Figure - 1. Indicator Front Panel

Indicator Operations

Power Scale

Press the power switch to turn the indicator on or off (see Figure 1).

Enter Shrink

Shrink value is applied to the gross weight and is limited to 0.00-100.00%.

Press the **Shrink %** softkey to change the shrink percentage.

Enter Head Count

1. Insert ticket into the printer. Press **FORWARD** on the printer to secure the paper.
2. Verify the scale is level. If not, a the screen displays the current pitch and roll.
3. Press **ZERO →0←** to re-zero scale if required.
4. Load animals onto scale.
5. Press the **Weigh Animals** softkey. **Enter Head Count** displays.
6. Enter the number of animals and press **enter**. Once the scale is stable, head count, total weight and average weight per head is displayed and a ticket begins to print and advance.
   - Last weighment - information of the previous group of animals on the scale
   - Current weighment - number of animals currently on the scale, their total weight and the average weight per animal
   - Totals - total of all animals weighed in the current weigh batch and their average weight
7. Unload the scale.
8. Repeat steps **4-7** until all animals from the current batch have been weighed.
9. Press the **Batch Complete** softkey to complete current batch of animals. Summary information is printed on the ticket and the ticket is released.
10. Press the **Reprint** softkey any time prior to starting the next batch to reprint the last ticket.
