE BETWEEN NET WEIGHT AND GROSS WEIGHT - nEtGro

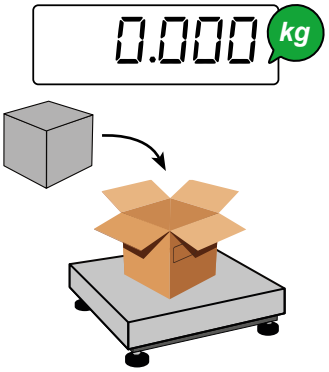
a.

b.

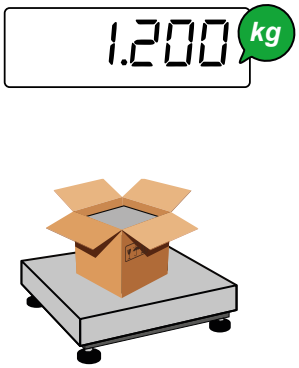
c.



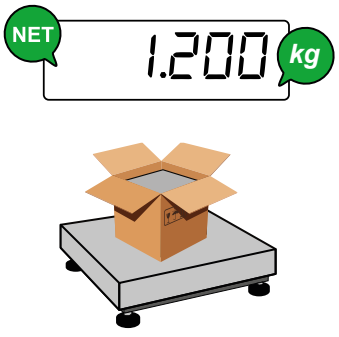
a.

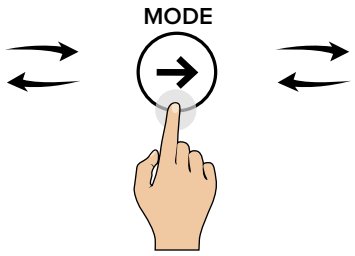


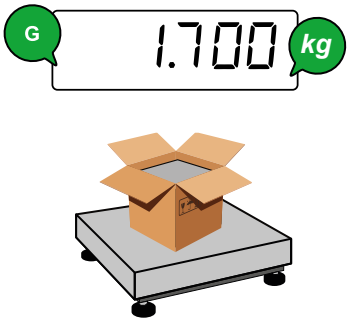
b.



d.







You can go from net weight to gross weight at any time.

If there is a tare weight, the gross weight is displayed for 2 seconds. While the gross weight is displayed, printing is not possible.

F iLtEr - WEIGHING FILTERS

Edits scale reactivity.
Useful in optimising weighing to your needs.

With the approved instrument, you can select only some of the filters listed below.

Premise
The "0" represents minor filtering incidence.
Increasing the incidence give the weight more stability.
We recommend weighing several times, changing the incidence until you obtain the best compromise between reactivity and stability.

FAQ

Frequently Asked Questions

PRINT

The scale does not print

- Another printout is already in progress (bUSY)
- Make sure there is a roll in the printer
- The printer does not switch on
- The weight is unstable (UnStAb)
- The net or gross weight is negative or is insufficient for printing (LoW)
- Underload or overload (------ o ------) (Un.oUEr)
- The scale was not loaded after the last printing (no.0.UnS)
- You are trying to print a non-approved weight

ACCUMULATION

The scale does not accumulate

- Make sure there is a roll in the printer
- The printer does not switch on
- The weight is unstable (UnStAb)
- The net or gross weight is negative (LoW)
- Underload o overload (------ o ------) (Un.oUEr)
- The scale was not unloaded after the last printing (no.0.UnS)
- The weight is insufficient for weighing (LoW)
    - less than 10 divisions for the accumulator modes
    - less than “Min” for the approved products (shown on the measuring plate)

The sale has lost the total

- Switching off the scale causes the accumulated totals to be lost

TARE

The scale does not tare

- The weight is unstable (UnStAb)
- The gross weight is negative (LoW)
- The weight is insufficient
- The weight exceeds the maximum capacity
- The tare function has been deactivated *(see page 49)*
- In the event of manual tare, the value exceeds the maximum capacity

WEIGHING

The scale does not switch on

- Make sure the power cable is connected properly
- Connect the battery charger and try again. If the instrument continues to malfunction, contact the dealer.

The scale switches off suddenly

- Automatic switching off active
- Low battery
- Battery failure
- Power supply line failure

The scale is not reactive

- One of the available energy saving modes has been activated
- An unsuitable weighing filter has been selected

The scale display switches off and displays a dot

- Stand-by mode is active: press a key to reactivate weighing.
- Energy saving mode is active: contact the dealer for further details.

The scale displays a permanen "2Ero" message

- The scale is unable to automatically reset the weight because it exceeds the maximum resettable weight at switch-on.
- Unload the scale and try again. If the scale continues to have the same problem even when there is nothing on it, contact the dealer.

The weight is unstable

- Check the active weighing filter *(see page 47)*.
- If the support surface is subjected to vibrations from machinery or moving vehicles, move the scale onto another surface and try again.

PIECE COUNTER

The scale does not carry out sampling

- The weight is unstable (Err .Not)
- The weight is insufficient, add more pieces and try again (Error)

ERROR MESSAGES

MESSAGE	DESCRIPTION	SOLUTION
buSY	Another printout is already in progress	Wait for the printout in progress to be finished and try again.
unStAb	The weight is unstable	Check the weighing filter *(see page 35)*. If the support surface is subjected to vibrations from machinery or moving vehicles, move the scale onto another surface and try again.
LoW	The net or gross weight is negative or insufficient for printing	Add weight and try again.
un.oUEr	Underload o overload (_____ o ⁻⁻⁻⁻⁻)	Restore a valid weight condition. If the problem persists, contact customer service.
no.0.unS	The scale was not unloaded after the last printing	Completely unload the scale, making sure the →0← light comes on. Reload the weight and try again.
Err.Not	The weight is unstable	Wait for stability (the ~ light) and try again.
Error	In piece counting mode, the weight is insufficient for proper sampling.	Add more pieces and try again.
