IMPORTANT NOTICE

Thank you for purchasing the ISHIDA WM-MICRO.

This manual describes the procedures for installing, operating, and maintaining the machine.

Those who handle the machine must be aware of the hazards involved. These dangers may not be obvious, so it is imperative to follow the instructions detailed in this manual when installing, operating, and maintaining the machine.

Therefore, we recommend that you thoroughly read and understand this manual before installing, operating, or maintaining the machine, and keep this manual in a safe place for reference whenever necessary.

Safety countermeasures should be carefully considered and implemented before performing any installation, operation, or maintenance procedure not specifically described in this manual or indicated on the machine itself.

ISHIDA Corporation warrants that this product conforms to the specifications. If the product does not conform to the specifications, it will be repaired or replaced free of charge within the warranty period.

Provided, however, that ISHIDA Co., Ltd. shall not be liable to Purchaser for lost profits, special damage (whether or not foreseeable), consequential damage, indirect damage, or any claims for consequential compensation whatsoever (howsoever caused).

ISHIDA shall not be held responsible for any warranty, repair, or other claim relating to the unit if it is improperly handled, stored, installed, or maintained, or if it is contaminated, abused, misused, or altered in any way.

This document and other materials contain important confidential information of ISHIDA Co., Ltd. Unauthorized reproduction, modification, transfer, transmission to the public, or other inappropriate use or disclosure to third parties without prior permission is strictly prohibited.

Copyrights to all contents of this document and other materials belong to ISHIDA Co., Ltd. Reproduction, modification, transfer or transmission to the public without prior permission is prohibited by copyright law.

ISHIDA Co., Ltd. grants permission for employees to reproduce and copy this document and other documents solely for the purpose of understanding this product.

PRECAUTION REGARDING FCC IN USA

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

PRECAUTION REGARDING WIRELESS MODULE

It is strongly advised that the following safety measures must be observed to ensure the safe operation of the machine in case that wireless module is installed.

• In Case that Wireless LAN / Wireless platter are equipped

For Canada / USA  CAUTION

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter. This equipment complies with FCC/IC radiation exposure limits set forth for a controlled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated keeping the radiator at least 20cm or more away from person's body (excluding extremities: hands, wrists, feet and ankles).

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

The W52/W53 are restricted to indoor operation only.

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement contrôlé et respecte les règles des radioélectriques (RF) de la FCC lignes directrices d'exposition et d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement doit être installé et utilisé en gardant une distance de 20 cm ou plus entre le dispositif rayonnant et le corps (à l'exception des extrémités : mains, poignets, pieds et chevilles).

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

Les bandes W52 et W53 sont limitées à une utilisation en intérieur uniquement.

For Europe  CAUTION

The W52/W53 are restricted to indoor operation only.

SIGNAL WORDS (TYPES & MEANING)

The signal words shown in this manual are separated into two stages depending on the level of danger or the seriousness of potential injury. Fully understand the meanings of the signal words shown below and follow the directions as shown in this manual and on the stickers placed on the machine.

Signal Word	Meaning
	Indicates an imminently hazardous situation which, if not avoided, is likely to result in serious injury or may result in death. Additionally there may be severe property damage.
	Indicates a potentially hazardous situation which, if not avoided, will result in death or serious injury.
	Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury or in property damage.

Symbol	Meaning
	Indicates information that needs to be noted or emphasized.
	Indicates the reference page related to performance of an operation.
	Indicates information useful for the better understanding of the machine.

NOTICE FOR THE SOFTWARE PRODUCT

This product includes programs or software that Ishida Co., Ltd. (hereinafter referred to as "ISHIDA") holds the copyright or has been licensed from a third party (hereinafter referred to as "Software"). The Users need to comply with the following terms and conditions to use "Software" ("Software" may include open-source programs, free software, and/or programs licensed from a third party, which have the terms and conditions prescribed by a third party (hereinafter referred to as "Third Party Terms and Conditions"). The "Third Party Terms and Conditions" shall prevail, in the event of any conflict between the "Third Party Terms and Conditions" and the following terms and conditions, any agreement between the ISHIDA and the User, or other agreements.). The Users are deemed to have agreed to the following terms and conditions at the time of installation provided the Software requires installation, otherwise at the time of when the Users start up using the product.

TERMS AND CONDITIONS

1. The Users shall not copy, transmit to the public and/or transfer (including to transfer to the other devices) the "Software", or assign or lend the "Software" to any third party separately from the product, except written permission by ISHIDA.
2. The Users shall not modify, change, reverse engineer, decompile, disassemble, or make any change to the current "Software" (hereinafter referred to as the "Modification") by yourself or through a third party. Even if any defect or breakdown occurs due to the "Modification", ISHIDA and dealers (including but not limited to ISHIDA's subsidiaries, distributors, sales representatives, agents, licensees, vendors etc.) do not guarantee anything in the "Software". In addition, even if any damage occurs to the Users as a result of the "Modification", ISHIDA and dealers would not be liable.
3. The "Software" is licensed to the Users by ISHIDA. ISHIDA does not assign and transfer any right of "Software" to the Users. The Users shall not assign and transfer or sublicense the right of "Software" to any third party.
4. ISHIDA AND DEALERS WOULD NOT WARRANT THAT THE "SOFTWARE" HAS NO ERRORS, BUGS, OR OTHER DEFECTS, THAT THE "SOFTWARE" WILL OPERATE WITHOUT INTERRUPTION, THAT THE "SOFTWARE" WILL CONFORM TO THE USER'S SPECIFIC PURPOSE, AND THAT THE "SOFTWARE" WILL NOT CAUSE ANY DAMAGES TO THE USERS OR A THIRD PARTY.
5. EXCEPT FOR DAMAGES OR LOSSES RESULTING FROM THE GROSS NEGLIGENCE, WILLFUL DEFAULT OR FRAUD OF ISHIDA OR DEALERS REGARDING THE USE OF "SOFTWARE", IN NO EVENT WILL ISHIDA AND DEALERS BE LIABLE FOR ANY SPECIAL, INDIRECT, PUNITIVE, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LOSSES (INCLUDING WITHOUT LIMITATION LOSS OF USE, DATA, PROFIT, SAVINGS OR BUSINESS), EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR IF SUCH POSSIBILITY WAS REASONABLY FORESEEABLE. WHATEVER THE BASIS OF THE CLAIM OR ACTION (SUCH AS BREACH OF WARRANTY, CONDITION, CONTRACT, INFRINGEMENT AND TORT, INCLUDING STRICT LIABILITY AND NEGLIGENCE, OR OTHER LEGAL THEORY), THE TOTAL AMOUNT OF COMPENSATION FOR ISHIDA AND DEALERS WITH RESPECT TO THE USE OF THE "SOFTWARE" SHALL BE LIMITED TO THE SALES AMOUNT OF THE PRODUCT.
6. If the Users export the "Software" out of the country in which the "Software" was initially installed, the Users shall comply with all laws and regulations related to domestic and foreign export controls at the Users' own cost.
7. In addition to the above, the Users shall use the "Software" in compliance with the instruction manual for the product.
8. Please note that if the Users would not agree to any of the above terms and conditions, or if the Users would violate any of the above terms and conditions, ISHIDA may terminate the license of the "Software" and may prohibit the Users from using the product.

PRECAUTIONS FOR USE

For safe operation, the following safety considerations must be observed:

WARNING

- **Places subject to low temperature and low humidity, or high temperature and high humidity**
- **Places exposed to direct sunlight**
- **Places subject to the splashing of water**

- **Places exposed to strong vibration**

Places where the floor or ground is unstable

- **Places exposed to direct chill air**

Places exposed to direct chill in the air from cooling equipment such as air conditioners and refrigerators.

- **Places with much litter or dust**

- **Places where the voltage fluctuation is large**

- **Around the ozone source such as an ozone sterilizer**

! WARNING

- Contact your local ISHIDA service agent for installation of the machine.

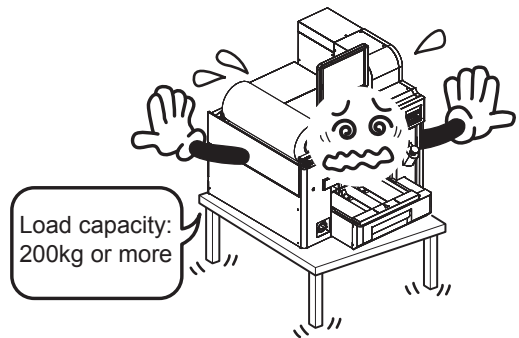

- When you move the machine, contact your local ISHIDA service agent.

About the load capacity of the base or table

! WARNING

- When installing the machine on a base or table other than the optional dedicated base, make sure that the load capacity is 200 kg or more. When placing objects other than the machine on the same base or table, make sure that the value obtained by subtracting the weight of such objects from the load capacity is 200 kg or more.

Regarding the Power Source

WARNING

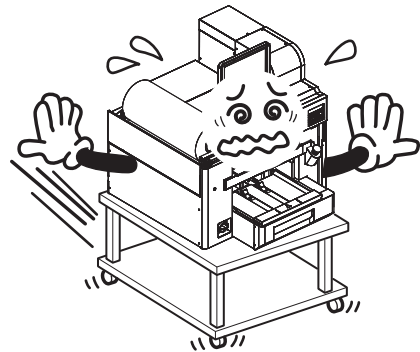

- For the power source, use either a single-phase 200-240VAC or a three-phase 200-240VAC.
- Power sources with voltage fluctuation may be a cause of machine malfunction.
- Do not stand on, or place heavy objects on the power cable. Damage to the cable and its continued use may cause an accident or trouble.
- Unplug the power cable from the outlet when not in use for a long period of time. Failure to do so may cause a fire.

Regarding Jacks for Fixing the Machine

WARNING

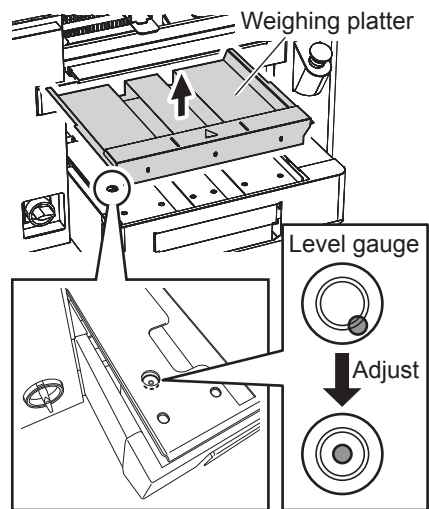

- Once the machine has been installed, do not remove the jacks affixing the machine. As casters are affixed, this machine may move during production work. Also, this may lead to a reduction in wrapping capability.

Regarding the Level Gauge

⚠ WARNING

- Always ensure this machine is level. If the level gauge is not used to correctly level the machine, erroneous weighing readings may occur and may be a cause of wrapping failure. If the machine is not horizontally even, adjust using the four jacks used for fixing the machine. The level gauge is located beneath the weighing platter.

Providing sufficient installation space

⚠ WARNING

- Allow ample installation space on either side of the machine to ensure easy access for maintenance.

[LL type]	With liner: W800 x D865 mm
	Linerless: W825 x D865 mm
[L type]	With liner: W745 x D865 mm
	Linerless: W770 x D865 mm

- Disposal of the packaging materials should follow the local rules regarding separation of waste materials.

WARNING STICKERS

Warning stickers are affixed to the machine to warn operators of possible dangers. Described here are the meanings and handling precautions of these warning stickers.

WARNING

Keep these stickers clean at all times.

Take precautions to ensure that they do not become unreadable or peel off.

Meaning of the Warning Stickers

 WARNING		 ADVERTENCIA		 WARNING		 ADVERTENCIA	
CRUSHING HAZARD Do not put hand into machine.		PELIGRO DE APLASTAMIENTO No ponga las mano dentro de la máquina.		HIGH TEMPERATURE, BURN HAZARD Do not touch heater roller. Raise the guard when the machine is not in use. Lay down the guard when the machine is in use.		ALTA TEMPERATURA, RIESGO DE QUEMADURAS No toque el rodillo calentador. LEVANTE el protector metálico del rodillo calentador cuando la máquina NO esté en uso. BAJE el protector metálico del rodillo calentador cuando la máquina esté en uso.	
0	5	10	15	20	25	30	35

Warning stickers are affixed to the machine to warn operators of possible dangers. Described here are the meanings and handling precautions of these warning stickers.

**PRESS
PRENSAR**

**EMERGENCY STOP
PARADA DE EMERGENCIA**

**BEFORE PUTTING HANDS INTO MACHINE.
ANTES DE PONER LAS MANOS DENTRO DE LA MAQUINA.**

In case you have to put your hand(s) in the machine during operation or in case you hear strange noises from the machine, or when there is a possibility that a dangerous situation may occur if you leave the machine on, press the emergency stop button, and then continue the maintenance operation.

When you take out commodity items left inside the machine or when you touch the machine except for key operation, press the emergency switch.

**WARNING
ADVERTENCIA**

HAZARDOUS MOVING PARTS
Keep hands away from moving parts.

PELIGRO PARTES MÓVILES
Mantenga las manos alejadas de las partes móviles.

Tray feeder move automatically when product is placed on scale.
La bandeja de alimentación se mueve de forma automática cuando el producto es colocado en la báscula.

This is attached at the infeed unit. The infeed table moves during weighing, so keep your hand(s) away from the infeed table. It may pinch your fingers or hands.

Attached to the film cutter part.
Do not touch the film cutter part, as there is a risk of cutting your fingers.

	⚠ WARNING ⚠ ADVERTENCIA KNIFE BLADE INSIDE Keep hands away → NAVAJA EN EL INTERIOR Mantenga las manos alejadas
	⚠ WARNING ⚠ ADVERTENCIA CRUSHING HAZARD Keep hands away from moving parts. PELIGRO DE APLASTAMIENTO Mantenga las manos alejadas de las partes móviles.

This is attached at the film cutter unit. When you touch the film cutter part, it will cut your finger, please do not touch it.

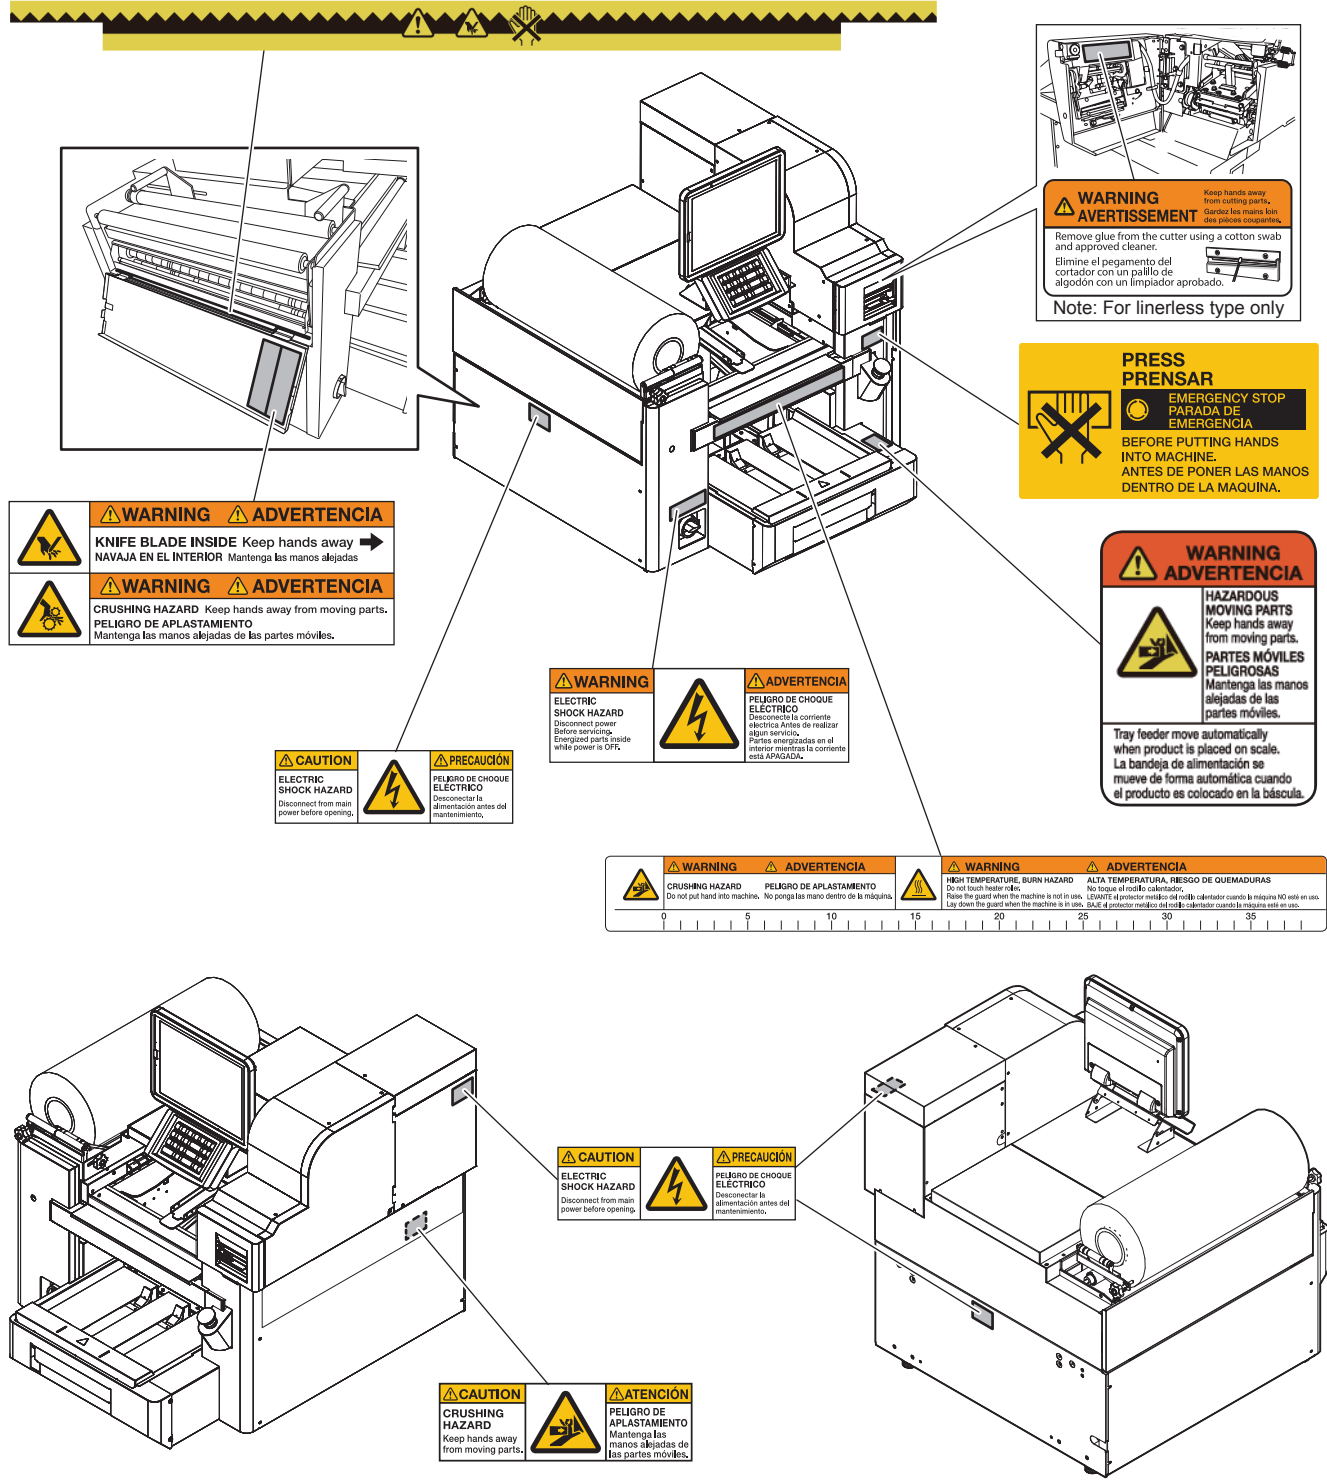

⚠ CAUTION		⚠ PRECAUCIÓN
ELECTRIC SHOCK HAZARD Disconnect from main power before opening.		PELIGRO DE CHOQUE ELÉCTRICO Desconectar la alimentación antes del mantenimiento.

This is attached at the right side of the machine.
As there is a risk of electric shock, do not open the cover.

⚠ CAUTION		⚠ ATENCIÓN
CRUSHING HAZARD Keep hands away from moving parts.		PELIGRO DE APLASTAMIENTO Mantenga las manos alejadas de las partes móviles.

These are attached at every place there is a danger for operators' hands or fingers to be pinched. Please follow this manual for proper operation.

Positions of Warning Stickers and Handling Precautions

Cut-off and Display of the Power Source

- For safety, please shut down the power before performing maintenance on the machine.
- Please be careful because even when the switch is turned to the "OFF" position, there is still electric power inside the machine.
- In order to prevent other persons from starting up the machine during the service work, the following steps are recommended. Lock up the power switch at the "OFF" position. Make a warning tag for preventing an accident and place it at the power switch.
- Refer to the images below when you place the lock and the tag.

General Notes

This section describes general precautions for safe use of the machine.

⚠
DANGER

- Do not press switches and buttons with a wet hand. Doing so may result in electric shock.
- Electrical work should be performed by an electrical constructor or by a person qualified in electrical engineering.
- Do not touch any conducting part while power is being supplied. Doing so may result in electric shock.
- Maintenance and inspection should be performed by an electrical maintenance person. Maintenance and inspection performed by a person who is not qualified may result in electric shock or be a cause of malfunction to the machine.

⚠
WARNING

- Operators of this machine should tie long hair into a bundle, wear a cap and wear appropriate clothes and shoes for this type of work. Any long hair or inappropriate clothing may become caught in rotating parts of this machine which may lead to injury.
- Before operating this machine, ensure that every cover has been mounted.
- Turn the power switch OFF when performing instruction and repair of parts other than those specifically instructed.
- Wait for a while prior to performing any inspection on this machine following turning-off of the power switch. Even if power is cut, parts of the machine may remain hot. Also, if other devices are connected to this machine in the pre-process or post-process areas, ensure powers to all devices have been cut off.
- To prevent other people around you from wrongly starting the power supply or moving devices, ensure you have given clear instructions that maintenance and inspection are being performed to those around you.

⚠
CAUTION

- Do not operate this machine while placing tools and other items on top of the machine. Doing so may cause these items to fall into the moving parts of the machine causing damage to the machine.
- When performing maintenance and inspection, wear appropriate work clothes. Also, avoid wearing cotton work gloves.
- Do not touch this machine or its packaging materials with dirtied hands through the handling of food, etc. Doing so may be a cause of microbial contamination.

Handling Precautions

- **Do not put your hand(s) into the infeed unit or wrapper.**

Do not put your hand(s) in the infeeding, weighing, or wrapping areas. If you need to put your hand(s) inside the wrapping area to remove something from the infeeding, weighing, or wrapping area, be sure to press the emergency stop button first. Never put your hand(s) inside the wrapping area as your hand(s) may become caught in the machine.

- **Keep your hand(s) away from the film cutter.**

When you need to change the film or do anything near the film cutter, always press the emergency stop button first. Grievous injury may ensue should the film cutter jump out and cut your hand.

- **Do not touch, or allow clothing to touch the discharge heater unit.**

The heater will remain hot during operation and even for some time even after the power is switched OFF. Touching the unit during this time may cause burns.

- **Do not disassemble or make any alterations to the machine.**

The machine can be damaged if disassembled incorrectly. Making any alterations without permission, or removing any parts other than those specified, may cause a serious accident or injury. (ISHIDA will not guarantee the subsequent quality of the machine)

 **WARNING**

- **Do not insert or pull out the power plug with wet hand.**
Doing so may cause a short circuit or electric shock.

- **Do not fabricate the plug for power supply or power cable.**
Doing so may cause a fire or electric shock.

- **Do not pull or damage the power cable or use other power cables not specific to the machine.**
Doing so may cause the core cables to be damaged. This may cause a fire or electric shock.

- **Do not spill water directly on the machine**
Doing so may cause electric shock or machine failure.

WARNING

- **When cleaning the floor or performing activities which use water, ensure that the water doesn't splash on to the machine.**

Doing so may cause machine failure or dirt to stick to the machine.

- **Always switch OFF the main power before performing any cleaning.**

Your hand may be caught in the moving parts of the machine such as the chain of the weighing unit.

- **When disinfecting or bleaching the area around the machine, make sure that the chemical is not applied directly to the machine.**

Inappropriate use of the chemical may cause machine failure, etc., so dilute the chemical to the concentration specified by the manufacturer.

CAUTION

- **Handle with care as this is a precision machine.**
Bumps or shocks to the machine may cause damage and lower the wrapping speed.

- **Do not remove or damage the warning stickers.**
If the warning stickers are damaged in any way, contact your ISHIDA representative.

- **Do not apply strong force to the machine or printer unit.**
Doing so may cause deformation or machine failure.

- **Do not place heavy objects on the conveyor or stand on the machine.**
Doing so may cause deformation or machine failure.

- **Store films and labels in hygienic places and avoid locations of high-temperature, high-humidity.**
Doing so may cause wrapping failure and labeling error.

Safety Precautions

WARNING

- **If abnormalities such as a burnt smell are detected, stop use of the machine, switch the main power OFF and pull the power cable from the socket.**

Continued use of the machine may be a cause of fire or machine failure. Stop use of the machine and contact your ISHIDA representative.

- **Do not pull out or insert the power cable of the machine when main power is ON.**

Doing so may cause machine failure.

- **Do not perform erroneous printing of the label size.**

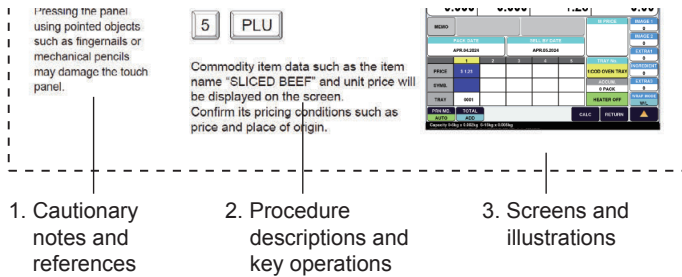

Printing wider than the label width may cause fire or burnout of the printing roller or thermal head.

HOW TO USE THIS MANUAL

Shut off the power supply of this machines to secure the safety of the operator before any maintenance and inspection. Screens of the machine used in this manual are examples only. The position, size, and color of buttons and displays may have been changed depending on the settings.

Format of Procedure Explanation

1. On the left-side of each page are any precautions, reference information and reference pages important to the explanation.
2. Operational procedures are first explained and below them, the key operations are shown.
3. Screen displays or illustrations are shown corresponding to the operational procedure.

CHAPTER 1

BEFORE USING THE MACHINE

1.1 NAME AND FUNCTION OF EACH PART

This section describes the name and function of each part of this machine. The names and functions of each part of the machine are explained below. In this manual, the following names for each part are used.

1.1.1 External Appearances

1.1.2 Accessories

With liner

- User's Manual (this manual): 1
- Precaution Manual: 1
- Hexagonal screwdriver: 1
- Empty bottle for IPA and cotton swab set: 1
- CE Declaration of Conformity (EU only): 1

Linerless

- User's Manual (this manual): 1
- Precaution Manual: 1
- Hexagonal screwdriver: 1
- Empty bottle for IPA and cotton swab set: 1
- CE Declaration of Conformity (EU only): 1
- Cotton swab and cloth set: 1
- Cleaning Manual (US: English, EU: Italian): 1

1.1.3 Stroke Keys

Displays the memo preset screen.

Changes the fixed price, or changes from a unit price item to a fixed price item.

Changes the unit price, or changes from a fixed price item to a unit price item.

Calls pre-registered data such as commodity items, POPs, and comments.

Erases the entered numerical data or reset the error.

Feeds labels.

Corrects the zero point of the weighing unit.

Issues labels.

Changes the weight of inserts in a tare.

1.2 USABLE LABELS

Be sure to use designated labels that are compatible with the machine.

	With liner	Linerless
Temperature	5 to 35 °C	5 to 30 °C
Humidity	20 to 85 % RH	30 to 75 % RH
Label horizontal dimension	33 to 80 mm	44, 60, 80 mm
Label vertical dimension	23 to 105 mm	30 to 500 mm Note: Labels with a height of 105 mm or more require assistance for issuance (support the label posture by hand).
Outside diameter	125 mm	
Internal diameter	40 ±1 mm	

CAUTION

If label paper outside the specified range is used, labels may not print correctly, or paper may not be fed smoothly.

1.3 USABLE TRAYS / FILMS

Use trays and films specifically designed for this machine.

1.3.1 External Appearance

■ Unstable Trays

- Specially shaped trays
These trays cannot be used because it is difficult to adjust the feed and film tension.

- Round-bottomed trays
These trays cannot be used because labels cannot be attached to the film.

■ Filling trays

The quality of wrapping depends largely on how well the trays are filled. To maintain stable wrapping, avoid filling as in the examples below.

- Contents protruding from the tray

- Unevenly distributed contents in the tray

- Overfilled contents in the tray

■ Available Tray Size

- Width LL type 150 to 380 mm
- L type 150 to 350 mm
- Depth 127 to 244 mm
- Height 10 to 130 mm

⚠ CAUTION

Although the usable tray dimensions are as above, trays of maximum allowable value (max. width 380 mm by max. depth 244 mm) or minimum allowable value (min. width 150 mm by min. depth 127 mm) cannot be used in LL type, and trays of maximum allowable value (max. width 350 mm by max. depth 244 mm) or minimum allowable value (min. width 150 mm by min. depth 127 mm) cannot be used in L type. Depending on the shape, material, or weight of the tray, wrapping may not be possible even if it is within the allowable range. A tray should be placed in the center of the weighing platter, not on either side of the platter. Placing the tray on either side of the weighing platter may result in wrapping defects.

1.3.2 Film Types

Use the following films recommended by ISHIDA.

- A50: Width 400, 450, 500mm
- ISHIDA Wrap Super: 400, 450, 500mm

⚠ CAUTION

Use of films other than those specified by ISHIDA may cause wrapping defects. For more information on films, please contact your ISHIDA service agent.

1.4 DAILY MAINTENANCE

CAUTION

When performing daily maintenance, be sure to turn off the main power switch. The discharge heater remains hot for some time after operation. Do not touch it directly with your hand.

1

Daily maintenance is vital to ensure a prolonged use of this machine and to prevent problems and breakdowns from occurring. After work, clean the machine and its surroundings every day to keep them clean at all times.

Wipe the screen and outside plates of the machine with a dry cloth. If food residue is present, wipe it off clean with an alcohol-treated cloth. Do not use chemicals such as thinner and benzene.

Regularly clean the thermal head, label sensor, and printing roller of the label printing section. To clean these parts, dip the supplied felt-tip pen in cleaning solution and gently wipe them clean. For detailed cleaning instructions, see "Machine Cleaning" on page 1-6.

Clean the lift unit, weighing platter, and garbage tray of the infeed unit section. For detailed cleaning instructions, see "Machine Cleaning" on page 1-6.

Lift unit

Weighing platter

Garbage tray

In addition, clean the weighing areas in the infeed unit. For detailed cleaning instructions, see "Machine Cleaning" on page 1-6.

Infeed unit

Weighing platter

CAUTION

No lubrication is required for each drive unit. Do not pour water directly on the machine. Doing so may cause malfunction.

1.5 MACHINE CLEANING

This section describes how to disassemble each part, how to clean it, and how to check its operation after cleaning.

1.5.1 Precautions for Cleaning

This section describes precautions that must be followed to keep the machine clean.

CAUTION

- Be sure to turn off the main power switch before cleaning. The discharge heater remains hot for some time after operation. Therefore, make sure that the heater has cooled down before cleaning.
- Personnel cleaning the machine should tie up long hair, wear a hat, and wear appropriate clothing and shoes.
- Be sure to wash your hands and wear hygienic gloves before cleaning work.
- Wet the cloth with a neutral detergent and wring it thoroughly before use.
- Be sure to sterilize areas that come in direct contact with food or trays by spraying them with alcohol (80 vol%).
- If the numeric keypad becomes dirty during use, clean it accordingly and use the keypad cover.

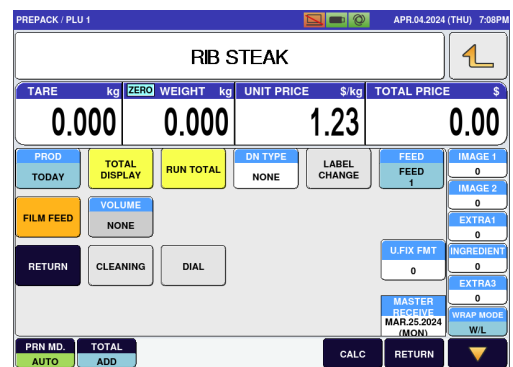

1.5.2 Disassembly and Cleaning

This section describes how to clean each part of the machine following the disassembly procedure.

1. Touch [CLEANING] from the pop-up function [Δ] on the screen.

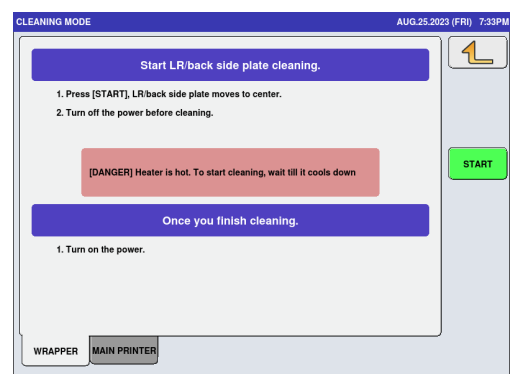

The cleaning mode screen is displayed.

2. Touch [START] on the cleaning mode screen.

When the cleaning mode is executed, the lift unit and right, left, and back squeeze plates move. The discharge pusher and left, right, and back squeeze plates are released and can be moved manually.

INFORMATION

By touching [∇] you can return to the production screen.

⚠ WARNING

The discharge heater remains hot for some time after the main power is turned off. Do not allow your hand, clothing, etc. to come into contact with the machine.

- 3. Turn OFF the main power switch on the left side of the machine.**

**⚠ WARNING**

The discharge heater remains hot for some time after operation. Wait at least about 30 minutes and make sure that the heater has cooled down before cleaning.

- 4. Clean the heater guard.**

Lift the heater guard and wipe it clean using a cloth. If food residue is present, wipe it clean using an alcohol-treated cloth.

- 5. Clean the tray presser.**

If the back of the tray presser is dirty, wipe it clean using a cloth. If food residue is present, wipe it clean using an alcohol-treated cloth.

**⚠ CAUTION**

When moving the left and right squeeze plates, be careful not to get your hands caught between the plates.

- 6. Clean the left and right squeeze plates.**

Pull out the left and right squeeze plates inward and wipe them clean using a cloth. If food residue is present, wipe it clean using an alcohol-treated cloth. After wiping, move the left and right squeeze plates to their original positions.

- 7. Clean the weighing platter.**

Remove the weighing platter and rinse it with water or wipe it clean using a cloth. If food residue is present, wipe it clean using an alcohol-treated cloth.

8. Clean the garbage tray.

Remove the garbage tray and rinse it with water or wipe it clean using a cloth.
If food residue is present, wipe it clean using an alcohol-treated cloth.

CAUTION

When installing the lift unit, be careful not to bump it against the surrounding areas.

9. Clean the lift unit.

Remove the lift unit and rinse it with water. Spray alcohol onto the lift detachable part.

Detaching the lift unit.

1. Pull up the lock lever of the lift unit in the direction of the arrow to release it.
2. Slide the lift unit to the back and remove it.

1.5.3 Assembly

This section describes the assembly procedure for each part.

CAUTION

Rinse the lift unit with water and thoroughly dry it before installation.

CAUTION

When installing the lift unit, be careful not to bump it against the surrounding areas.

1. Install the lift unit.

1. Install the lift unit so that it is horizontal with the wrapper and slide it toward you.

After installing the lift unit, check that the mounting pin is attached to the lock on the lift unit by viewing the lift unit from above, and that there is no rattling when moving the lift unit back and forth.

2. Spray alcohol after installation.

2. Install the garbage tray.

CAUTION

When installing the weighing platter, be careful not to bump it against the surrounding areas.

Rinse the weighing platter with water and thoroughly dry it before installation.

3. Mount the weighing platter.

Insert the weighing platter into the mounting area of the infeed unit.

1.5.4 Cleaning the Cutter Unit (Linerless)

This section describes the procedure for cleaning the cutter unit.

To maintain clear printing and normal label issuance and cutting, be sure to turn off the main unit power after completing daily work before cleaning. In addition, be sure to clean any dirt or label adhesion along the label path other than in the areas described below.

The platen rollers (2 locations) are specially treated, so never use organic solvents such as alcohol or water on the rollers. If used incorrectly, the platen rollers may deteriorate, causing problems during label transfer. If used incorrectly, the platen rollers may deteriorate and cause problems during label transport. If dirt adheres to the platen roller, wipe it dry with the attached yellow cloth.

Platen rollers

1. Open the printer cover A.

2. Open the latch and open printer cover B.

WARNING AVERTISSEMENT

Keep hands away from cutting parts.
Gardez les mains loin des pièces coupantes.

Remove glue from the cutter using a cotton swab and approved cleaner.

Elimine el pegamento del cortador con un palillo de algodón con un limpiador aprobado.

⚠ WARNING

When raising the upper blade to the cleaning position or when removing dirt, be careful not to let your fingers touch the blade.

3. Clean the cutter (upper blade).

- 3-1 Push in the knob of the upper blade with your thumb and raise the upper blade to the cleaning position.
- 3-2 Apply cleaner to the attached cotton swab and remove any dirt from the tip, front, and back of the blade with the cotton swab.

**⚠ WARNING**

When removing dirt from the lower blade or when returning the upper blade to its home position, be careful not to let your fingers touch the blade.

4. Clean the cutter (lower blade).

Apply cleaner to the attached cotton swab and remove any dirt from the tip, front, and back of the blade with the cotton swab.

After cleaning, return the upper blade to its home position.

**5. Push up the head release lever.**

6. Clean the thermal head.

Apply cleaner to the attached white cloth and remove any dirt from the thermal head and the plate area where the label comes in contact with it.

CAUTION

Be careful not to use too much force when wiping the guides. If the guide position becomes misaligned, the guide must be readjusted.

7. Clean the label rollers and label guides.

Apply cleaner to the attached white cloth and remove any dirt from the label rollers and label guides.

8. Push down the head release lever.

CAUTION

Make sure the cutter (upper blade) has returned to its home position. Closing the printer cover before it has returned to its home position may damage the cutter.

9. Close printer covers B and A and secure them with the latch.

1.5.5 Operation Check

This section describes the operation check procedure after cleaning is completed.

1. Turn on the main power switch on the left-side of the machine.

The "Confirm the return to original position" message is displayed on the touch-panel.

It takes about a minute for this message to appear.

WARNING

The discharge heater will become hot. Do not allow your hand, clothing, etc. to come into contact with the machine. Failure to do so may result in burns.

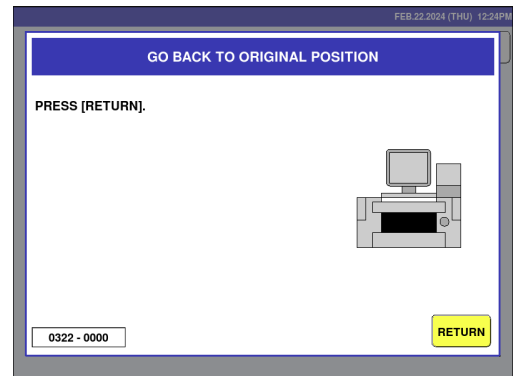

2. Touch [RETURN] on the "GO BACK TO ORIGINAL POSITION" screen.

RETURN

The conveyor and lift return to their original positions and the initial screen is displayed.

The time confirmation screen is then displayed.

Touch [CONFIRM] to display the production screen.

WARNING

Do not put your hand(s) or other objects inside the wrapper during return-to-original operation.

3. Press the [ZERO] stroke key.

Zero adjustment of the weighing unit is executed and "ZERO" is displayed in the zero-display field after adjustment.

4. Perform weighing check.

Although it depends on how often the machine is used, perform a startup inspection using the provided test weight once a day.

5. Press the [FEED] stroke key.

A label is issued.

6. Press the emergency stop switch.

7. Clean up any debris that has fallen on the floor with a mop.

8. Release the emergency stop switch.

1.6 OPERATION START / END

This section describes the procedures for starting and ending the operation of the wrapper.

1.6.1 Starting Operation

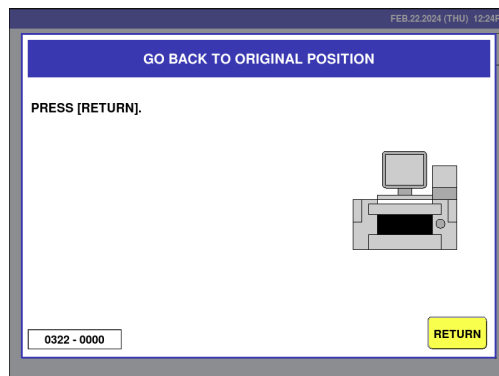

The discharge heater section becomes hot and may cause burns. Do not allow your hand(s) or clothing to touch the main unit.

1. Touch [RETURN] on the "GO BACK TO ORIGINAL POSITION" screen.

The conveyor and lift return to their original positions and the initial screen is displayed. The time confirmation screen is displayed.

Do not put your hand(s) in the wrapper while it is returning to its original position.

2. When performing wrapping work, lower the safety guard to the guard release position.

1

1.6.2 Ending Operation

WARNING

The discharge heater remains hot for some time after the main power is turned off. Do not allow your hands, clothing, etc. to come in contact with the heater. There is a risk of burns.

- 1.** Make sure that there are no items or other objects on the infeed unit or wrapper, and then turn off the main power switch.

- 2.** Lift the safety guard to guard position.

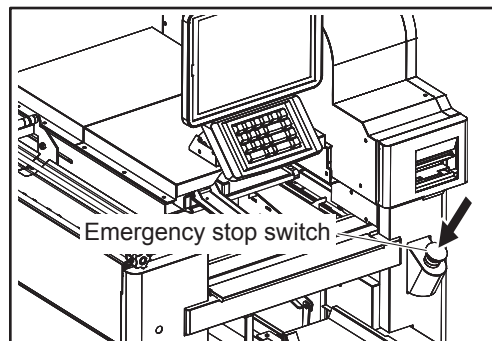

1.7 FILM LOADING / REPLACEMENT

This section describes how to set and replace the film. Make sure you fully understand the procedure before setting the film.

1.7.1 Film Loading

1. Press the emergency stop switch.

2. Open the film cover.

CAUTION

Do not wind the film in the wrong direction. Doing so may cause a malfunction.

3. Place the film roll on the roll holder.

i
INFORMATION

If a tray with a short depth dimension falls over when discharged, change the film fixing position. Shift the end face of the film roll to the position marked with "(2)" on the roll holder.

4. Adjust the film guide on the front side of the device.

Loosen the film guide fixing screws and slide the guide so that the end face of the roller is aligned with the end face of the film roll.

1

5. Adjust the film guides located at the back of the device.

Loosen the film guide fixing screws and slide the guide so that the end face of the roller is aligned with the end face of the film roll.

CAUTION

Pull the film through to the position where it will be pressed when the film presser is lowered.

6. Lift the film presser and pass the film through.

7. Spread the film to the full film width to avoid wrinkles, then lower the film presser and close the film cover.

8. Release the emergency stop switch.

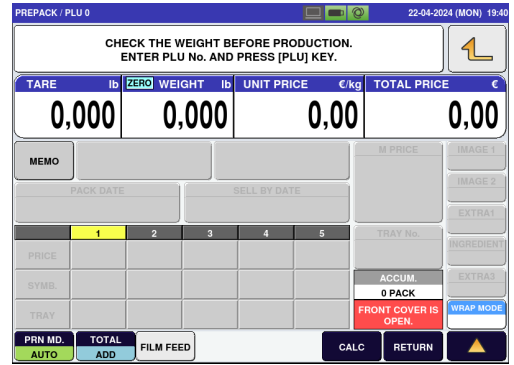

REFERENCE

If the film is not feeding properly, check that the film is not wound around the film loading section. If the film is rolled around the film roller, remove the film by referring to "Removing Film Wrapped Around Roller" on page page 1-24.

9. Touch [FILM FEED] on the initial screen.

1

10. Press the emergency stop switch on the front panel.

11. Remove the film on the wrapper.

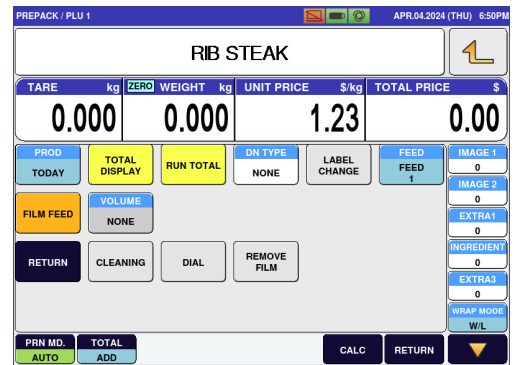

12. Release the emergency stop switch.

1.7.2 Film Replacement (Film Width Change)

1. Touch [REMOVE FILM] from the pop-up function [Δ] on the screen.

2. Press the emergency stop switch on the front panel.

3. If there is a film on the wrapper, remove the film as shown in the figure on the right.

4. Remove the film roll that has been used.

5. Open the film cover.

CAUTION

Do not wind the film in the wrong direction. Doing so may cause a malfunction.

6. Place the film roll on the roll holder.

i
INFORMATION

If a tray with a short depth dimension falls over when discharged, change the film fixing position. Shift the end face of the film roll to the position marked with "(2)" on the roll holder.

7. Adjust the film guide on the front side of the device.

Loosen the film guide fixing screws and slide the guide so that the end face of the roller is aligned with the end face of the film roll.

8. Adjust the film guides located at the back of the device.

Loosen the film guide fixing screws and slide the guide so that the end face of the roller is aligned with the end face of the film roll.

CAUTION

Spread the film to the full film width to avoid wrinkles, then lower the film presser and close the film cover.

9. Lift the film presser and pass the film through.

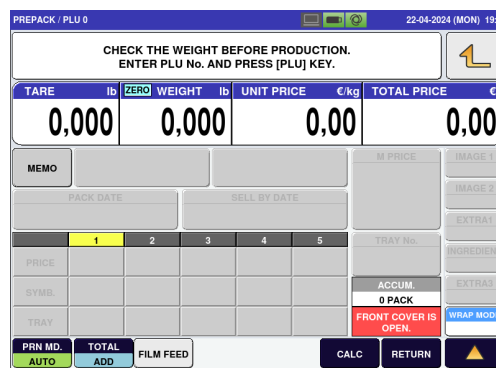

10. Spread the film to the full film width to avoid wrinkles, then lower the film presser and close the film cover.

11. Release the emergency stop switch.

12. Touch [FILM FEED] on the initial screen.

REFERENCE

If the film is not feeding properly, check that the film is not wound around the film loading section. If the film is rolled around the film roller, remove the film by referring to "Removing Film Wrapped Around Roller" on page page 1-24.

13. Press the emergency stop switch on the front panel.

14. Remove the film on the wrapper.

15. Release the emergency stop switch.

1.7.3 Removing Film Wrapped Around Roller

1. Press the emergency stop switch on the front panel.

2. Remove the rubber cap on the left side of the front panel of the machine and open the film cover.

When the rubber cap is removed, you can access the bolt for rotating the feed roller.

3. Push in the lever and unlock the film presser. Then lift the film presser.

CAUTION

Be careful not to touch the film cutter when removing the film.

CAUTION

Be sure to remove the film using the provided handle and your hands. Never use a knife or other cutting instrument for removal as it may cause damage or malfunction.

4. Using the provided film removal handle, remove the film rolled around the roller by turning the feed roller rotation bolt clockwise while grasping the rolled film.

REFERENCE

If the film needs to be reloaded, see "Film Loading" on page 1-17.

⚠ CAUTION

When unlocking the film presser by pressing the lever, be sure to do so while supporting the film presser with your hand. Failure to do so may cause the film presser to move down suddenly and pinch your hand, possibly resulting in injury.

- 5. Push in the lever and unlock the film presser. Then lower the film presser.**

- 6. Release the emergency stop switch.**

1.8 LABEL SETTING (WITH LINER)

This section describes how to set labels. Make sure that you fully understand the procedure before setting.

1. Open the printer cover B and printer cover A in this order.

2. Push down the lever labeled "LOWER" in the right picture to open the printer unit.

3. Push up the head release lever.

4. Set the label roll.

NOTE

Be sure to pass the labels through the sensor (3).

5. Pass the label through.

Pass the labels through from (1) to (6) in order as shown in the figure on the right.

6. Secure the tip of the label liner with the liner stopper and gently turn the label take-up bobbin clockwise.

7. Align the left edge of the label with the edge of the lower guide plate.

8. Return the head release lever to the original position.

- 9.** Push up the "LOWER" lever to close the printer unit.

- 10.** Close the printer cover A and printer cover B in this order.

- 11.** Press the [FEED] stroke key continuously until the label comes up.

The label is issued, and the peeling position is determined.

Press the [FEED] stroke key continuously until the label is completely peeled off.

Note:

Check that the liner is rolled up smoothly. If the label is wound diagonally, recheck the way the label is threaded and the position where the label is stopped by the liner stopper.

1.9 LABEL SETTING (LINERLESS)

This section describes how to set labels. Make sure that you fully understand the procedure before setting.

1. Open the printer cover A.

2. Open the latch and open printer cover B.

3. Push up the head release lever.

4. Set the label roll.

5. Pass the label through.

Pass the labels through from (1) to (3) in order as shown in the figure.

6. Align the left edge of the label with the edge of the lower guide plate.

7. Push down the head release lever.

8. Cut off the excess label.

- 9.** Close printer covers B and A and secure them with the latch.

**REFERENCE**

If the printing on the label is misaligned or the label is printed in a meandering manner, feed the label several times.

- 10.** Press the [FEED] stroke key.

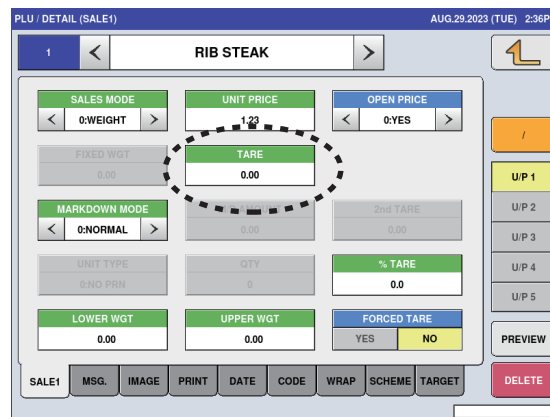

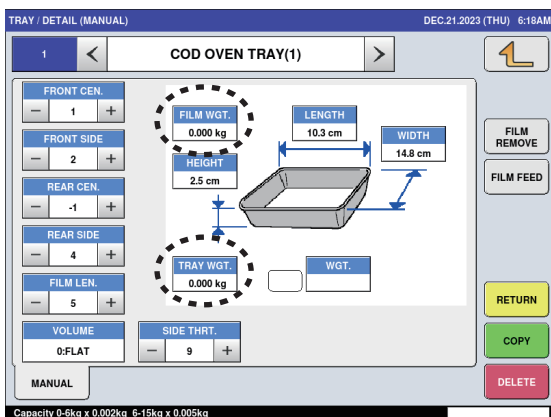

A label is issued and automatically cut out.

1.10 DEFINITION OF TARE WEIGHT

What is Tare Weight?

The gross weight of a pack item is composed of the net weight of the item, and the weight of decorative ornaments effective for promoting the deliciousness of food, the weight of seasoning such as soy sauces that are attached to the item, and the weight of the film and tray.
All weights other than the net weight of the item is collectively called tare weight.

In order to calculate the net weight of the item, this machine handles the tare weight as follows.
The gross tare weight will be displayed when the item is called on the normal screen.

- Even when the tray size has been changed for the same commodity item, the net weight can be automatically calculated by registering the tare data in two locations.
- The tare weight displayed is different when "WRAP/PRICE" is selected and when "PRICE" is selected.

WRAP MODE
W/L → Tare weight = Tray weight + Insert weight

WRAP MODE
LABEL → Tare weight = Gross tare weight = (Tray weight + Film weight) + Insert weight

CHAPTER 2

BASIC OPERATIONS

2.1 PRODUCTION MODE SCREEN

2.1.1 Display Fields on Initial Screen

Screen for Weighing Items

The screenshot shows the weighing interface for 'RIB STEAK'. The top status bar displays 'PREPACK / PLU 1' and the date 'APR.04.2024 (THU) 6:50PM'. The main display area shows 'RIB STEAK' with a 'ZERO' indicator. Below this, a table displays 'TARE' (0.000 kg), 'WEIGHT' (0.000 kg), 'UNIT PRICE' (\$/kg: 1.23), and 'TOTAL PRICE' (\$: 0.00). A 'MEMO' field is present. The 'PACK DATE' is APR.04.2024 and 'SELL BY DATE' is APR.05.2024. A price table shows 'PRICE' at \$ 1.23. The 'TRAY No.' is 1, and the 'ITEM' is '1:COD OVEN TRAY'. The 'W/L' button is labeled 'WRAP MODE'. The bottom status bar shows 'Capacity 0-6kg x 0.002kg 6-15kg x 0.005kg'. Labels on the right side include: Image 1 number (0), Image 2 (0), POP number (0), EXTRA1 (0), INGREDIENT (0), EXTRA3 (0), and W/L (WRAP MODE).

Labels on the left side include: Zero ("ZERO" is displayed when the zero point of the weighing unit is adjusted.), Tare (0.000), Pack date (APR.04.2024), Tray number (1), Symbol (0001), Price list (\$ 1.23), Sell by date (APR.05.2024), Weight (0.000 kg), Item name (RIB STEAK), Unit price (\$/kg: 1.23), Total price (\$: 0.00), and Internal clock (APR.04.2024 (THU) 6:50PM).

Labels on the right side include: Image 1 number (0), Image 2 (0), POP number (0), EXTRA1 (0), INGREDIENT (0), EXTRA3 (0), Displays the wrapping mode. Touching this button to change the mode. (W/L), Tray name (1:COD OVEN TRAY), and Markdown price (M PRICE).

Screen for fixed price items

The screenshot shows the fixed price interface for 'GROUND BEEF 70% LEAN / 30% FAT'. The top status bar displays 'PREPACK / PLU 100' and the date 'APR.17.2023 (SUN) 10:42PM'. The main display area shows 'GROUND BEEF 70% LEAN / 30% FAT'. Below this, a table displays 'PCS' (1), 'MANUAL WT' (lb), 'FIXED PRICE' (\$: 4.79), and 'TOTAL PRICE' (\$: 4.79). A 'MEMO' field is present. The 'PACK DATE' is APR.04.2024 and 'SELL BY DATE' is APR.05.2024. A price table shows 'PRICE' at \$ 4.79. The 'TRAY No.' is 1, and the 'ITEM' is '1:COD OVEN TRAY'. The 'W/L' button is labeled 'WRAP MODE'. The bottom status bar shows 'Capacity 0-6kg x 0.002kg 6-15kg x 0.005kg'. Labels on the right side include: Image 1 number (0), Image 2 (0), EXTRA1 (0), INGREDIENT (0), EXTRA3 (0), and W/L (WRAP MODE).

Labels on the left side include: Quantity per package (1), Pack date (APR.04.2024), Tray number (1), Symbol (1), Price list (\$ 4.79), Sell by date (APR.05.2024), and Fixed weight (lb).

Labels on the right side include: Fixed price (\$: 4.79), Image 1 number (0), Image 2 (0), EXTRA1 (0), INGREDIENT (0), EXTRA3 (0), Displays the wrapping mode. Touching this button to change the mode. (W/L), Tray name (1:COD OVEN TRAY), and Markdown price (M PRICE).

2.1.2 Touch Keys on Initial Screen

Screen for Weighing Items

Displays the label printing content screen when touched. (See page 3-14)

Displays the main menu.

Displays the zero status of the weighing unit.

Displays the memo preset PLU screen. (See page 3-4)

Main function keys for information on useful features of function keys, see page 3-15.

Touch after entering a numerical value to change the data. Touching without entering a numerical value will display the pack/sell by date & time setting screen. (See page 3-12)

Touch this button after entering a numerical value to change the data. Touching without entering a numerical value will display the tray list screen. (See page 3-9)

Touch this button after entering a numerical value to change the data. Touching without entering a numerical value will display the markdown price input screen. (page 3-11)

Displays the production subtotal.

Numeric function keys For information on useful features of function keys, see page 3-15.

Touching without entering a numerical value will display the tray list screen. (See page 3-9)

Screen for Fixed Price Items

Touch this button after entering a numerical value to change the data. Touching without entering a numerical value will display the fixed price symbol list screen. (See page 3-10)

Touch this button after entering a numerical value to change the data.

2.2 WEIGHING, WRAPPING, LABELING

The WM-MICRO can perform weighing, wrapping, and labeling tasks, as well as perform these independent tasks for specific commands.

2.2.1 Weighing, Wrapping, Labeling

Example: Perform weighing, wrapping and the manual labeling for RIB STEAK registered as commodity item call number 1.

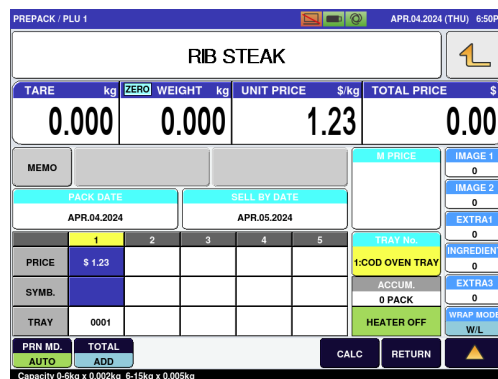

CAUTION

Touch the touch-panel lightly with your finger. Pressing the panel with a fingernail, mechanical pencil, or other pointed object may damage the touch-panel.

1. Enter the commodity item call number on the initial screen.

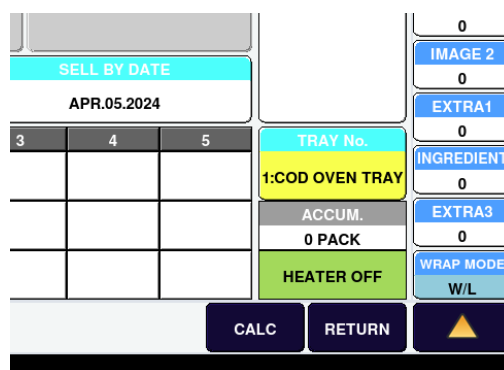

Commodity item data such as item name "RIB STEAK" and unit price is displayed on the screen. Check price conditions such as price and place of origin.

2. Change the wrapping mode display to [W/L].

Each time the function key is touched, the mode changes in the order of [W/L], [LABEL], [WRAP] and returns to [W/L].

CAUTION

If the tray to be used is not listed in the table, enter the tray call number into the table.

Touch the blank field.

INFORMATION

Make sure that the tray is placed in the center of the weighing platter. If the tray is not centered on the weighing platter, it may not be wrapped correctly.

WARNING

Once the commodity item is placed on the weighing platter, do not touch it with your hand(s). With the commodity item in place, the infeed bar of the infeed unit will automatically start moving, which may cause your hand(s) to get caught.

3. Confirm that the tray call number to be used for labeling is registered in the price list.

This operation is only necessary before the tray to be used is determined. For the following operations, there is no need to be aware of the tray call number.

PACK DATE		SELL BY DATE	
APR.04.2024		APR.05.2024	
	1	2	3
PRICE	\$ 1.23		
SYMB.			
TRAY	0001		
PRN MD.	TOTAL		
AUTO	ADD		
Capacity 0-6kg x 0.002kg 6-15kg x 0.005kg			

4. Place the commodity item packed in the tray in front of the center of the weighing platter.

5. Pass commodity items through the machine in succession.

Weighed and packaged items are discharged from the machine.

6. Attach the issued label to the commodity item.

2.2.2 Wrapping Only

Example: Perform wrapping only for "RIB STEAK" registered as commodity item call number 1.

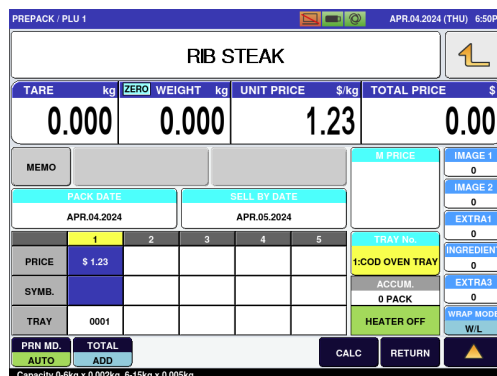

CAUTION

Touch the touch-panel lightly with your finger. Pressing the panel with a fingernail, mechanical pencil, or other pointed object may damage the touch-panel.

1. Enter the commodity item call number on the initial screen.

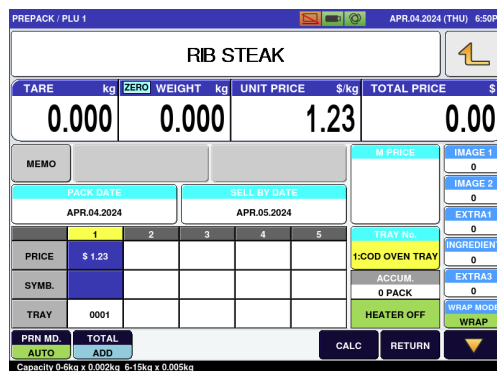

Commodity item data such as item name "RIB STEAK" and unit price is displayed on the screen.

2. Change the wrapping mode display to [WRAP].

Each time the function key is touched, the mode changes in the order of [W/L], [LABEL], [WRAP] and returns to [W/L].

Make sure that the tray is placed in the center of the weighing platter. If the tray is not centered on the weighing platter, it may not be wrapped correctly.

3. Place the commodity item packed in the tray in front of the center of the weighing platter.

WARNING

Once the commodity item is placed on the weighing platter, do not touch it with your hand(s). With the commodity item in place, the infeed bar of the infeed unit will automatically start moving, which may cause your hand(s) to get caught.

4. Pass commodity items through the machine in succession.

Weighed and packaged items are discharged from the machine.

2.2.3 Labeling Only (Manual)

Example: Perform manual labeling only for "RIB STEAK" registered as commodity item call number 1.

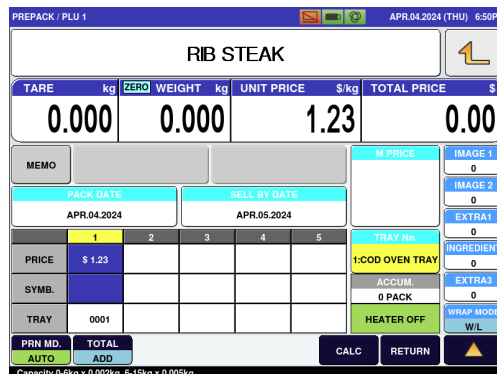

CAUTION

Touch the touch-panel lightly with your finger. Pressing the panel with a fingernail, mechanical pencil, or other pointed object may damage the touch-panel.

1. Enter the commodity item call number on the initial screen.

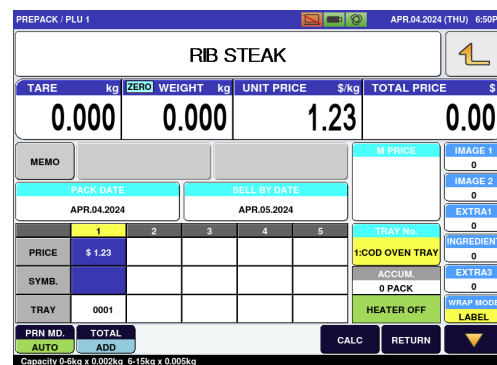

Commodity item data such as item name "RIB STEAK" and unit price is displayed on the screen.

2

2. Change the wrapping mode display to [LABEL].

CAUTION

If the tray to be used is not listed in the table, enter the tray call number into the table.

Touch the blank field.

3. Specify the tray to be used for tare weight subtraction.

Check price conditions such as price and place of origin.

4. Place a pre-wrapped commodity item on to the weighing platter.

The commodity item is weighed, and the label is issued.

Manually attach the issued label to the commodity item picked up from the weighing platter.

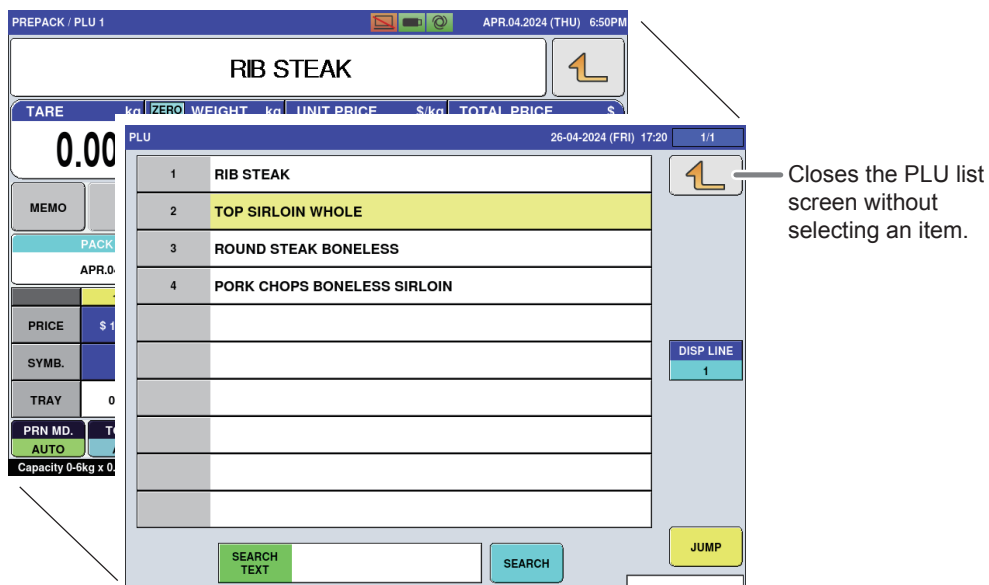

CHAPTER 3

USEFUL FUNCTIONS

3.1 CALLING ITEM DATA FROM DISPLAYED LIST

If you do not clearly remember the item number but you remember that the item number is somewhere around item number "15" for example, you can select it from the displayed item name list showing item names before and after the selected item number.

Example: Call up the item number of "ROUND STEAK BONELESS" that you do not remember clearly from the product list.

INFORMATION

If the item that you want to call up is not displayed on the screen, touch (△) or (▽) to switch pages.

1. Enter the item number that is approximately you guess and touch [PLU No.].

A list of nearby item names corresponding to the entered item number will be displayed.

INFORMATION

The desired item can also be called up by touching [PLU] after entering a numerical value.

2. Touch the "ROUND STEAK BONELESS" display field.

The system automatically returns to the production screen and displays the selected item data.

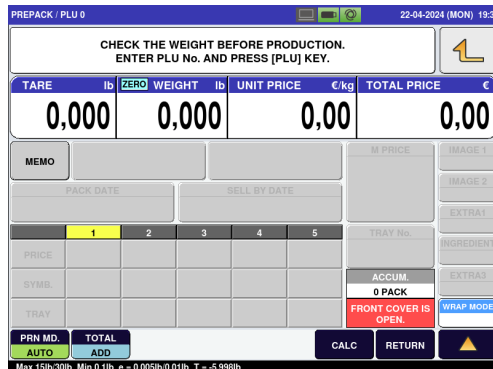

3.1.1 Searching and Calling Items

The desired item name can also be called up from among registered items by searching for the name using the character string contained in the item name as a keyword.

1. Touch [PLU No.].

PLU No.
0

The production (item list) screen is displayed.

2. Touch the search text field.

SEARCH TEXT

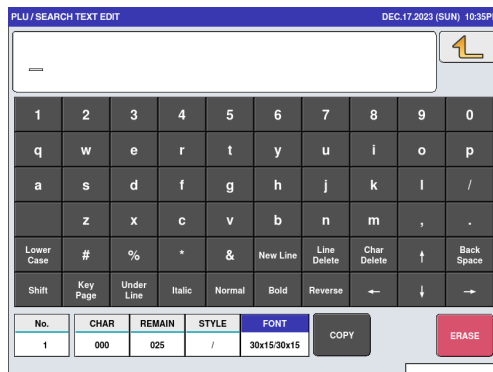

The character input screen is displayed.

3. Enter the character string you want to search and touch the Return button.

The system returns to the production (item list) screen.

4. Touch [SEARCH] on the production (item list) screen.

SEARCH

A list of items containing the entered character string is displayed.

INFORMATION

For information on how to enter characters, see "Character Entry Method" on page 4-55.

3.2 CALLING ITEM DATA WITH MEMO PRESET KEYS

By registering frequently called items to the memo preset keys in advance, smooth operation can be achieved.

Displays the MEMO PRESET screen.

Switches the memo preset list page.

- ▲ : Previous page
- ▼ : Next page

Pressing an item name that does not fit in the display area will cut off the first digit and display it.

Press to switch modes.

Stops operation of each mode and returns to the production screen.

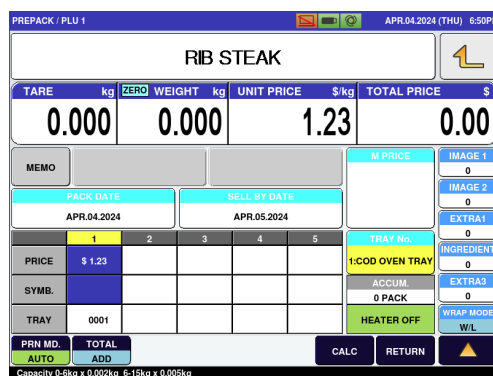

3.2.1 Registering Memo Preset Keys

Example: Register the selected “RIB STEAK” whose call number is “1” in the memo preset key.

1. Touch [MEMO] on the screen where the item you want to register is selected.

The MEMO PRESET screen is displayed.

2. Touch [SET].

The memo preset registration mode screen is displayed.

CAUTION

Touching a pre-registered memo preset key overwrites the data.

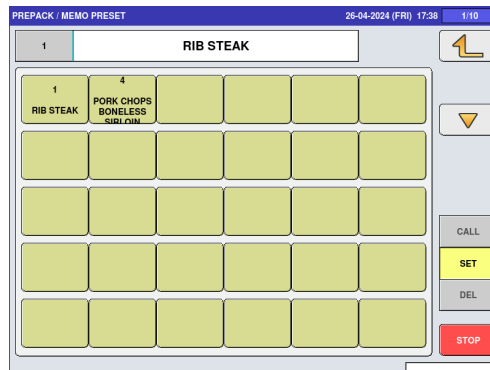

The memo preset key can also be registered by touching the memo preset key after entering a numerical value.

3. Touch the memo preset key at the location you want to register.

The memo preset key has been registered.

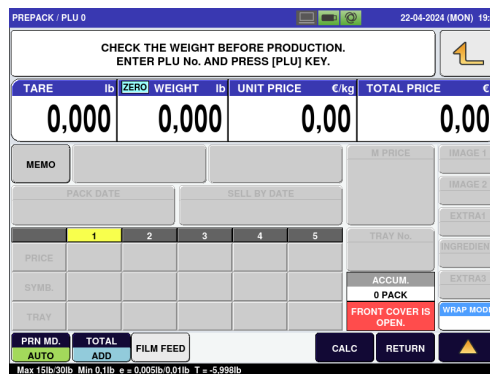

3.2.2 Calling Items by Using Memo Preset Key

Example: Use the memo preset key to call up "RIB STEAK".

1. Touch [MEMO].

The PREPACK/MEMO PRESET screen is displayed.

2. Touch the memo preset key where "RIB STEAK" is registered.

The system automatically returns to the production screen and displays the selected item data.

3.3 CHANGING AND ADDING ITEM DATA

If you want to change some of the item data registered during work, please follow the procedure below. This section describes how to perform unit price (fixed price) changes, tray changes, additions, and discounts.

3.3.1 Changing Unit Prices

Example: Change the current unit price to \$2.00.

1. Enter the unit price you want to change using the numeric keypad on the screen where the product is selected.

The numerical value "200" is displayed in the field.

INFORMATION

You can also change the unit price by touching the unit price field after entering a numerical value using the numeric keypad.

2. Press the [UNIT PRICE] stroke key.

The unit price has been changed.

INFORMATION

For fixed price items, touch [FIXED PRICE].

- If you want to change the unit price item to a fixed price item, touch [FIXED PRICE] after entering the fixed price.

(If you want to change the unit price to the list price as it is, you do not need to enter a numerical value)

- If you want to change from the fixed price item to a unit price item, touch [UNIT PRICE] after entering a numerical value.

(If you want to change the fixed price to a unit price as it is, you do not need to enter a numerical value)

3.3.2 Entering Tray Numbers in Tray Field of Price List

Each tray is numbered, and information such as tray name, size, and weight is managed for each number. Up to 5 tray numbers can be registered in the price list. Trays are automatically recognized from the price list data, so all trays that can be used with the called product must be registered in advance. (Wrapper only)

Example: Enter tray number "3" in price list 3.

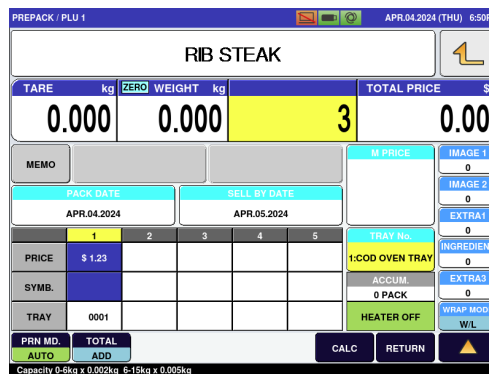

REFERENCE

See "Tray Registration" on page 4-16.

1. Enter tray number "3" on the screen where the item is selected.

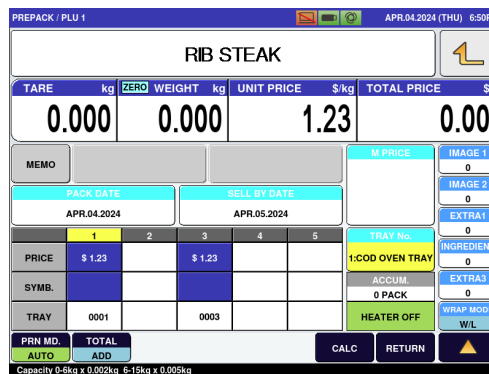

The value "3" is displayed in the field.

If you do not enter a unit price (or fixed price) after entering the tray number, refer to the selling price in Price 1 (on the left side of the price list).

2. Touch the tray field in price list 3.

3.3.3 Entering Selling Prices in Price Field of Price List

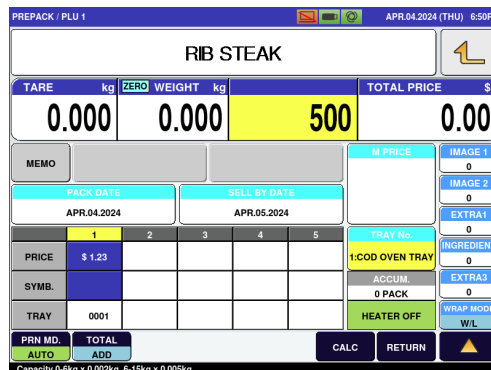

By registering unit prices and fixed prices in the price list in advance, it is possible to operate using two different prices.

Example: Enter "Fixed price \$5.00" in price list 3.

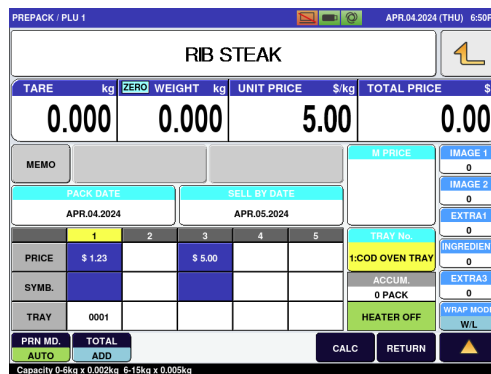

1. Enter "500" on the screen where the item is selected.

The value "500" is displayed in the field.

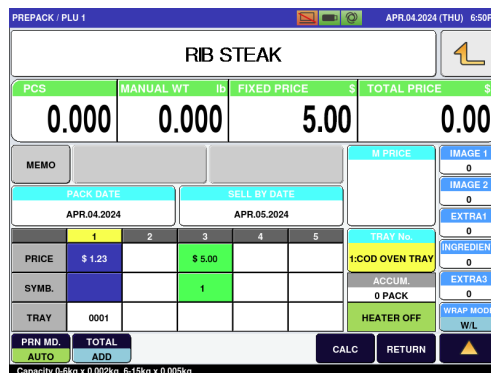

2. Touch the price field in price list 3.

3. Touch [FIXED PRICE] to switch to the fixed price screen.

The "kg" display disappears, and the fixed price appears.

INFORMATION

When entering a numerical value, setting is made in the weighing mode (unit price or fixed price) registered in price list 1.

3.3.4 Changing Trays on Tray List Screen

This section describes how to change the tray on the tray screen if you do not know the tray number you want to use.

Closes the tray screen without selecting a tray.

No.	TRAY NAME	LENGTH(cm)	WIDTH(cm)	HEIGHT(cm)	TARE(kg)	FILM(kg)
1	COD OVEN TRAY	15.0	9.0	2.5	0.000	0.000
2	BREVOORT TRAY	33.0	10.0	2.0	0.000	0.000
3	STANDARD TRAY	20.0	12.0	2.0	0.000	0.000
4	JUMBO TRAY	28.0	21.0	2.5	0.012	0.000
5	APFC-A17-30	20.0	17.0	3.0	0.000	0.000
6	MIC20-20	20.0	20.0	3.5	0.000	0.000
7	GHW-2217(H5)	22.0	17.0	5.0	0.000	0.000
8	APFC-L13-25	30.0	14.0	2.5	0.000	0.000
9	SGL-1813(H4)	18.0	13.0	4.5	0.000	0.000
10	CUBE15-60B	15.0	15.0	6.0	0.000	0.000

1. Displays the tray screen.

INFORMATION

If the tray that you want to call up is not displayed on the screen, touch or to switch pages.

1. Touch "TRAY" in the price list on the screen where the item is selected.

The TRAY screen is displayed.

TARE	kg	ZERO	WEIGHT	kg	UNIT PRICE	\$/kg	TOTAL PRICE	\$
0.000			0.000		1.23		0.00	

TRAY: 0001

2. Touch the display field of the tray to be used.

The system automatically returns to the production screen and displays the numerical value "1" in the tray number display field.

No.	TRAY NAME	LENGTH(cm)	WIDTH(cm)	HEIGHT(cm)	TARE(kg)	FILM(kg)
1	COD OVEN TRAY	15.0	9.0	2.5	0.000	0.000
2	BREVOORT TRAY	33.0	10.0	2.0	0.000	0.000
3	STANDARD TRAY	20.0	12.0	2.0	0.000	0.000
4	JUMBO TRAY	28.0	21.0	2.5	0.012	0.000
5	APFC-A17-30	20.0	17.0	3.0	0.000	0.000
6	MIC20-20	20.0	20.0	3.5	0.000	0.000
7	GHW-2217(H5)	22.0	17.0	5.0	0.000	0.000
8	APFC-L13-25	30.0	14.0	2.5	0.000	0.000
9	SGL-1813(H4)	18.0	13.0	4.5	0.000	0.000
10	CUBE15-60B	15.0	15.0	6.0	0.000	0.000

INFORMATION

You can also call up a tray by touching [PLU] after entering a tray number.

3.3.5 Changing Symbols for Fixed Price Items

Example: Change the quantity and symbol for a fixed price item.

1. The production (PREPACK /PLU 1) screen is displayed.

Press to close the production (PREPACK /PLU 1) screen when not selecting a fixed price symbol.

Press to select the fixed price symbol.

Press to enter the fraction.

1. Touch [PCS] on the screen of the called commodity item.

The fixed price symbol list screen is displayed.

GROUND BEEF 70% LEAN / 30% FAT						
PCS	MANUAL WT	lb	FIXED PRICE	\$	TOTAL	
1			4.79			
MEMO						M PRICE
PACK DATE			SELL BY DATE			
APR.04.2024			APR.05.2024			
PRICE	1	2	3	4	5	TRAY No.
\$ 4.79						1:COD OVEN
SYMB.	1					ACCUM.
						0 PACK

2. Enter the packing quantity and touch [SYMBOL].

Example: 5 pieces

After entering the packing quantity and symbol, the system returns to the production screen.

3.3.6 Performing Discount Processing

In addition to unit prices and fixed prices, discount prices can be pre-registered in the item data. There are six types of discount prices: markdown price, discount amount, discount rate, markdown unit price, discount unit price amount, and discount unit price rate. This section describes the discount processing method.

1. Pressing without entering a numerical value displays the markdown screen. Pressing after entering a numerical value allows you to enter a markdown price.

2. Select a markdown type button after numerical value.

Markdown price display field.

Discontinues markdown processing.

● How to discount

	Weighing item / Fixed price item
Special	<ol style="list-style-type: none"> 1 Touch [M PRICE], then the markdown screen is displayed. 2 Touching [SPECIAL] in the markdown flag selection field after entering a numerical value on the markdown screen will automatically return to the production screen and display the set markdown price.
-\$ (Discount amount)	<ol style="list-style-type: none"> 1 Touch [M PRICE], then the markdown screen is displayed. 2 Touching [-\$] in the markdown flag selection field after entering a numerical value on the markdown screen will automatically return to the production screen and display the set discount amount.
-% (Discount rate)	<ol style="list-style-type: none"> 1 Touch [M PRICE], then the markdown screen is displayed. 2 Touching [-%] in the markdown flag selection field after entering a numerical value on the markdown screen will automatically return to the production screen and display the set discount rate.
Special unit price	<ol style="list-style-type: none"> 1 Touch [M PRICE], then the markdown screen is displayed. 2 Touching [SPEC. U/C] in the markdown flag selection field after entering a numerical value on the markdown screen will automatically return to the production screen and display the set special unit price. (This setting cannot be made if the selected item is a fixed price item)
U/P- \$ (Discount unit price amount)	<ol style="list-style-type: none"> 1 Touch [M PRICE], then the markdown screen is displayed. 2 Touching [U/P -\$] on the production (markdown) screen after entering a numerical value will automatically display the production screen and show the discount unit price amount.
U/P- % (Discount unit price rate)	<ol style="list-style-type: none"> 1 Touch [M PRICE], then the markdown screen is displayed. 2 Touching [U/P -%] on the production screen after entering a numerical value will automatically display the production screen and show the discount unit price rate.

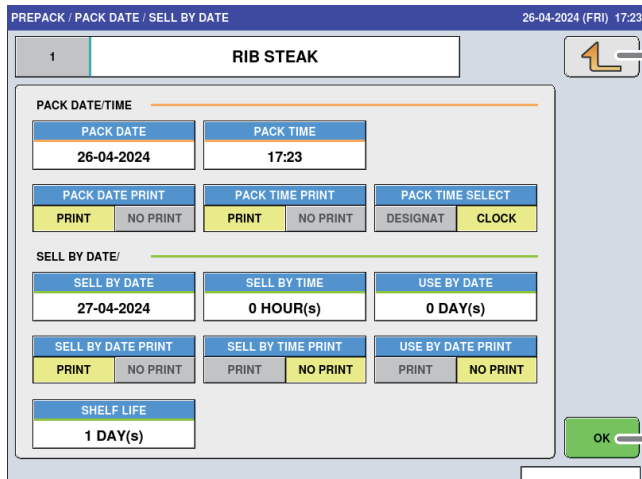

CAUTION

If the special price exceeds the usual price as a result of weighing, an error will be displayed when the label is issued.

3.4 CHANGING LABEL DATES AND TIMES

■ Pack/Sell By Date and Time Setting Screen

Touching the "PACK DATE" or "SELL BY DATE" field on the production screen will display the pack/sell by date screen.

Clears the entered data and returns to the production screen.

Sets the entered data and returns to the production screen.

INFORMATION

To change the pack date or sell by date, touch the "PACK DATE" or "SELL BY DATE" field after entering a numerical value.

1. Touch to display the pack/sell by date & time screen.

To print the pack time or sell by time, these times need to be set in advance. For details, please consult your ISHIDA dealer.

1. Pack Date

Pack date

Enter the pack date to be printed.

Pack date printing

- : Select to print the pack date.
- : Select not to print the pack date.

2. Pack Time

Pack time

Enter the time to be printed.

Pack time printing

- : Select to print the pack time.
- : Select not to print the pack time.

3. Pack Time Selection

DESIGNAT : Select to print the fixed date and time.

CLOCK : Select to print the current time.

4. Sell By Date

Sell by date

Used to change the set sell by date.

Sell by date printing

PRINT : Select to print the sell by date.

NO PRINT : Select not to print the sell by date.

5. Sell By Time

Sell by time

Enter the sell by time to be printed.
(Can be set up to 9999 hours later)
(Set as XX hours after the pack time)

Sell by time printing

PRINT : Select to print the sell by time.

NO PRINT : Select not to print the sell by time.

6. Shelf Life

Enter the shelf life.
(Can be set from 0 to 9999 days)
The entered shelf life is reflected in the sell by date.

Note:

Pack date cannot be set exceeding the sell by date.

3.5 CHECKING LABEL PRINTING CONTENT

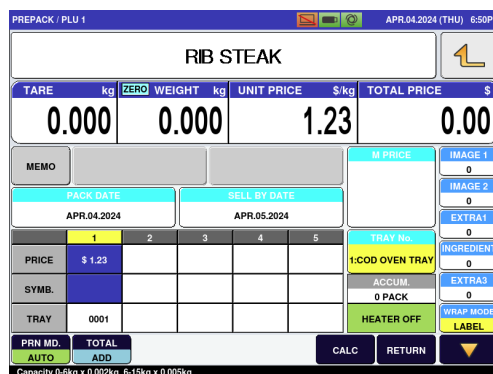

The label preview screen can be used to check if the desired items are printable.

1. Touch the "Item Name" display field on the screen where the item is selected.

RIB STEAK

The label preview screen is displayed.

2. Check for input errors or omissions in label printing items.

3. After checking, touch the Return button.

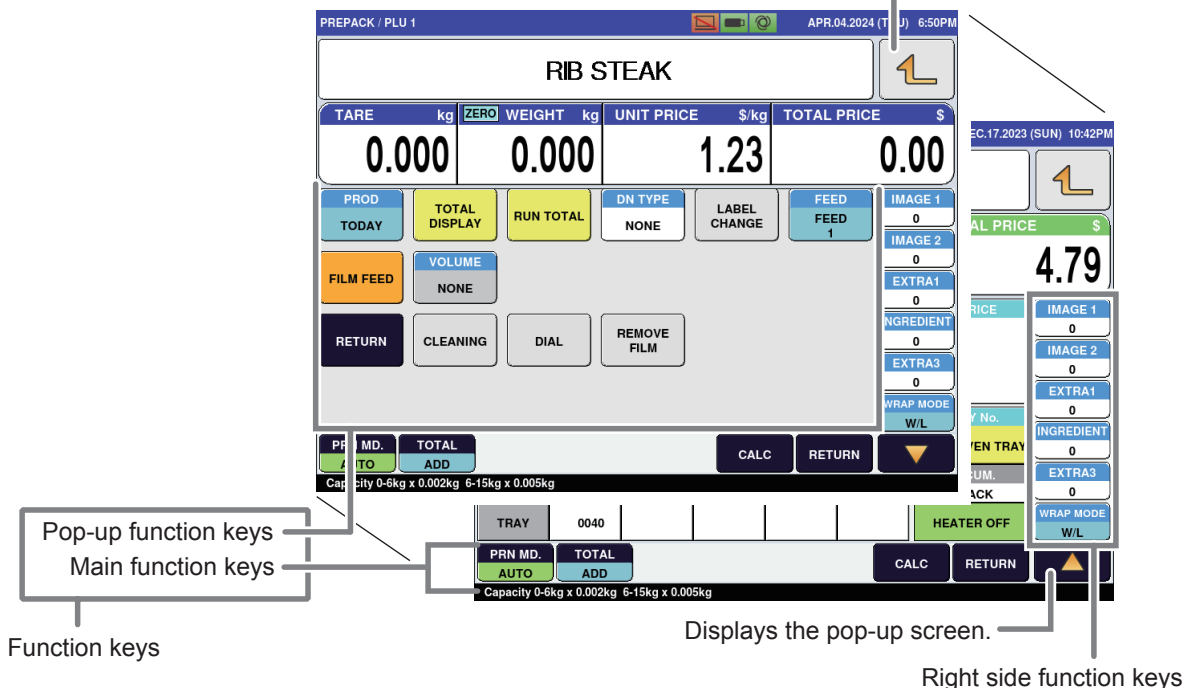

The system returns to the production screen.

3.6 USEFUL FEATURES OF FUNCTION KEYS

This section describes useful ways to use the function keys.
 Perform each operation for the selected item.
 (Function key positions may be changed by the program at the time of installation)

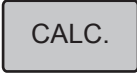

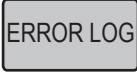

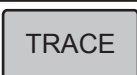

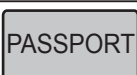

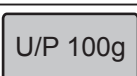

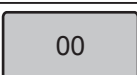

Returns to the production screen without using function keys on the pop-up screen.

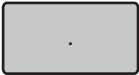

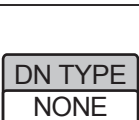

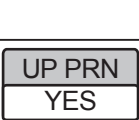

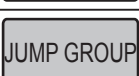

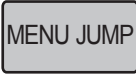

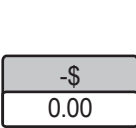

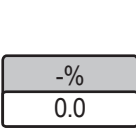

3

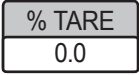

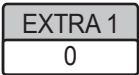

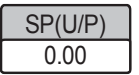

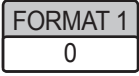

Function Key Description

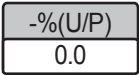

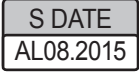

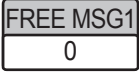

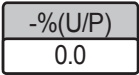

Function Key	Function and Usage
TARE	<ul style="list-style-type: none"> Recognizes the weight currently being weighed as the tare weight.

CHAPTER 4

DATA REGISTRATION

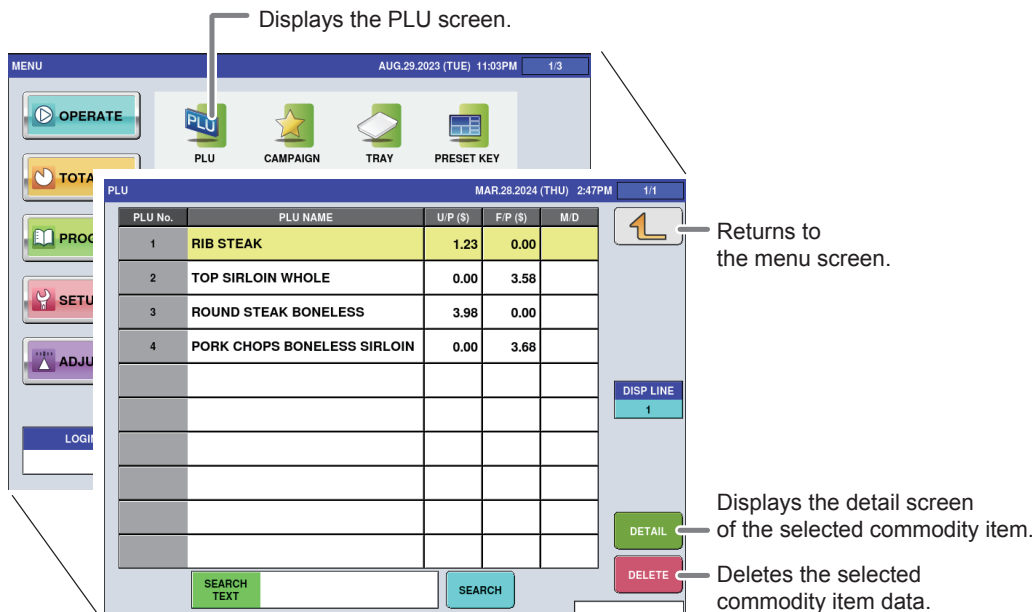

4.1 PROGRAM MENU

Registration Item	Description
PLU	Used for registering commodity item names, unit prices, fixed prices, tares, registration codes, and POP numbers. Note: Register the linked data attached to the commodity item before registering the item. ex. Extra MSG1.3...
CAMPAIGN	Used for registering campaign settings.
TRAY	Used for registering information such as tray size, tray weight, film weight and the name.
PRESET KEY	Used for registering or editing preset keys.
SCHEDULER	Used for registering schedules such as events.
STORE	Used for registering store addresses and names.
DEPARTMENT	Used for registering department names.
GROUP	Used for registering group names.
NUTRITION	Used for registering nutrition panels.
EXTRA MSG. 1, 3	Used for registering extra messages.
INGREDIENT	Used for registering settings for frequently used component names.
COUPON MSG.	Used for registering coupon messages.
POP MSG.	Used for registering POP messages.
SCHEME TABLE	Used for registering scheme tables to be used for traceability.
GEN TABLE	Used for registering Gen tables to be used for traceability.
LOOKUP TABLE	Used for registering lookup tables to be used for traceability.
MINCE TRACE.	Used for registering information on the traceability of mincemeat.
FIX PRI. SYMBOL	Used for registering fixed price symbol names.
FREE MSG. 1-15	Used for registering up to 15 free messages.
CHECK LABEL	Used for checking labels.
NUTRITION TEXT	Used for registering nutrition texts.

4.2 PLU REGISTRATION

The name of a commodity item and data related to the commodity item (unit price, fixed price, tare weight, registration code, POP call number, etc.) can be registered. Select the commodity item field on the commodity PLU list screen and register the commodity item data. To register commodity item data, follow the procedure below.

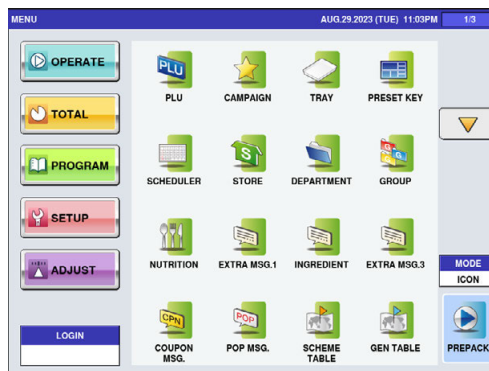

4

1. Touch [PLU] on the menu screen.

The commodity PLU list screen is displayed.

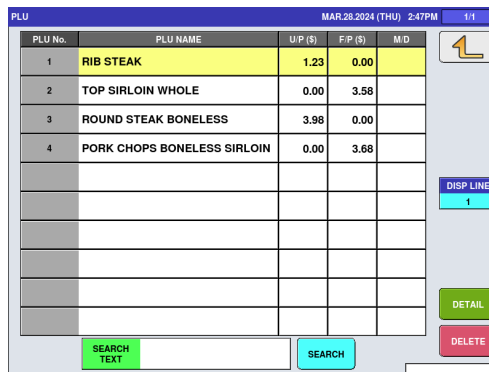

2. Enter the commodity item call number.

Example: Call number 1

Up to 8 digits (1 to 99999999) can be entered for a commodity item call number.

The price/tare screen for commodity item data registration is displayed.

REFERENCE

To edit the registered campaign data, touch the field of the campaign data you want to edit and touch [DETAIL]. Touching [DELETE] will delete the data.

REFERENCE

The commodity item data registration screen consists of multiple screens. Touch one of the tabs at the bottom of the screen to switch screens and register each item.

4.2.1 PLU Detail (SALE 1) Registration

Switches to the commodity item corresponding to the set number.

Displays the input screen for product names.

Saves the commodity item data and returns to the PLU list screen.

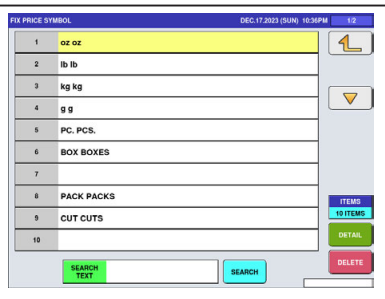

Switches unit price numbers.

Deletes the called commodity item data. (The called unit price data is deleted except in the case of Unit Price 1.)

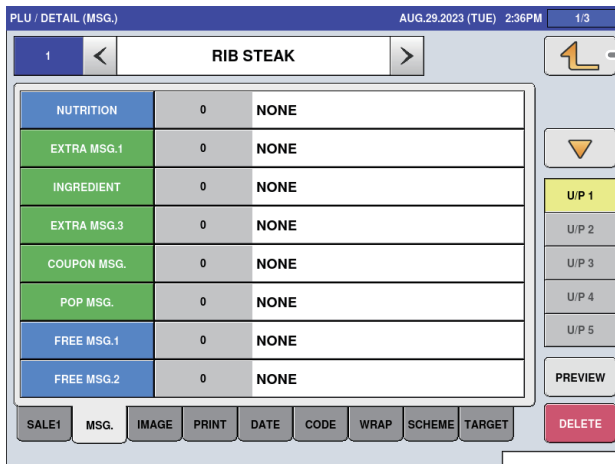

■ How to Register Each Item

Select the desired registration item and enter the details.

Item	Descriptions
SALES MODE	Touch [<] or [>] to select the desired sales mode. 0: Weight (for selling weighing items) 1: Fixed price (for selling fixed price items) 2: Weight fixed price (for selling weighing fixed price items) 3: Fixed unit price (for selling fixed unit price items) 4: Weight (100 g) (when the unit price per 100g needs to be set in accordance with the laws of a country)
UNIT PRICE / FIXED PRICE	Enter the unit price or fixed price and touch this field.
OPEN PRICE	Touch [<] or [>] to select whether or not to allow an open pricing system. 0: Yes 1: No
FIXED WEIGHT	Enter the fixed weight and touch this field.
TARE	Enter the tare weight and touch this field.
MARKDOWN MODE	Touch [<] or [>] to select the desired markdown mode. 0: Normal price 1: Special price 2: Amount discount for total price 3: Percent discount for total price 4: Special unit price 5: Amount discount for unit price 6: Percent discount for unit price
M/D AMOUNT	Enter the markdown amount or percentage and touch this field.
2ND TARE	Enter the tare weight and touch this field.

UNIT TYPE	Touch the "UNIT TYPE" field to display the "Fix Price Symbol" screen. Then, touch the desired field for selection.	
QTY	Enter the pack quantity and touch this field.	
%TARE	Enter the tare percentage and touch this field.	
LOWER WEIGHT	Enter the lower weight limit and touch this field.	
UPPER WEIGHT	Enter the upper weight limit and touch this field.	
FORCED TARE	Touch [YES] or [NO] to select whether or not to use the forced tare function.	

4.2.2 PLU Detail (MSG.) Registration

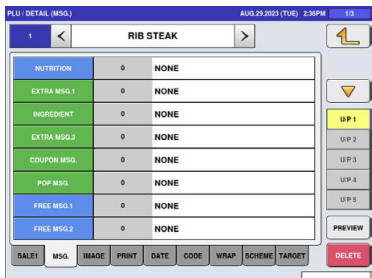

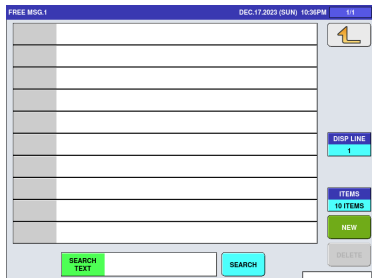

— Returns to the PLU list screen.

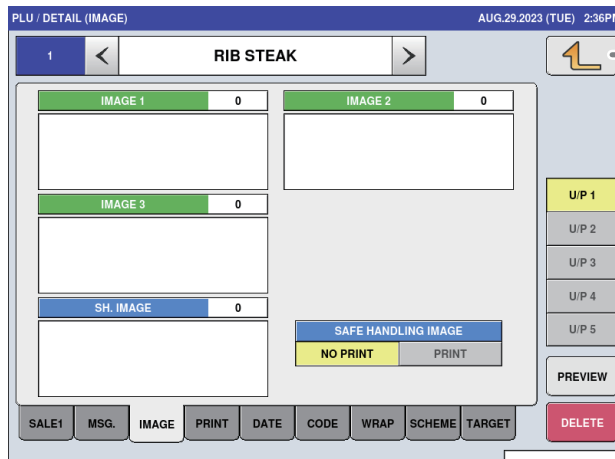

■ How to Register Each Item

Select the desired registration item and enter the details.

4.3 CAMPAIGN REGISTRATION

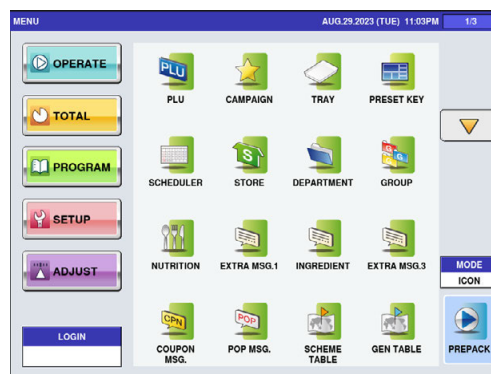

This section describes how to register campaign commodities and campaign prices.

1. Touch [CAMPAIGN] on the menu screen.

The CAMPAIGN List screen will be displayed.

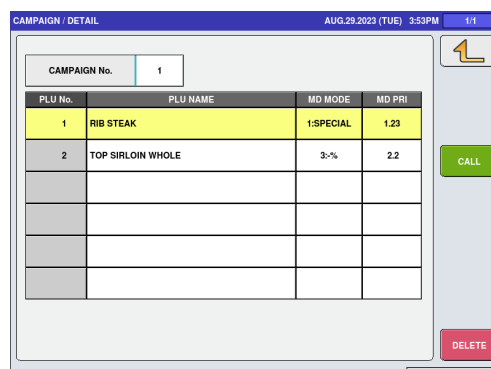

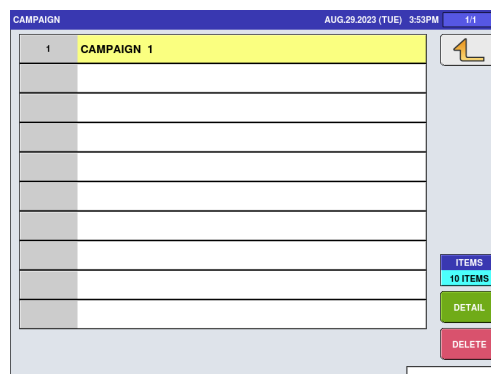

2. The campaign list screen is displayed. Enter the call number for the campaign.

Any number from 1 to 99 can be entered for the campaign number.

Example: Campaign number 1

When the registration confirmation screen is displayed, touch [EXECUTE] to display the CAMPAIGN / DETAIL screen.

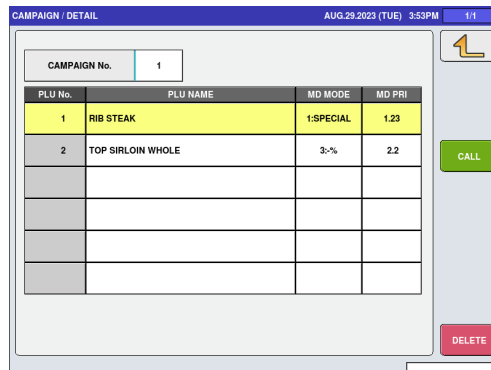

REFERENCE

To edit the registered campaign data, touch the field of the campaign data you want to edit and touch [DETAIL]. Touching [DELETE] will delete the data.

3. Select the campaign commodity.

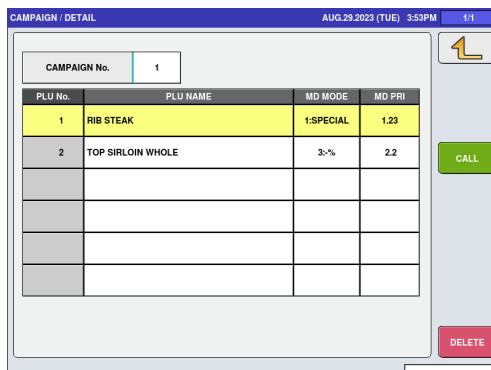

Touch the [CALL] button to display the PLU screen and touch the required commodity.

4

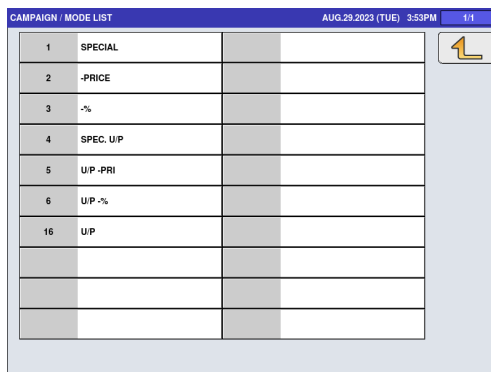

4. Select the campaign type.

Touch the [MD MODE] field to display the campaign mode list screen and select the campaign.

5. Register the campaign content.

Enter a numeric value and touch the [MD PRICE] field.

4.4 TRAY REGISTRATION

Tray sizes and tray names can be registered. The tray automatic registration screen, tray manual registration screen, film adjustment screen and labeling position registration screen are there within the tray registration screen.

4.4.1 Tray List Screen Registration

1. Displays the tray list screen.

Returns to the registration mode menu 1/2 screen.

Displays the detailed screen of the selected tray data.

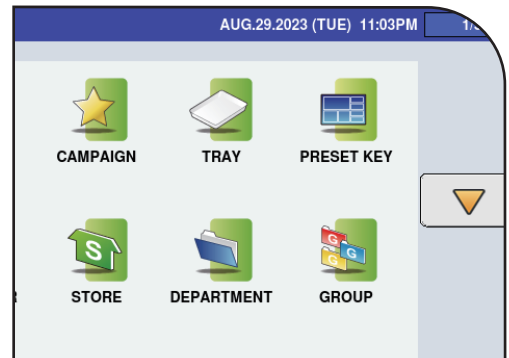

Deletes the selected tray data.

No.	TRAY NAME	LENGTH(cm)	WIDTH(cm)	HEIGHT(cm)	TARE(lb)	FILM(lb)
1	COD OVEN TRAY	15.0	9.0	2.5	0.00	0.00
2	BREVOORT TRAY	33.0	10.0	2.0	0.00	0.00
3	STANDARD TRAY	20.0	12.0	2.0	0.00	0.00
4	JUMBO TRAY	28.0	21.0	2.5	0.00	0.00

1. Touch [TRAY] on the program mode menu 1/2 screen.

The tray list screen is displayed.

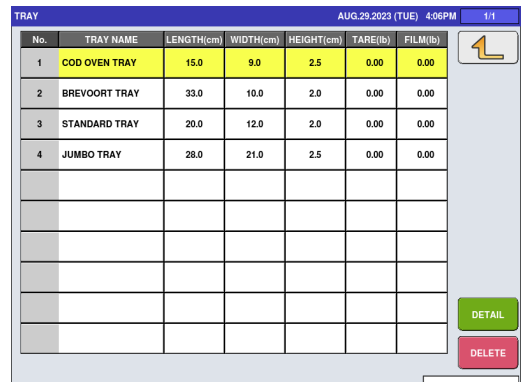

2. Enter the tray call number.

Example: Tray call number 3

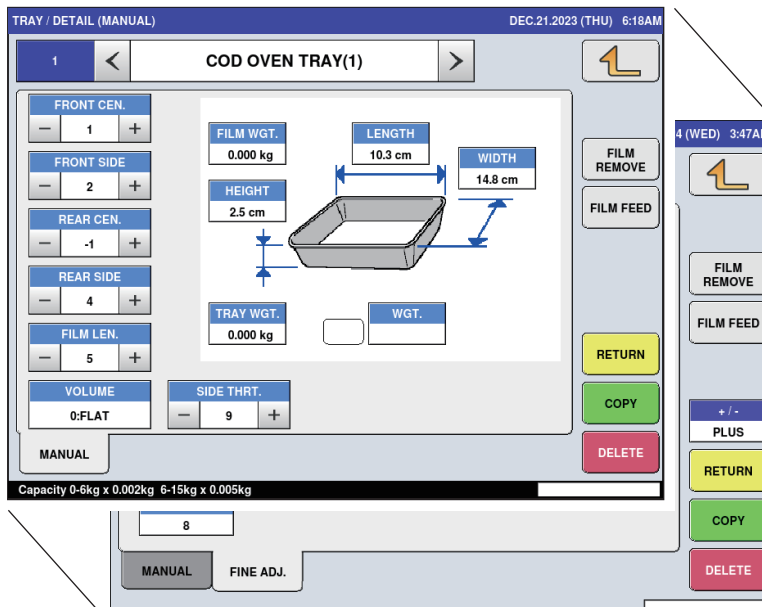

Any number from 1 to 9999 can be entered for the storage tray call number.

4.4.2 Manual Tray Registration

This section describes how to manually register tray information such as size, weight, and film weight.

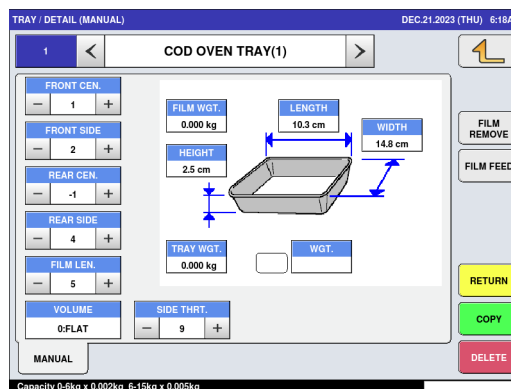

1. Touch the [MANUAL REGISTRATION] tab on the tray registration screen.

The tray (manual registration) screen is displayed.

2. Select and register the following:

- Front Center
- Front Side
- Rear Center
- Rear Side
- Film Length
- Volume
- Side Threshold

3. Measure the dimensions of the tray and enter the values.

4. Make sure that nothing is placed on the weighing unit conveyor or wrapper conveyor.

CAUTION

Automatic setting of tray weight is not possible unless [WEIGHT] is touched.

5. Touch [WEIGHT].

The weighed value of the tray is registered.

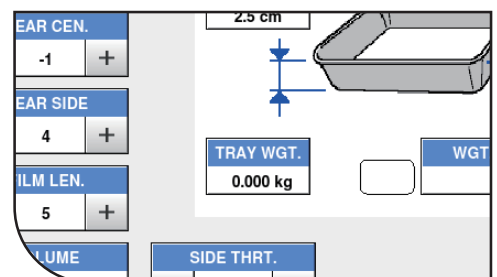

6. Place the tray to be registered in the center of the weighing platter.

Weighing of the tray is started and the weight of the tray is displayed in the WEIGHT field.

7. Touch [TRAY WEIGHT].

8. Place the commodity item to be wrapped on the weighing platter.

9. Press the [PLU] stroke key.

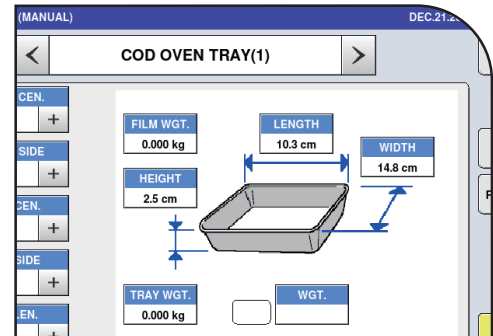

Wrapping is started and the wrapped tray is discharged.

10. Place the discharged, wrapped tray on the weighing platter.

Remove the film from the wrapped commodity item. → Touch [WEIGHT] on the screen. → Place the film on the weighing platter. → Touch [FILM WEIGHT] on the screen. → The calculated result of the film weight is registered.

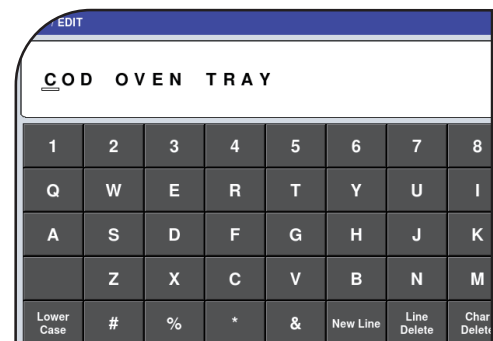

4.4.3 Tray Name Registration

1. Touch the tray name field on the tray registration screen to display the tray name edit screen.

2. Enter the tray name.

The tray name can be up to 9 characters long.

3. Touch the Return button on the tray name edit screen.

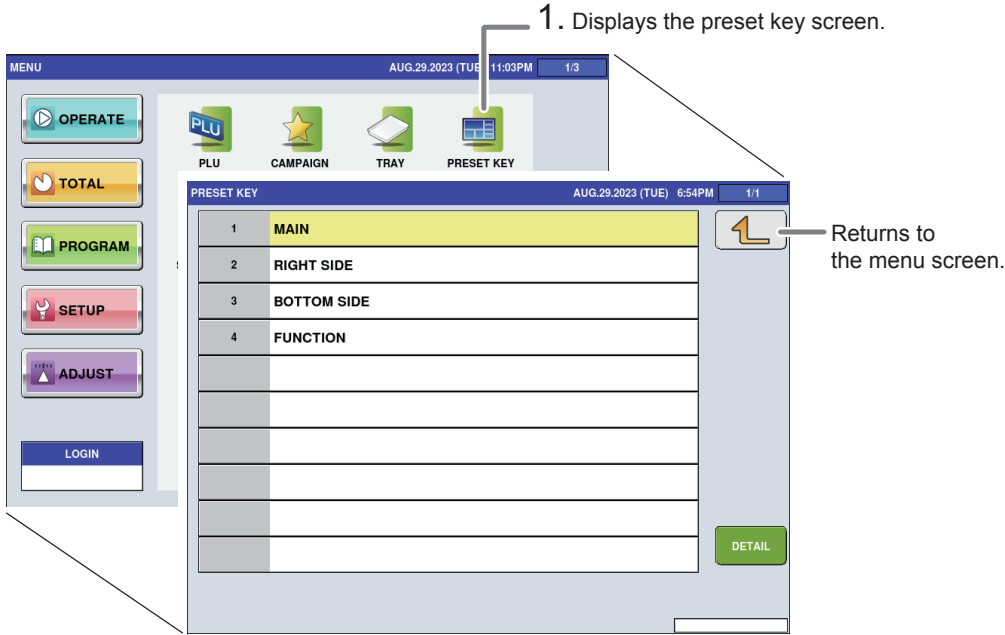

REFERENCE

For information on how to enter characters, see "Character Entry Method" on page 4-55.

4.5 PRESET KEY REGISTRATION

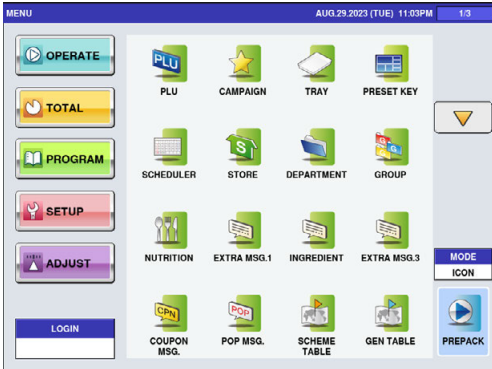

This section describes how to register frequently used functions as preset keys.

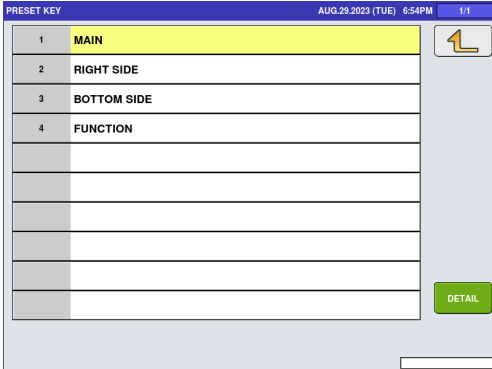

1. Touch the [PRESET KEY] on the menu screen.

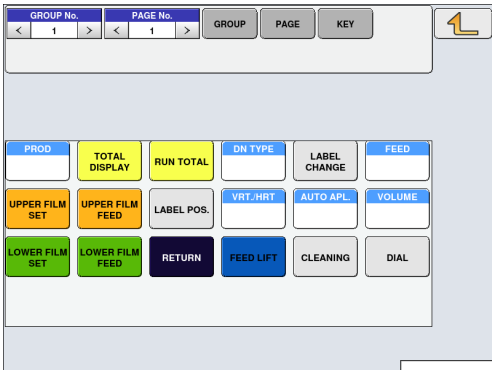

The preset key screen is displayed.

2. Touch the location where you want to register the preset key and touch the [DETAIL] button.

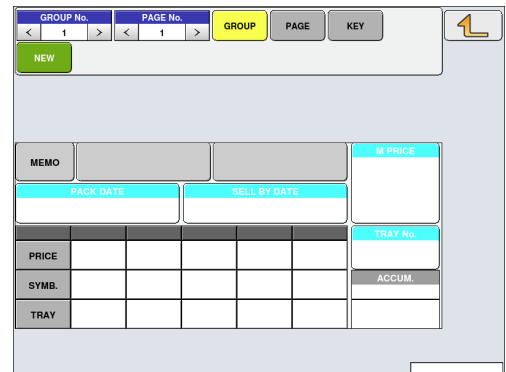

3. The preset key edit screen is displayed.

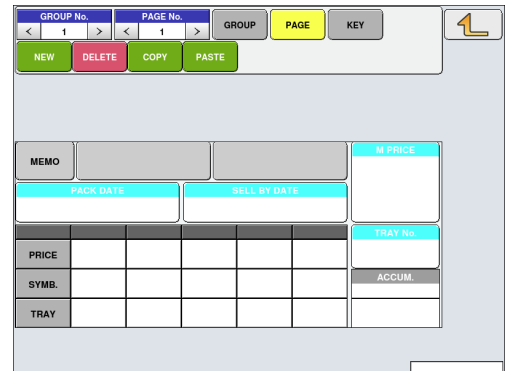

4.5.1 Setting Preset Groups and Pages

1. Touch [<] or [>] to select the group or page number.

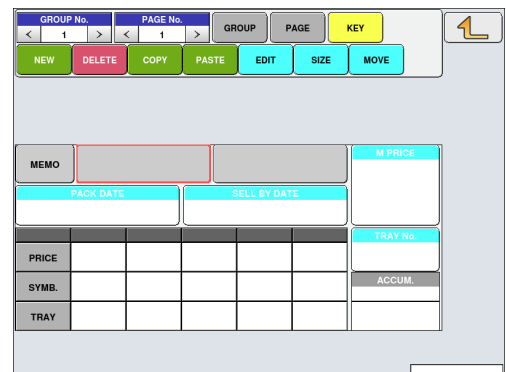

2. To create or delete the group or the page, touch the [GROUP] or [PAGE] button, and then touch the desired function button as shown below.

4.5.2 Setting Preset Keys

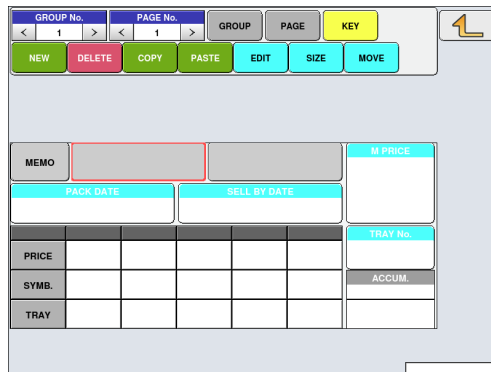

1. Select the group and page to which you want to add a preset key, touch the [KEY] button, and then touch the [NEW] button.

2. Available preset keys are listed on the screen. To turn pages, touch [▲] or [▼]. Touch the desired function for selection.

4.8 DEPARTMENT REGISTRATION

This section describes how to register departments.

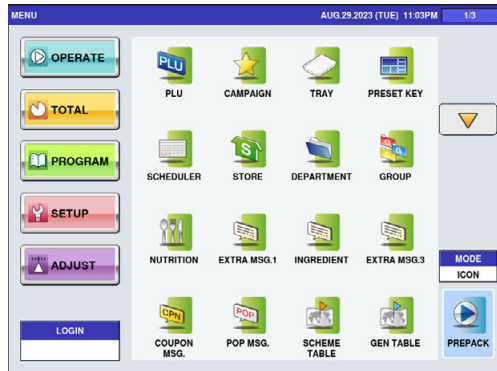

1. Touch [DEPARTMENT] on the menu screen.

DEPARTMENT

The department screen is displayed.

2. Enter the call number for the department.

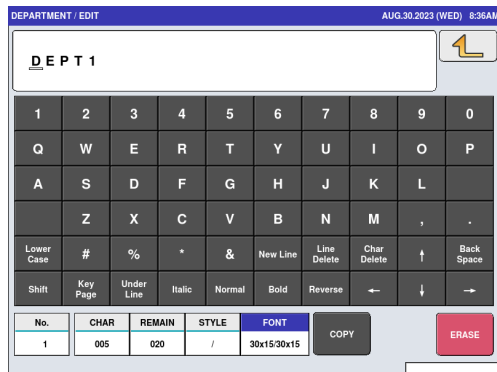

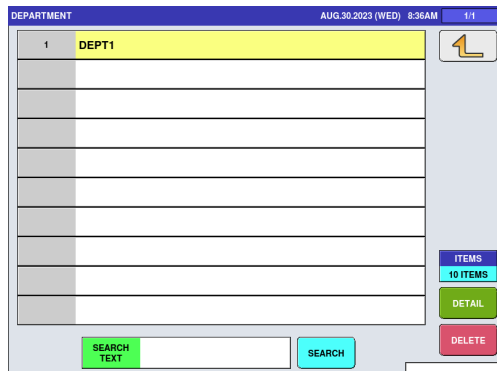

Any number from 1 to 999999 can be entered for the department number.

Example: Department number 1

When the registration confirmation screen is displayed, touch [EXECUTE].

The department/edit screen is displayed.

REFERENCE

To edit the registered department data, touch the field of the department data you want to edit and touch [DETAIL]. Touching [DELETE] will delete the data.

3. Enter the department name.

After completing the entry, touch the Return button.

REFERENCE

The same procedure applies to both group and department.

CHAPTER 5

DATA AGGREGATION

5.1 SWITCHING TO TOTAL MODE

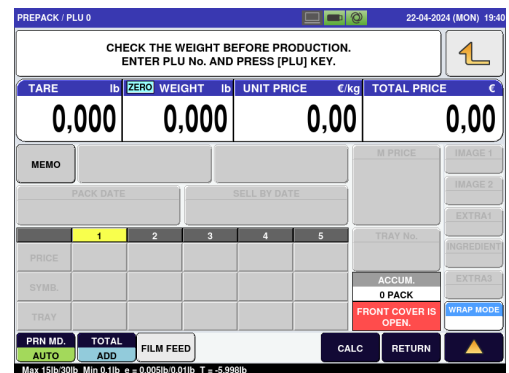

2. Displays the total menu screen.

1. Touch the Return button on the initial screen of the production mode.

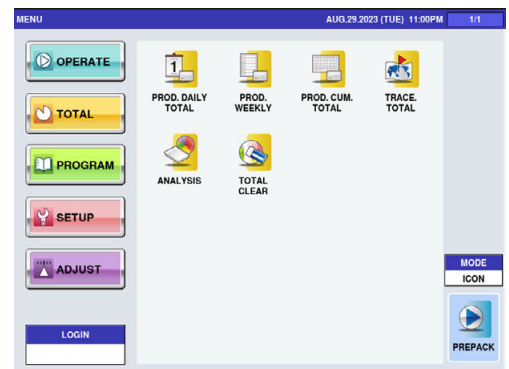

The main menu screen is displayed.

2. Touch [Total Mode] on the main menu screen.

The total menu screen is displayed.

REFERENCE

If the password is set to the total mode, enter the password and touch [Login]. For information on how to set passwords, see "Password Settings" on page 7-3.

5.2 TOTALS

This section provides a brief explanation of the various types of totals.

■ PROD. DAILY TOTAL

Displays the total of production data for the production day can be displayed.

TOTAL	Displays the total of production data for the day.
HOURL	Displays the total of production data for the day by time zone.
DEPT.	Displays the total of production data for the day by major category.
GROUP	Displays the total of production data for the day by medium category.
PLU	Displays the total of production data for the day by arbitrary item.
TYPE	Displays the total of production data for the day by item. Also displays the total of production data in order of price and quantity.
ACC1-3	Displays the total of production data for the ACC 1 to 3 day by ACC 1 to 3.
REWRAP	Displays the total of production data for the day by rewrapping.
PROMO	Displays the total of production data for the day by markdown.

■ WEEKLY TOTAL

Displays the total of the production data for one week.

■ PROD. CUM. TOTAL

All production data until Total Clear is executed is aggregated and displayed.

TOTAL	Displays the total of all accumulated production data.
DEPT.	Displays the total of all accumulated production data for each department.
GROUP	Displays the total of all accumulated production data for each group.
TYPE	Displays the total of all accumulated production data for each type.

■ TRACE. TOTAL

Displays the total of production data for each traceability data.

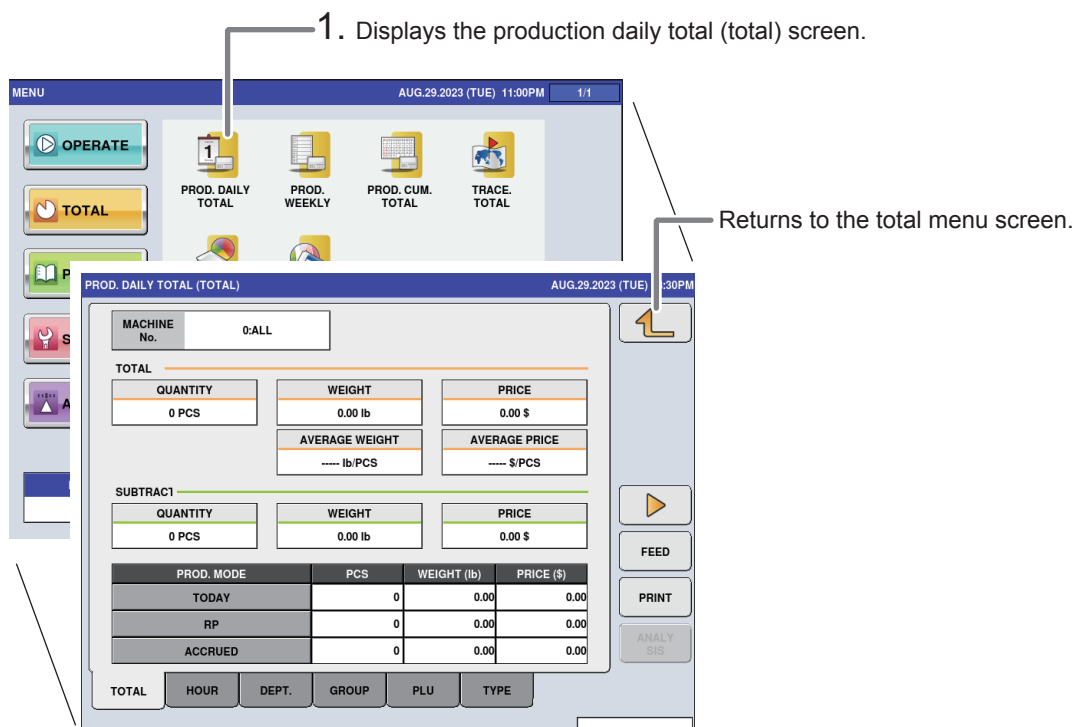

■ ANALYSIS

Total production data until Total Clear is executed is aggregated and displayed on an hourly basis.

HOURS	Displays the total of accumulated production quantity and price data for each time zone.
WRAP MODE	Displays the total of production quantity data in the wrapping mode for each time zone.
TRAY	Displays the total of production quantity data per tray for each wrapping mode.

5.3 GRAND TOTAL

Production quantity, weight, and price data can be aggregated. This section provides a brief description of the production daily total (total) as an example.

CAUTION

Totals cannot be printed out from this machine. To print totals, an external device must be connected. For details, please consult your ISHIDA dealer.

1. Touch [PROD.DAILY TOTAL] on the total menu screen.

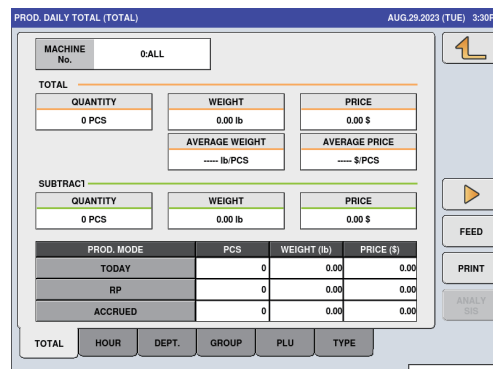

The production daily total (total) screen is displayed.

2. Touch the [TOTAL] tab on the production daily total (total) screen.

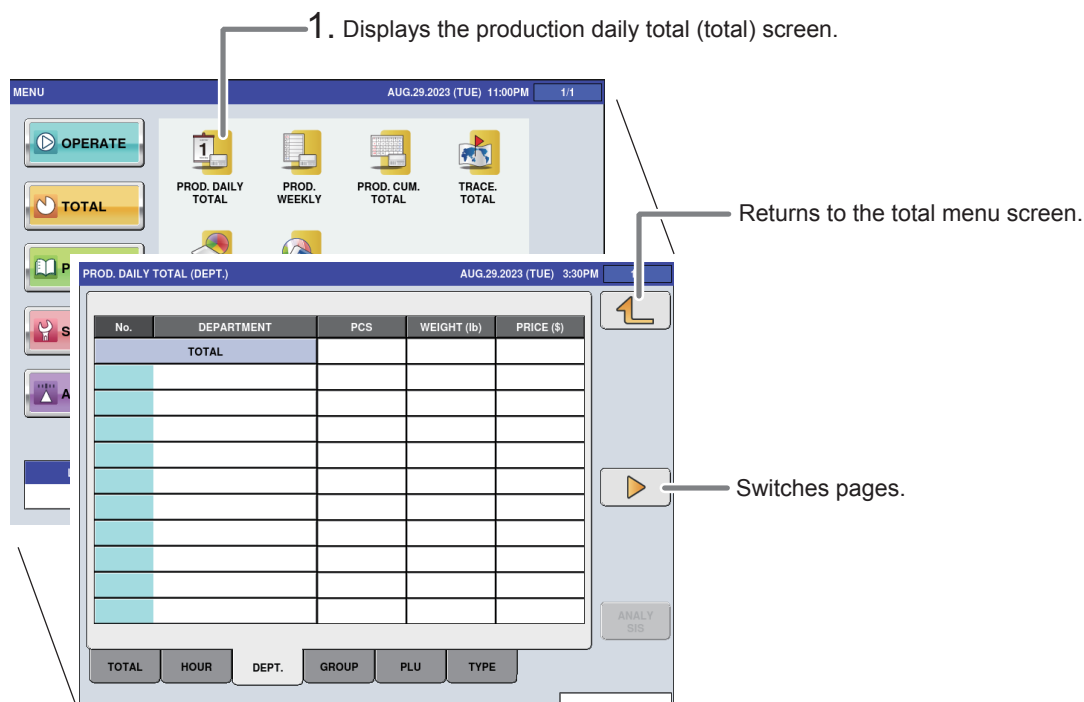

The display changes to the production daily total (department) screen, and the quantity, weight, average weight, price, and average price are displayed.

Note: Follow the same procedure for production cumulative total (department).

5.4 TOTALS PER DEPARTMENT

Production quantity, weight, and price data can be aggregated per category. This section provides a brief explanation using production daily total (department) as an example.

CAUTION

Totals cannot be printed out from this machine. To print totals, an external device must be connected. For details, please consult your ISHIDA dealer.

1. Touch [PROD. DAILY TOTAL] on the total menu screen.

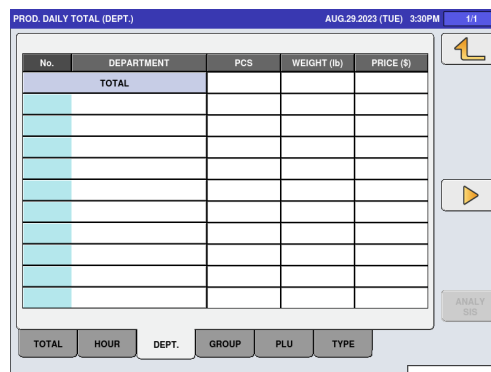

The production daily total (total) screen is displayed.

2. Touch the [DEPARTMENT] tab on the production daily total (total) screen.

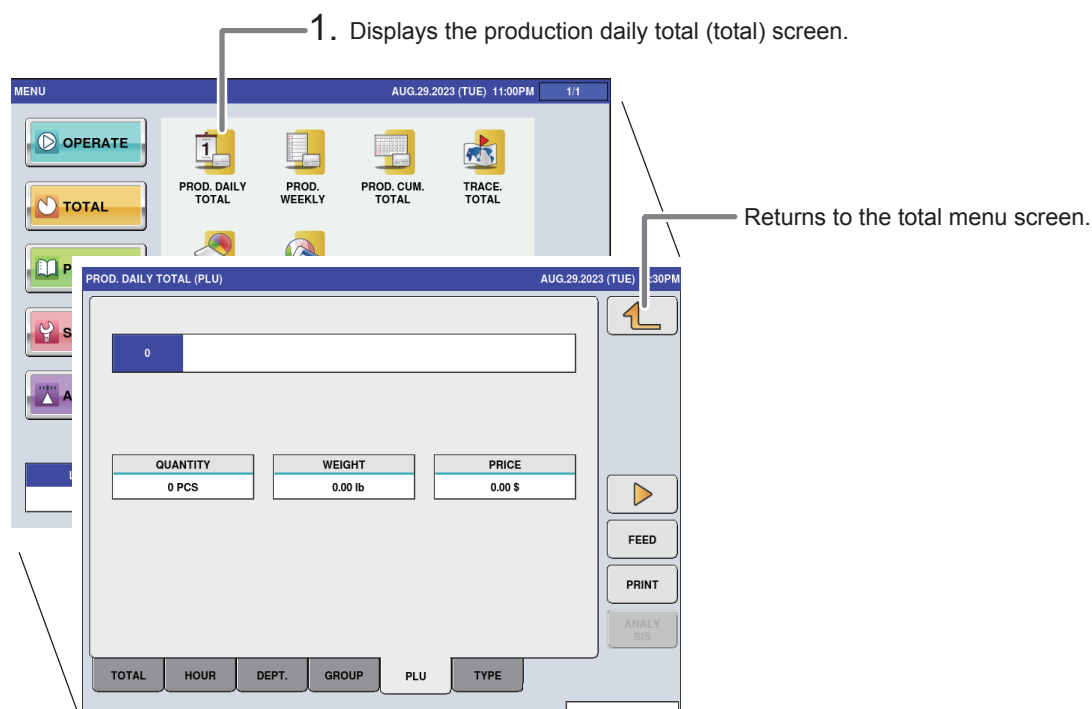

The system switches to the production daily total (department) screen and displays the quantity, weight, and price data.

Note: Follow the same procedure for production cumulative total (department).

5.5 DESIGNATED ITEM TOTALS

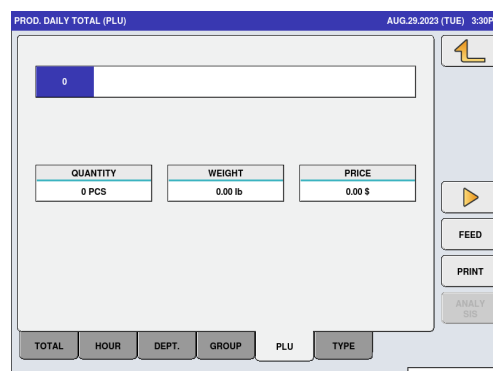

Desired item data can be aggregated. This section provides a brief explanation using production daily total (PLU) as an example.

1. Touch the [PLU] tab on the production daily total screen.

The production daily total (PLU) screen is displayed.

CAUTION

Production daily total (PLU) and production cumulative total (PLU) are printed on the label.

2. Call up the desired item.

Enter the item number and touch the [PLU] key.

3. Touch the [PRINT] key.

The total label for the designated item is issued.

Note: Follow the same procedure for production cumulative total (PLU).

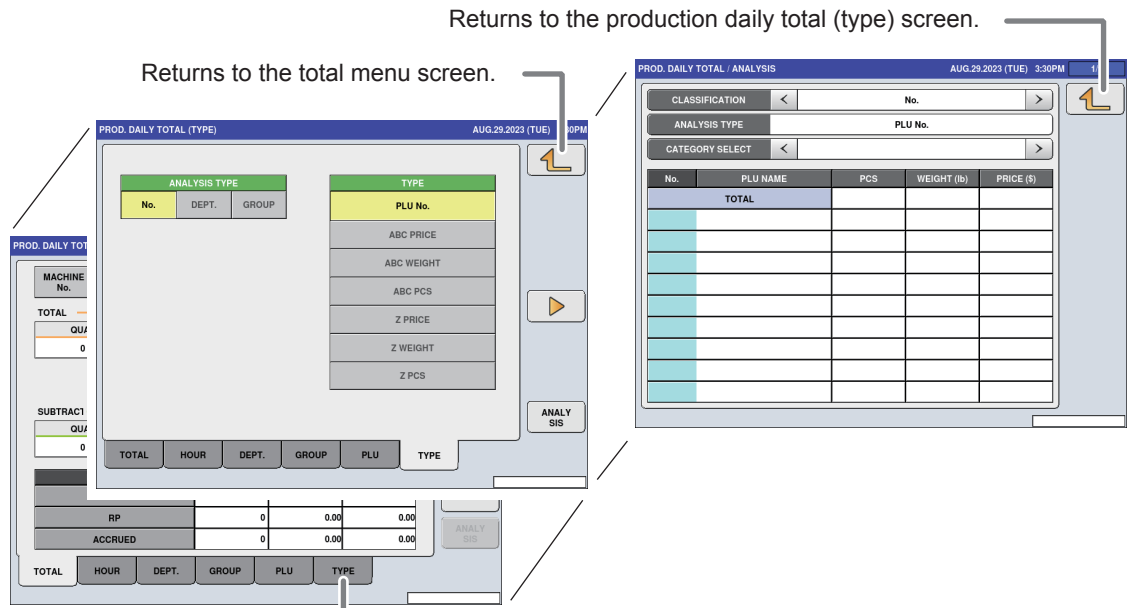

INFORMATION

To feed the label, touch the [FEED] key.

5.6 TOTALS PER TYPE

Production quantity, weight, and price data can be aggregated for each item. This section provides a brief explanation using production daily total (type) as an example.

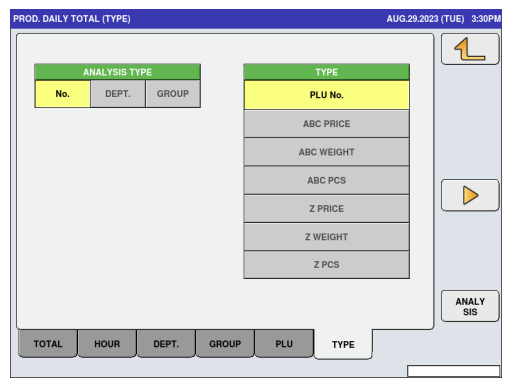

1. Displays the production daily total (type) screen.

1. Touch the [TYPE] tab on the production daily total (total).

The production daily total (type) screen is displayed.

5

2. Select the analysis type.

- No. : Total data aggregated by PLU number is displayed.
- DEPT. : Total data aggregated by department is displayed.
- GROUP : Total data aggregated by group is displayed.

CAUTION

Totals cannot be printed out from this machine. To print totals, an external device must be connected. For details, please consult your ISHIDA dealer.

3. Select the analysis type.

- PLU No. : Displays and aggregates in order of item call number.
- ABC PRICE : Displays and aggregates in descending order of gross price.
- ABC WEIGHT: Displays and aggregates in descending order of gross weight.
- ABC PCS : Displays and aggregates in descending order of gross quantities.
- Z PRICE : Displays and aggregates in ascending order of gross price.
- Z WEIGHT : Displays and aggregates in ascending order of gross weight.
- Z PCS : Displays and aggregates in ascending order of gross quantity.

4. Touch [ANALYSIS].

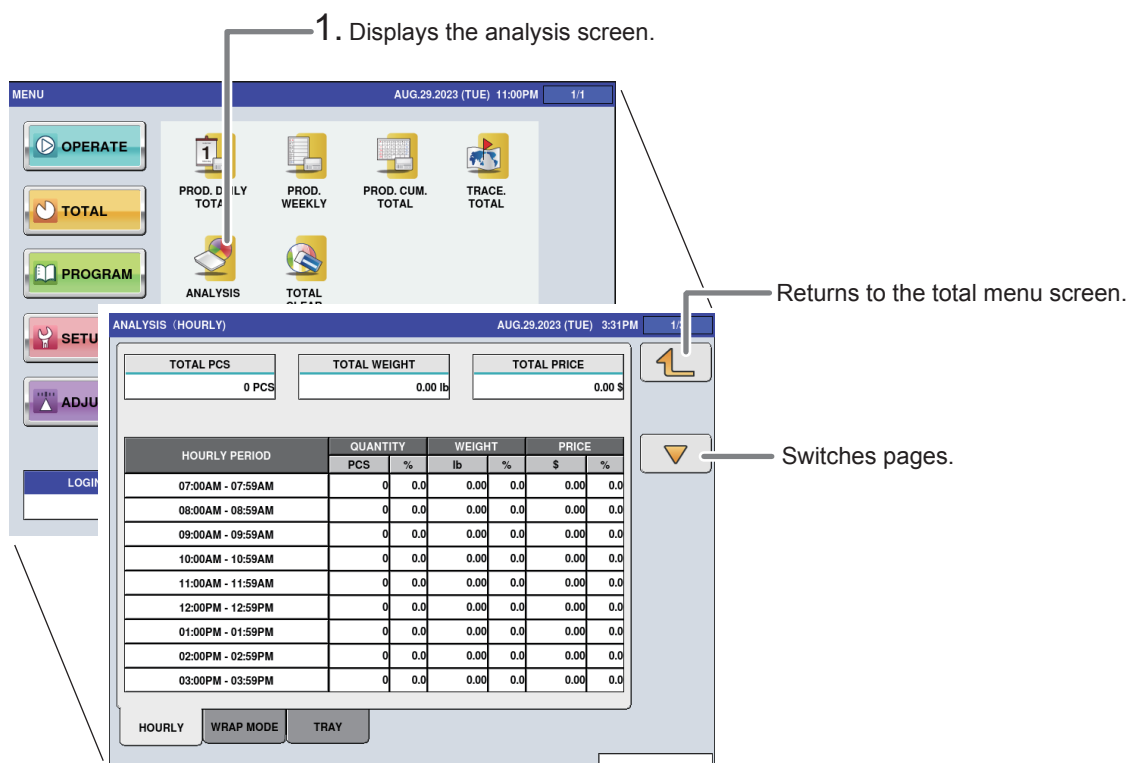

The display changes to the production daily total (analysis) screen.

Note : Follow the same procedure for production cumulative total (type).

5.7 TOTALS PER HOUR

Production quantity, weight, and price data can be aggregated for each time zone.

CAUTION

Totals cannot be printed out from this machine. To print totals, an external device must be connected. For details, please consult your ISHIDA dealer.

1. Touch [ANALYSIS] on the total menu screen.

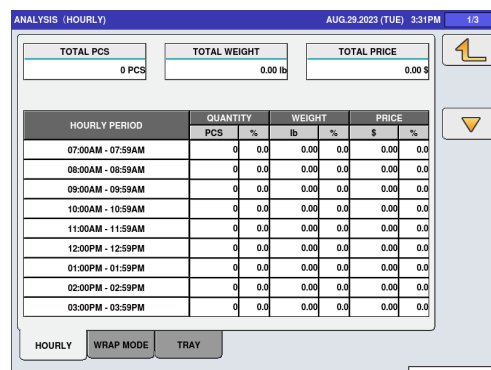

The analysis screen is displayed.

2. Touch the [HOURLY] tab on the analysis (HOURLY) screen.

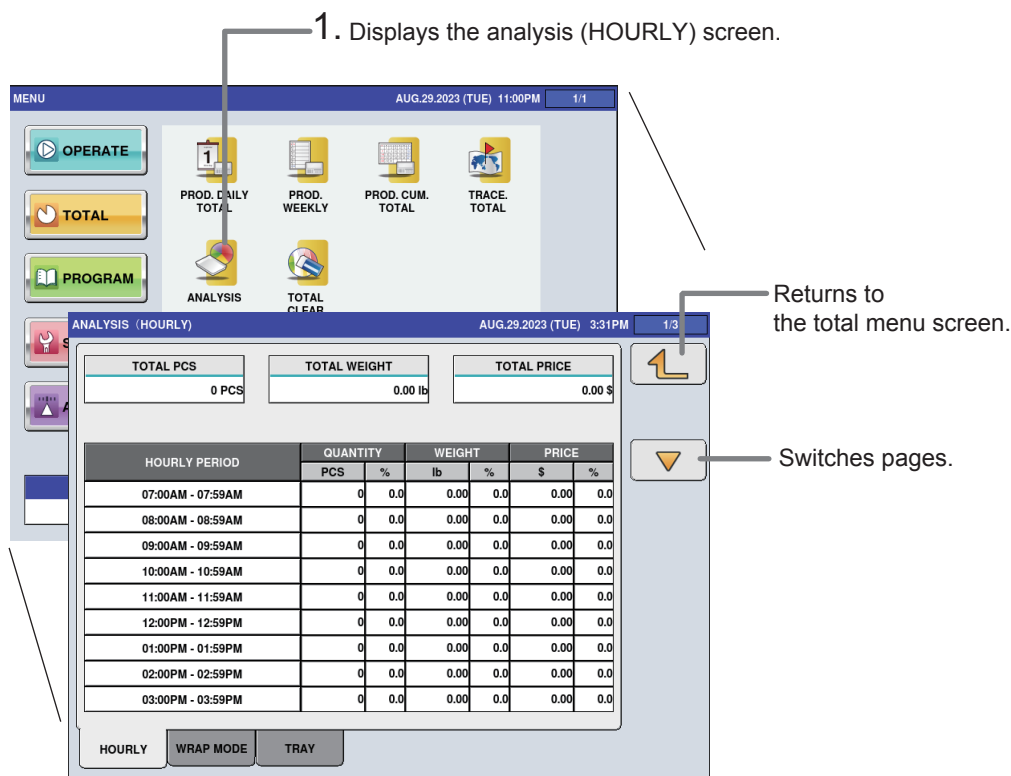

HOURLY

The system switches to the analysis (hourly) screen and displays the quantity, weight, and price data per hour.

5.8 TOTALS PER WRAPPING MODE

Hourly production data can be displayed for each wrapping mode.

CAUTION

To output data, an external device must be connected. For details, please consult your ISHIDA dealer.

1. Touch [ANALYSIS] on the total menu screen.

The analysis (HOURLY) screen is displayed.

2. Touch the [WRAP MODE] tab on the analysis (HOURLY) screen.

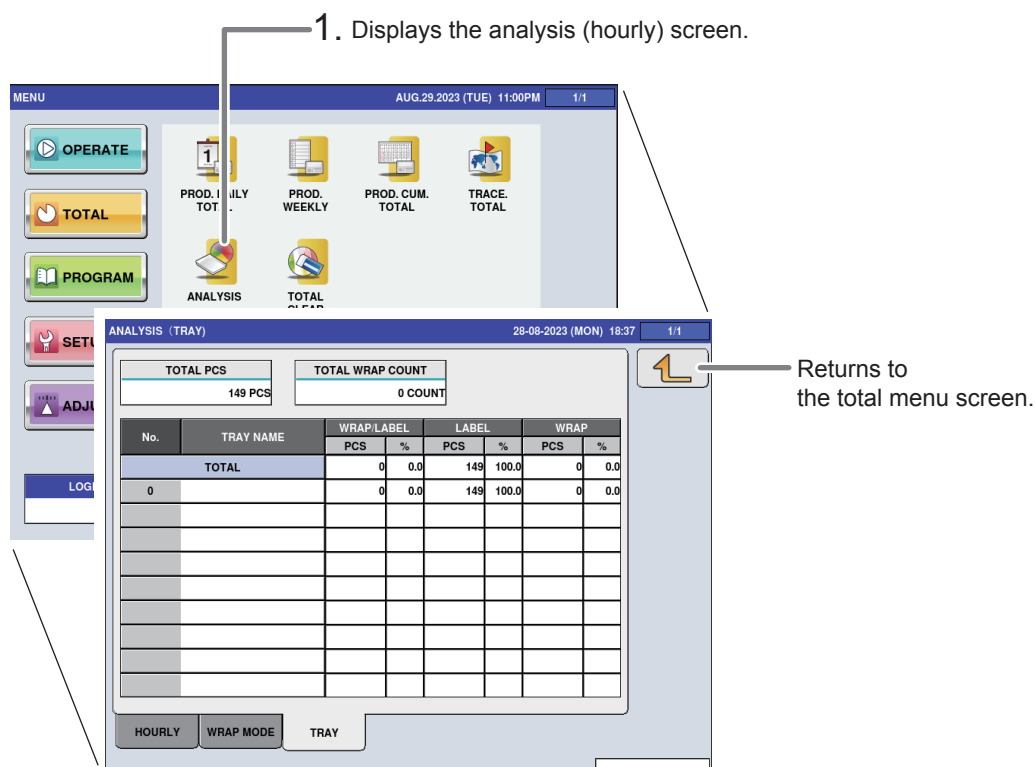

The analysis (wrapping mode) screen is displayed.

TOTAL PCS		TOTAL WEIGHT		TOTAL PRICE		
0 PCS		0.00 lb		0.00 \$

5.9 TOTALS PER TRAYS

Production data can be aggregated and displayed per tray.

CAUTION

Totals cannot be printed out from this machine. To print totals, an external device must be connected. For details, please consult your ISHIDA dealer.

1. Touch [ANALYSIS] on the total menu screen.

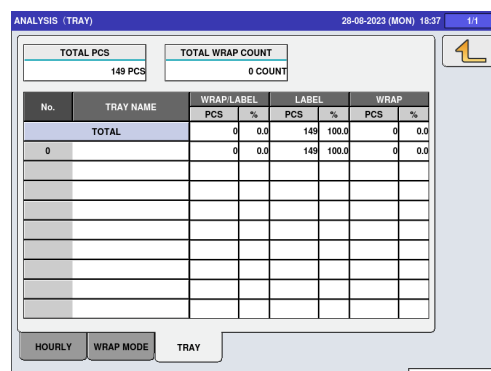

The analysis screen is displayed.

2. Touch the [TRAY] tab on the analysis (hourly) screen.

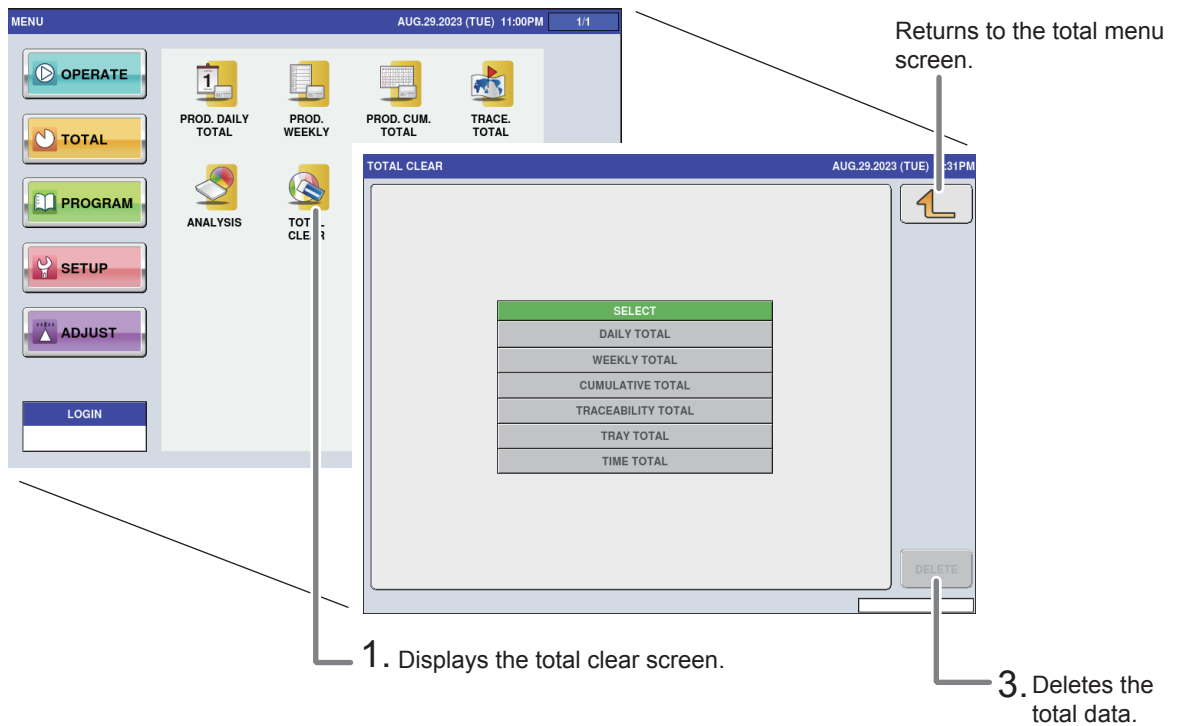

The analysis (tray) screen is displayed.

5.10 TOTAL CLEAR

The accumulated data can be cleared.

1. Touch [TOTAL CLEAR] on the total menu screen.

The total clear screen is displayed.

2. Select the items to be cleared from among cumulative totals.

Total to be deleted can be selected by pressing the field(s). Once selected, they will be highlighted.

3. Touch [DELETE] to clear the selected totals.

The delete confirmation screen is displayed.

Touch [EXECUTE].

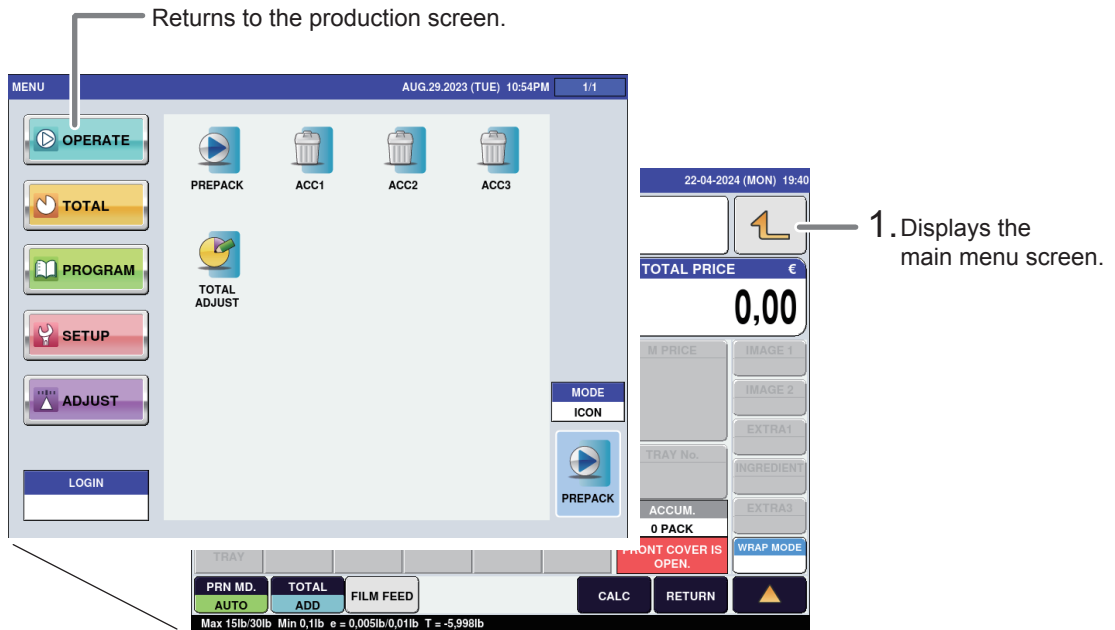

CHAPTER 6

TOTAL DATA CORRECTION

6.1 SWITCHING TO SUBTRACTION MODE

Data for incorrectly produced commodity items can be deleted from the total. In addition, the lack of production data can be added here.

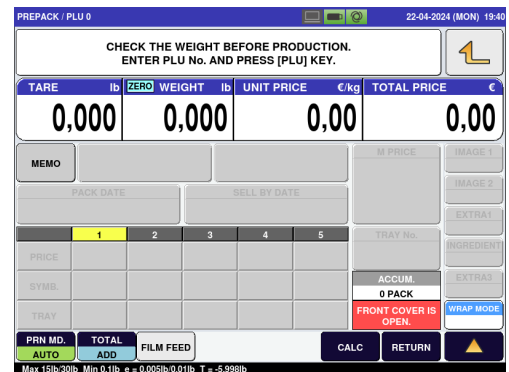

CAUTION

Ensure that no items being processed are left in the wrapper.

1. Touch the Return button on the initial screen of the production mode.

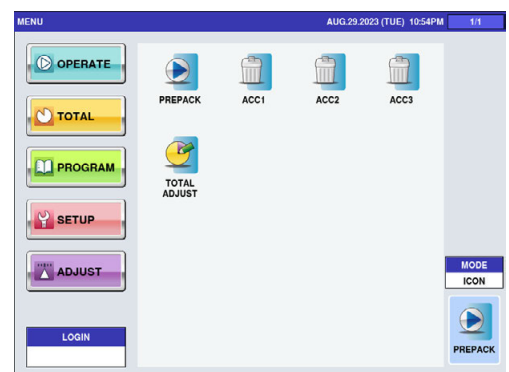

The main menu screen is displayed.

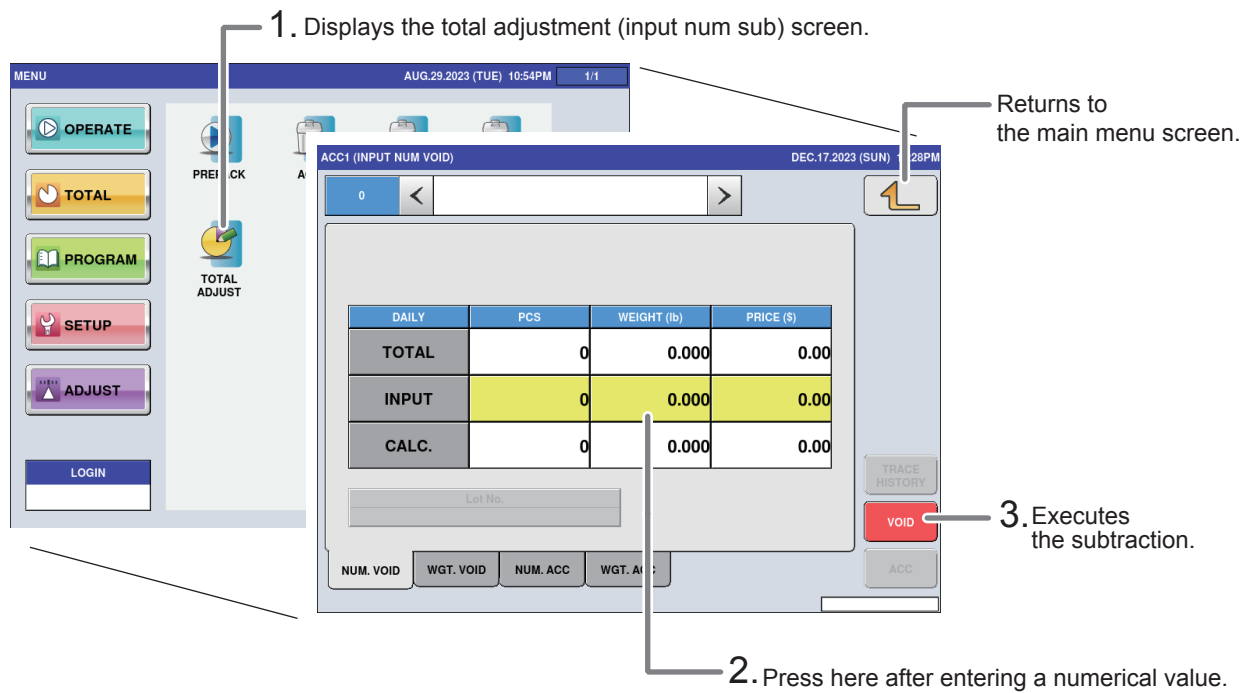

2. Touch [TOTAL ADJUST] on the operate mode menu screen.

The total adjustment screen is displayed.

6.2 SUBTRACTION BY NUMERICAL ENTRY

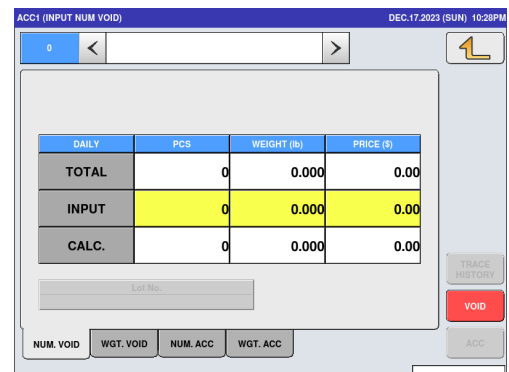

REFERENCE

If a password is set for the total adjustment mode, enter the 4-digit password and touch [Login].

1. Touch the [NUM. SUB] tab on the subtraction screen.

The total adjustment (input num sub) screen is displayed.

2. Enter numerical values in the quantity, weight, and price fields, respectively.

3. Execute the subtraction.

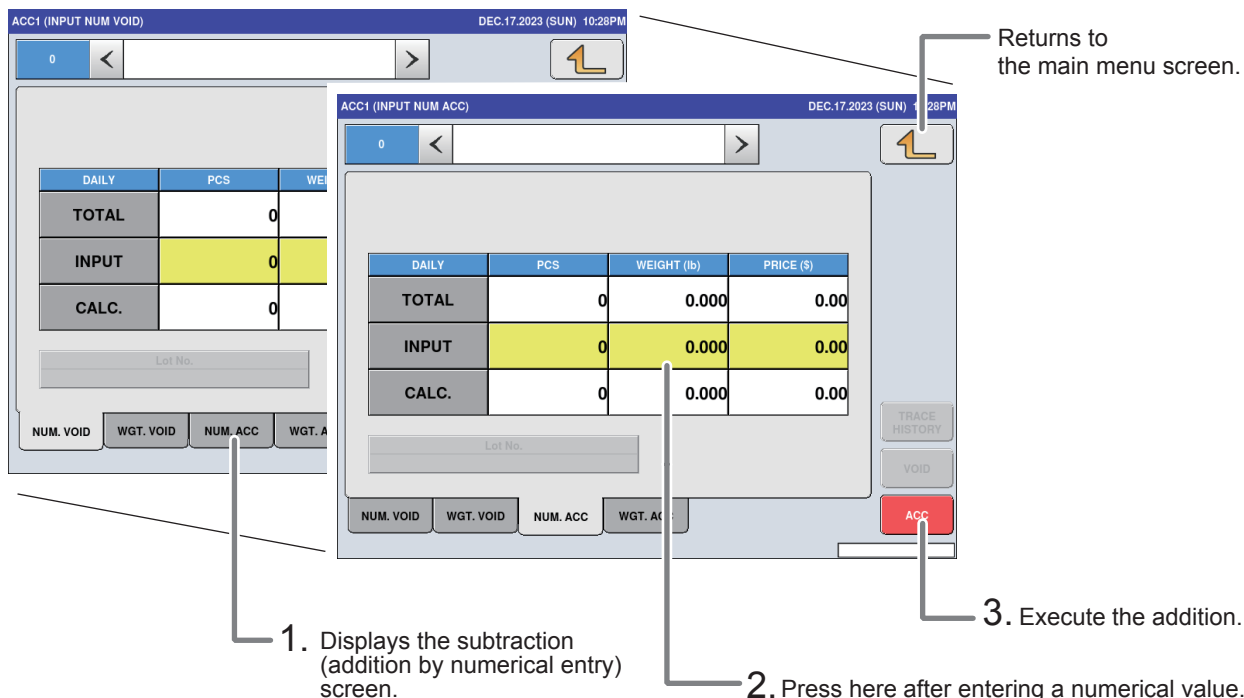

Touch [SUB] to display the subtraction confirmation screen.

Touch [EXECUTE].

6.3 ADDITION BY NUMERICAL ENTRY

Data with numerical values entered can be added to the total data.

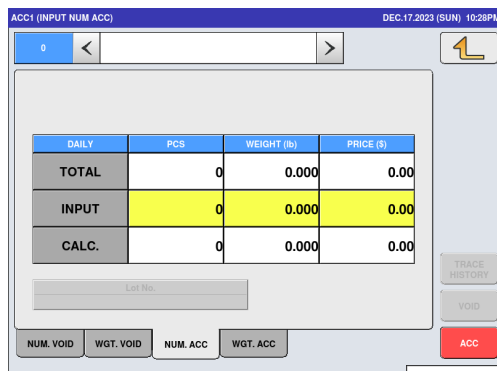

REFERENCE

If a password is set for the total adjustment mode, enter the 6-digit password and touch [Calculate/Add].

1. Touch the [NUM.ADD] tab on the subtraction screen.

The total adjust (input num sub) is displayed.

2. Enter numerical values in the quantity, weight, and price fields, respectively.

3. Executes the addition.

Touch [ADD] to display the addition confirmation screen.

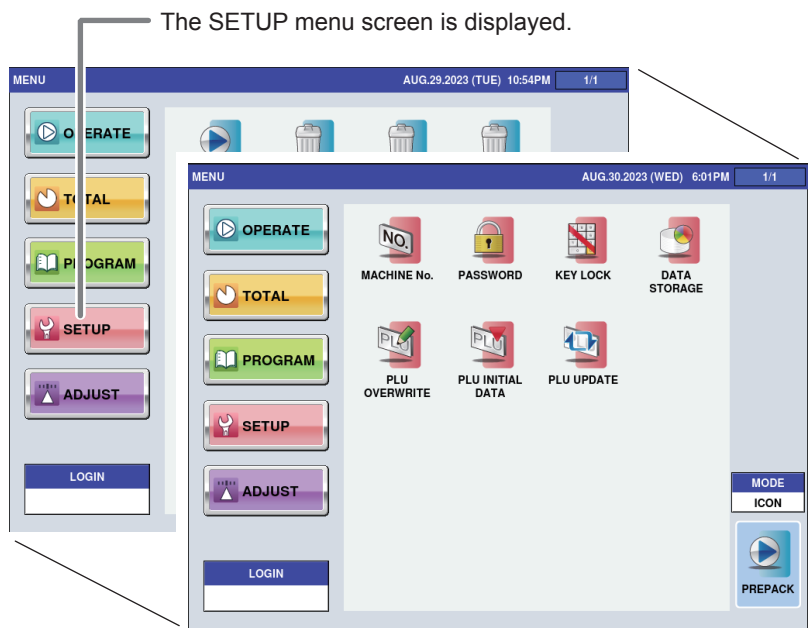

Touch [EXECUTE].

CHAPTER 7

SETTING MODE

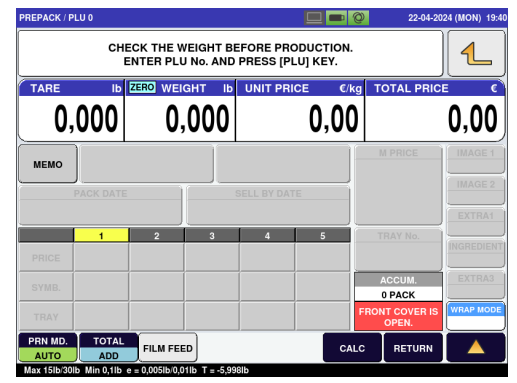

7.1 SWITCHING TO SETUP MODE

1. Touch the Return button on the initial screen in the production mode.

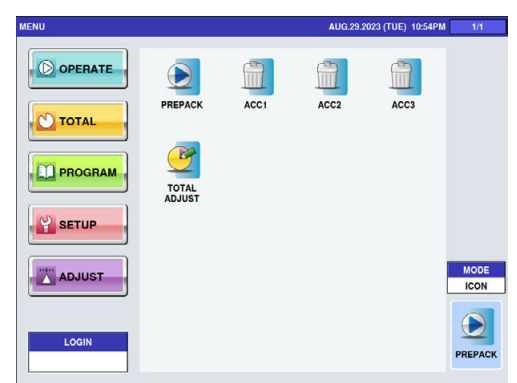

The main menu screen is displayed.

2. Touch [Setup Mode] on the main menu screen.

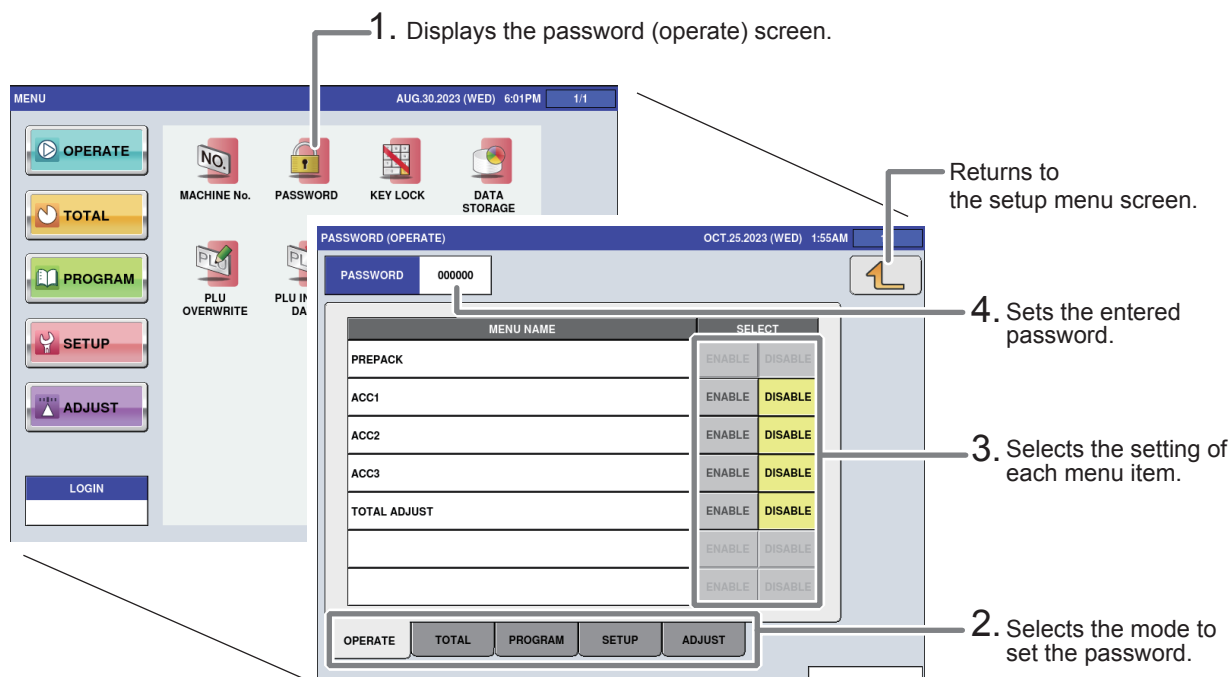

The setup menu screen is displayed.

7.2 PASSWORD SETTINGS

This section describes how to set passwords for menu items in each mode.

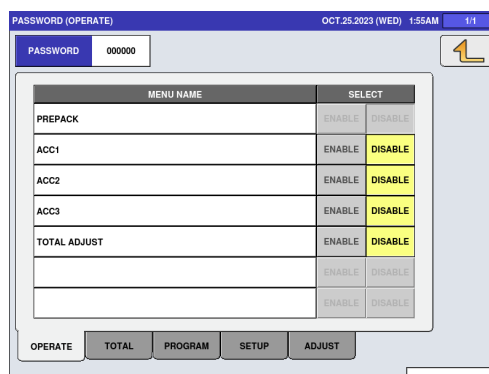

1. Touch [Password] on the setup menu screen.

The password (operate) screen is displayed.

2. Touch the tab at the bottom of the screen to select the mode for setting.

3. Select the setting of each menu item.

CAUTION

The administrator is requested to write down all passwords so as not to forget them.

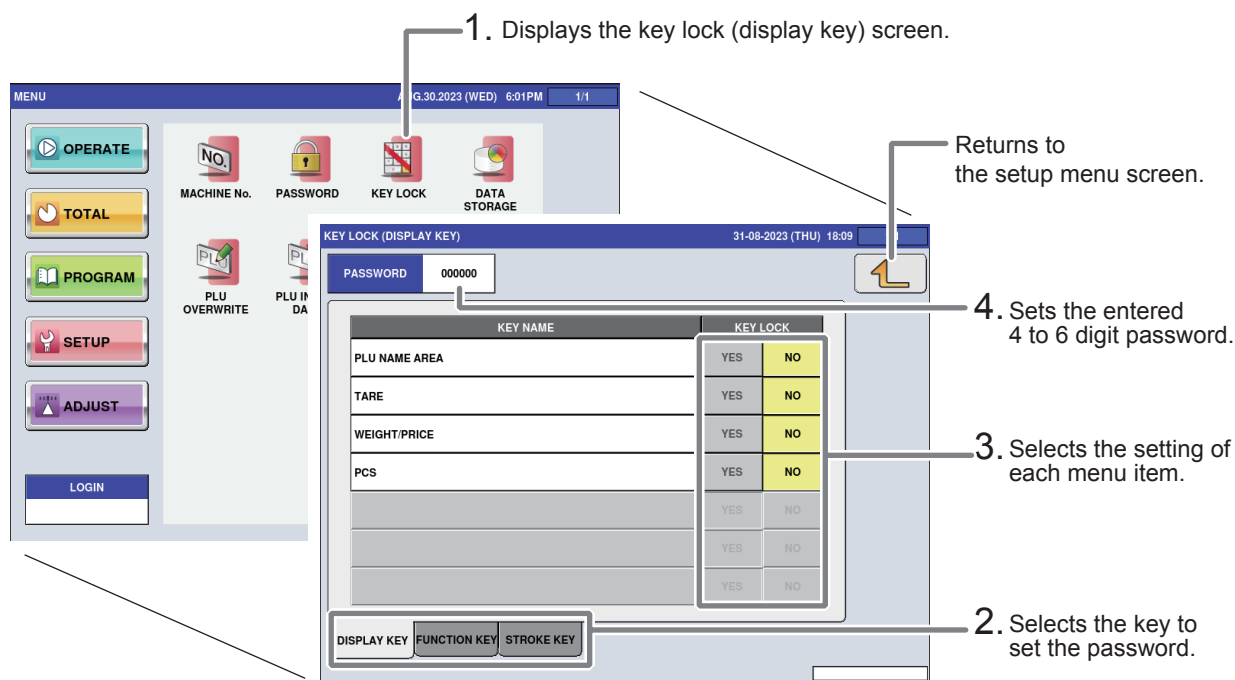

4. Enter the password.

The entered password is displayed.

7.3 KEY LOCK SETTINGS

This section describes how to set key locks for the display, function, and stroke keys.

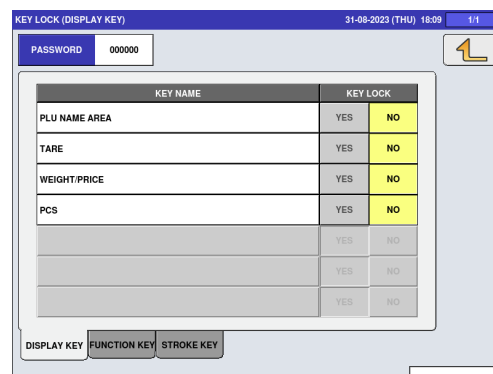

1. Selects the key to set the password.

Touch the [KEY LOCK] on the setup menu screen.

2. Touch the tab at the bottom of the screen to select the key.

3. Select the setting of each menu item.

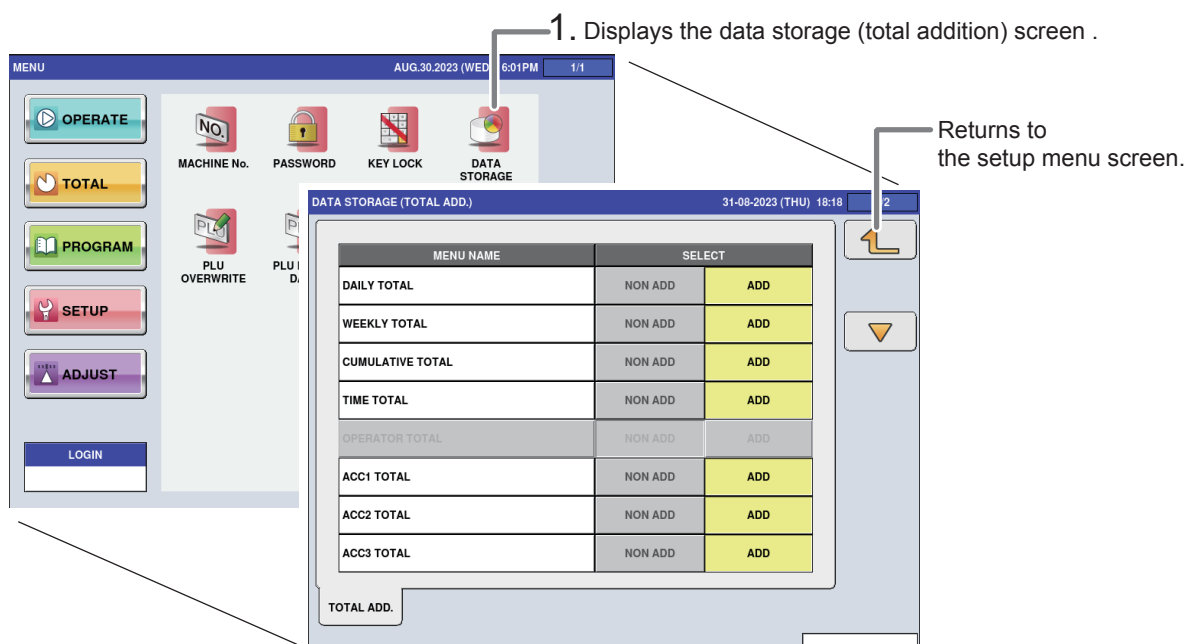

The administrator is requested to write down all passwords so as not to forget them.

4. Enter the password.

The entered password is displayed.

7.4 DATA STORAGE SETTINGS

1. Touch [DATA STORAGE] on the setup menu screen.

The data storage setting screen is displayed.

2. Set the necessary items.

DAILY TOTAL	When "Add" is set, it is totaled in the Daily Total of the Total Mode. In addition, the pack count for each item is displayed above the input field of Production Mode.
WEEKLY TOTAL	When "Add" is set, it is totaled in the Weekly Total of the Total Mode.
CUMULATIVE TOTAL	When "Add" is set, it is totaled in the Cumulative Total of Total Mode.
TIME TOTAL	When "Add" is set, it is totaled in the Total per Hour and Total per Wrapping Mode of Work Analysis in Total Mode.
ACC1-3 TOTAL	When "Add" is set, it is totaled in the Accumulated Total of Total Mode.
REWRAP TOTAL	When "Add" is set, it is totaled in the Total per Rewrap of Analysis in Total Mode.
TRAY TOTAL	When "Add" is set, it is totaled in the Total per Tray of Analysis in Total Mode.

7.5 PLU OVERWRITE SETTING

This setting automatically makes temporary changes in production mode permanent.

1. Displays the PLU overwrite screen.

Returns to the setup menu screen.

Switches pages.

2. Sets whether or not to reflect the changed data in the commodity item master when data is changed in the production mode.
 Yes: The commodity item master is updated.
 No: The commodity item master is NOT updated.

PLU MASTER LIST		SELECT	
UNIT PRICE:FIX PRICE	YES	NO	
MARKDOWN MODE:M/D AMOUNT	YES	NO	
UNIT TYPE:QTY	YES	NO	
FIXED WEIGHT	YES	NO	
PACK DATE/TIME	YES	NO	
SELL BY DATE/TIME	YES	NO	
TARE	YES	NO	
EXTRA MSG.1	YES	NO	
INGREDIENT	YES	NO	
EXTRA MSG.3	YES	NO	

1. Touch [PLU OVERWRITE] on the setup menu screen.

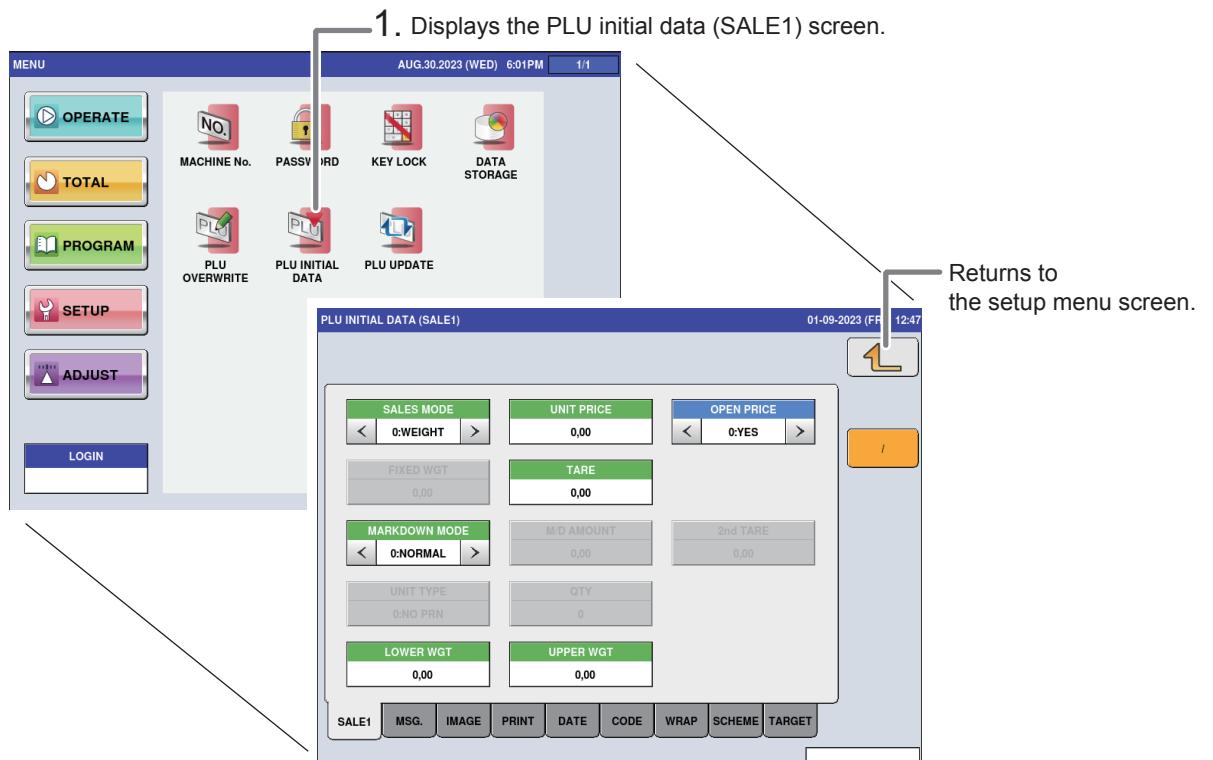

The PLU overwrite screen is displayed.

2. Touch "YES" for required commodity items on the PLU overwrite screen.

7.6 PLU INITIAL DATA SETTING

PLU initial values can be set when registering the commodity items.

1. Touch [PLU INITIAL DATA] on the setup menu screen.

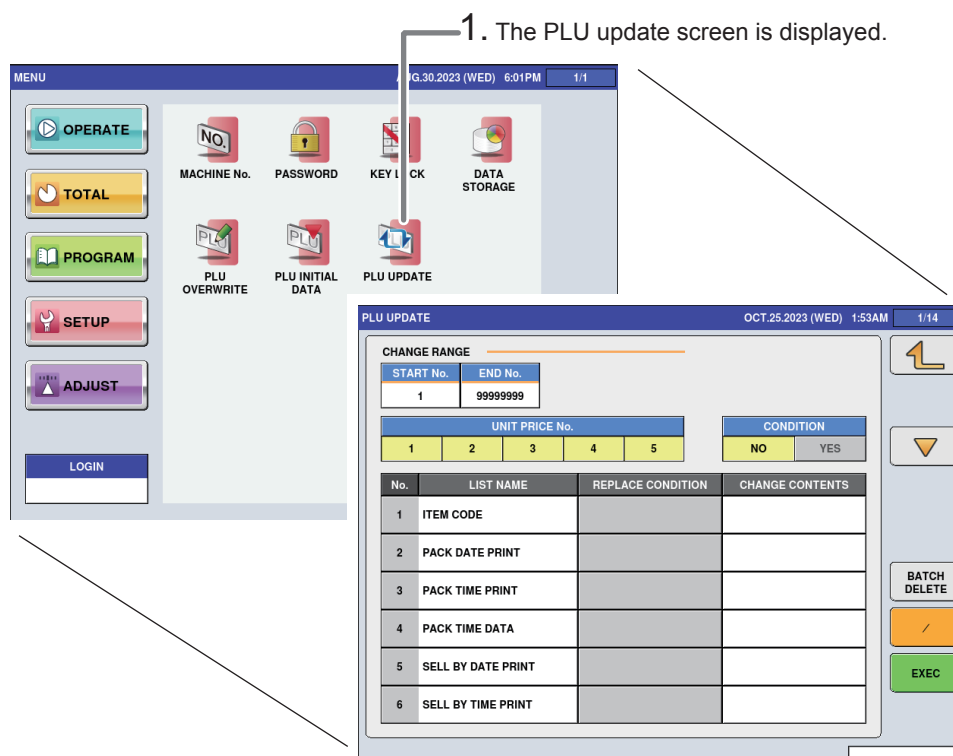

The PLU initial data (SALE1) screen is displayed.

2. Set the initial value of the PLU on this screen.

7.7 PLU UPDATE SETTING

Commodity item data that has already been registered can be changed or updated in a batch.

If the condition is set to "YES", the replace condition can be entered, and only items that match the condition can be changed in a batch.

Furthermore, by setting a change range, changes can be made only to specific PLU.

1. Touch [PLU UPDATE] on the setup menu screen.

The PLU update screen is displayed.

2. Select the data you want to change from "LIST NAME".

3. Enter the settings you want to change.

4. Perform batch changes.

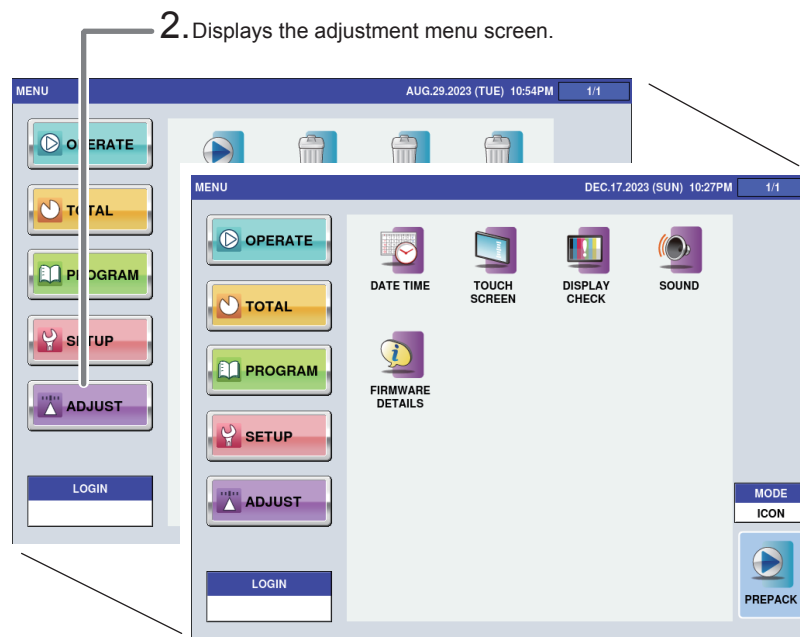

Touch [EXECUTE] to display the batch update confirmation screen.
Touch [EXECUTE] again to start the operation.

CHAPTER 8

ADJUSTMENT MODE

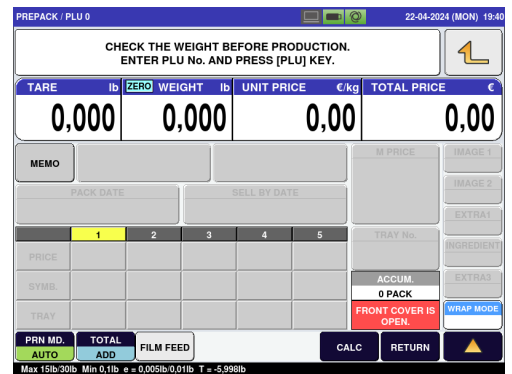

8.1 SWITCHING TO ADJUSTMENT MODE

1. Touch the Return button on the initial screen in the production mode.

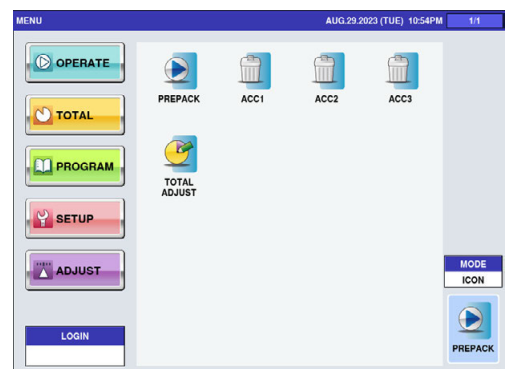

The main menu screen is displayed.

2. Touch [ADJUST] on the main menu screen.

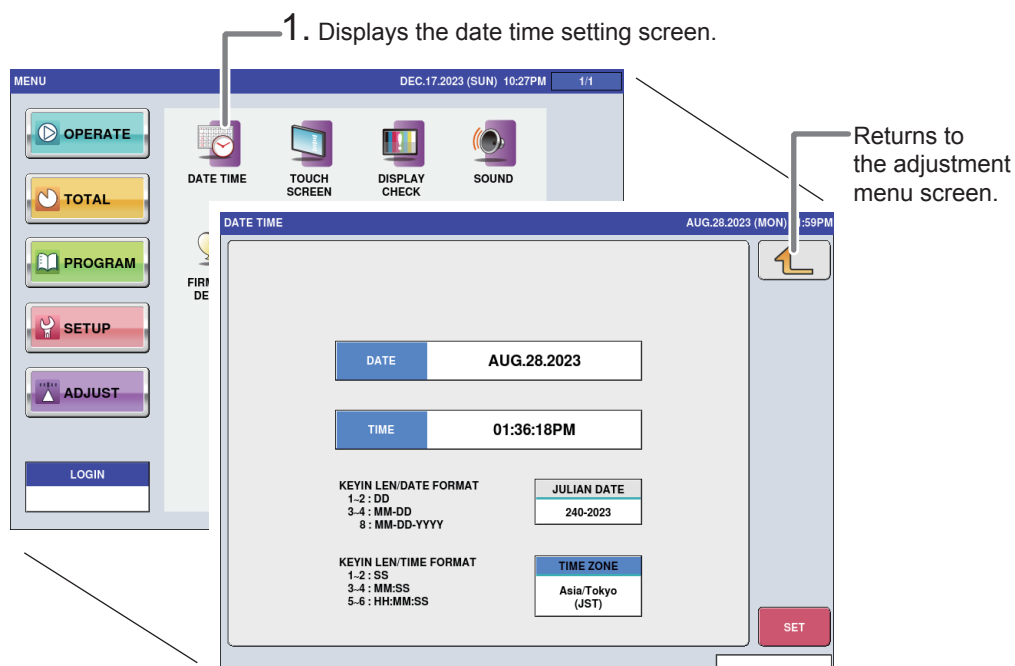

The adjustment menu screen is displayed.

8.2 DATE AND TIME ADJUSTMENT

This section describes how to adjust the date, time, and year on the machine's internal clock.

1. Touch [DATE TIME] on the adjustment menu screen.

The date time setting screen is displayed.

2. Enter the date.

Example: January 15, 2024

3. Enter the time.

[Example] 09:35:00

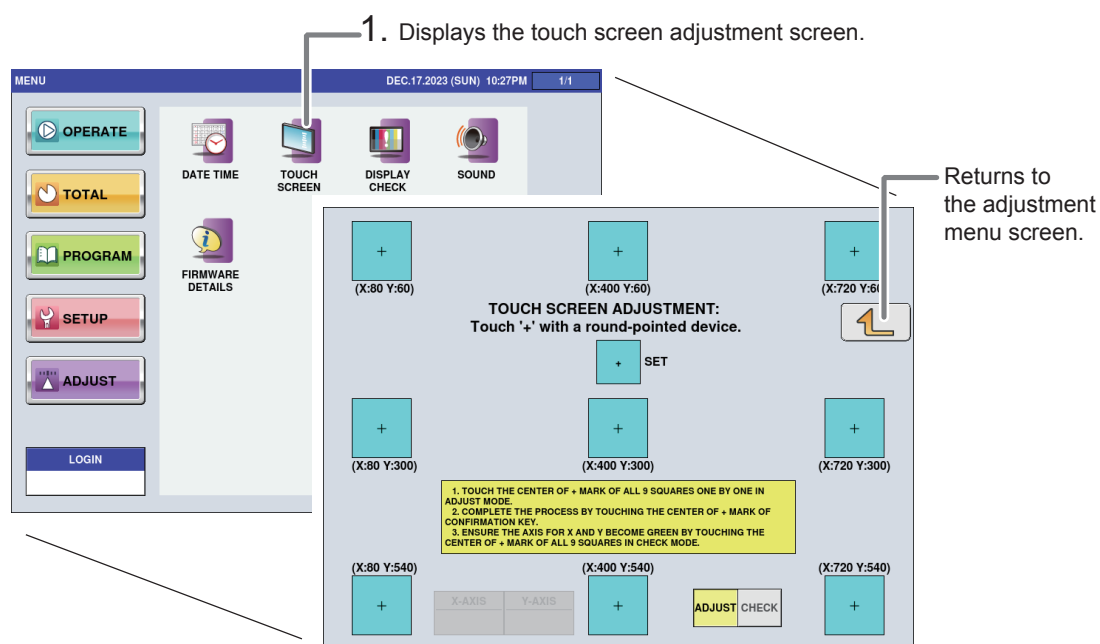

4. Touch [SET].

The data entered for each item is set.

8.3 TOUCH SCREEN ADJUSTMENT

This section describes how to adjust the touch position on the touch-panel.

1. Touch [TOUCH SCREEN] on the adjustment screen.

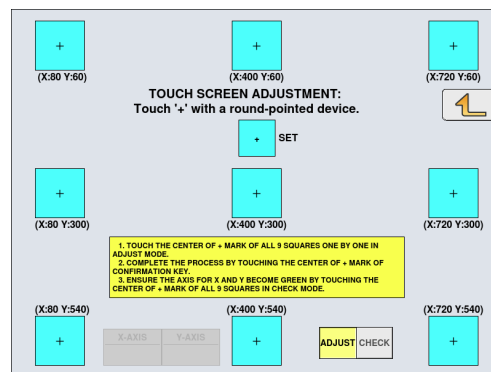

The touch screen adjustment screen is displayed.

CAUTION

To adjust the touch position on the touch-panel, touch the screen lightly. Touching the screen too hard may damage the touch-panel.

2. Touch the center of the nine [+] buttons on the screen.

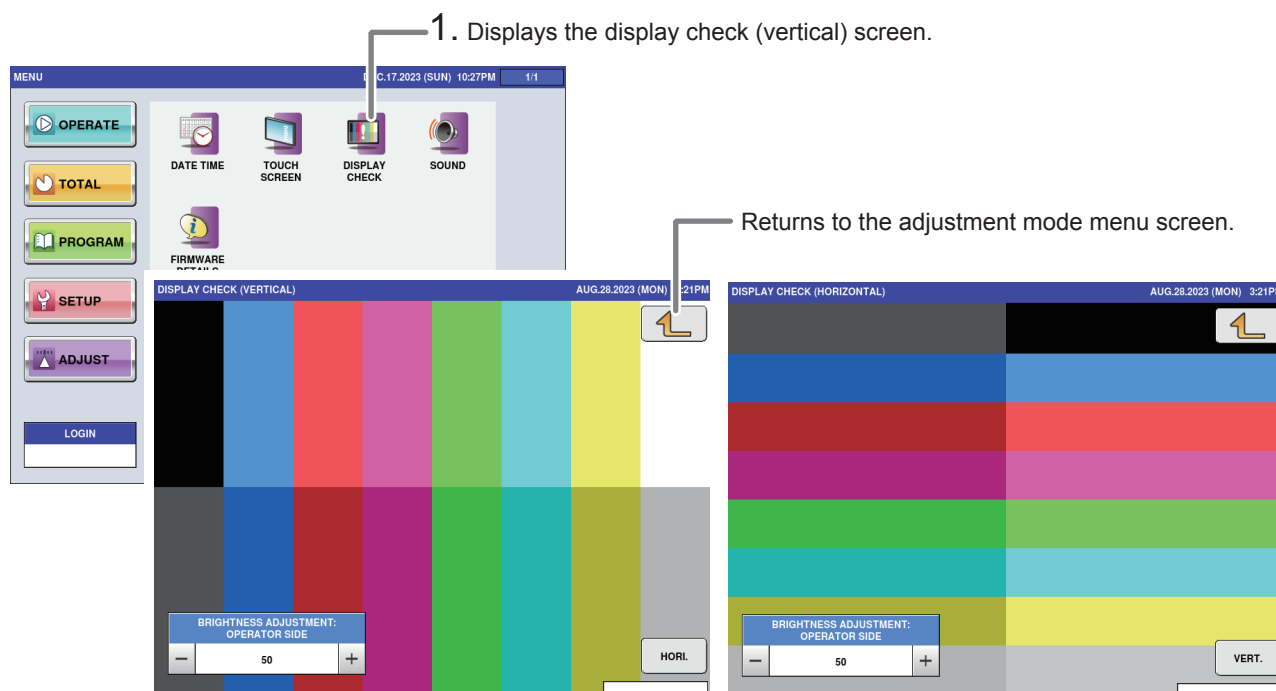

3. Touch the confirmation key [+] on the center middle of the screen.

Enter "999" and touch [PLU] to initialize the touch position.

8.4 SCREEN BRIGHTNESS ADJUSTMENT

The brightness of the touchscreen's vertical and horizontal screens can be adjusted.

1. Touch [DISPLAY CHECK] on the adjustment mode menu screen.

The display check (vertical display) screen is displayed.

2. Adjust the vertical screen brightness.

Touch [-] to darken the screen.
Touch [+] to brighten the screen.

INFORMATION

Brightness can also be adjusted by touching [Brightness Adjustment] after entering a numerical value.

3. Touch [HORIZONTAL].

The display check (horizontal) is displayed.

4. Adjust the brightness of the horizontal screen.

APPENDIX OTHERS

A-1. SPECIFICATIONS

Model		L type (With liner / Linerless)	LL type (With liner / Linerless)
Scale unit	Weighing capacity	Multi-intarval 0 - 6 kg x 0.002 kg / 6 - 15 kg x 0.005 kg	Multi-intarval 0 - 6 kg x 0.002 kg / 6 - 15 kg x 0.005 kg 0 - 15 lb x 0.005 lb / 15 - 30 lb x 0.01 lb Single-range 0 - 15 kg x 0.005 kg 0 - 30 lb x 0.01 lb
	Weighing accuracy	1/3000	
	Minimum graduation	0.04 kg (0.1 lb)
