Versatility in Measurement

Rice Lake's Versa-portion RLP-SM is a compact and sturdy solution for the tightest corners and cramped countertops while still leaving plenty of workspace to spare. This rigidly constructed stainless steel model is perfect for the haphazard messes of busy restaurants or the precise needs of hygienic medical settings.

With an IP68 rating, splashes and spills are no problem. A removable stainless cover lets you easily wipe down the all-stainless exterior for a clean, sanitary surface.

Versa-portion's bright LED display is easily read in dimly lit rooms, and the keypad's three-button operation is straightforward and simple to use. Tare a product or container up to one-half of total scale capacity.

By adding an optional battery, the Versa-portion has up to 60 hours of continuous mobile use, adding convenience and portability to your weighing and portioning tasks.

Weighing of medical procedure byproducts.

STANDARD FEATURES

- Compact and easy to use
- IP68 water and dust resistant
- Stainless steel finish
- Removable weigh pan for quick and easy cleaning
- LED display
- AC adapter included
- HACCP compliant

OPTIONS/ACCESSORIES

- Rechargeable battery
