

# H651-10-4

## BABY SCALE

The Rice Lake Healthweigh® baby scales precisely weigh even the most active babies, up to 20 kilograms. Motiontrap™ movement compensation technology compensates for involuntary movements and provides a stable, accurate weight reading. Enhanced precision is essential especially when weighing infants. The H651-10-4 provides precise weighments from zero to 0.005 kilograms with accuracy. A four-sided removable tray keeps babies safe and a built-in measuring tape ensures quick and easy measurements.
