

Standard Features

- Constructed of A36 quality steel and finished with a high solids urethane primer
- 1,000 pound capacity
- 36-inch wide walking surfaces, 42-inch handrails and 9.5-inch stair depth
- Custom lengths and widths are available for both existing truck scales and new installations

Designed for applications with unavoidable pedestrian traffic near a truck scale, Rice Lake's SURVIVOR catwalks are essential to maintain safety. These solid, A36 quality steel structures offer stable, OSHA-compliant solutions that can be either free-standing or attached directly to a truck scale.
