pediatric scale cart

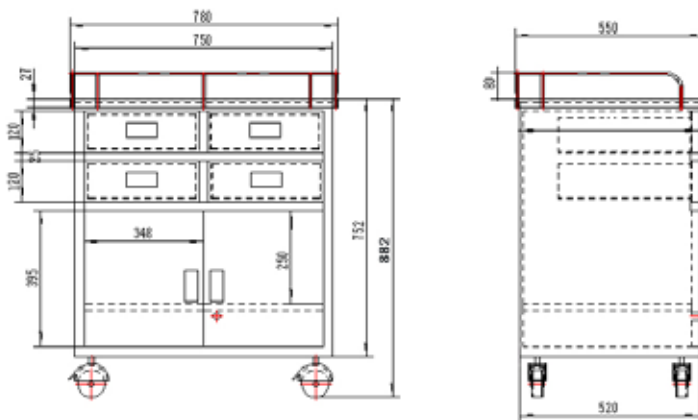

RICE LAKE'S PEDIATRIC SCALE CART IS INCREDIBLY STRONG, with a sturdy, compact design that brings weighing mobility to congested areas such as small exam rooms or hospital corridors. With a railed surface that is perfect for different sized pediatric scales, equipment will stay in place and remain level for accurate weighments.

Designed for Functionality

This commercial-grade scale cart has a powder coated, stainless steel interior and exterior, four steel drawers plus a double-doored cabinet with an adjustable steel shelf. With no middle column, the locking cabinet can be used as a larger storage space when the shelf is removed. When the drawers and cabinet doors are shut, the Pediatric Scale Cart is completely enclosed and storage spaces are flush, eliminating sharp items and corner areas.

Compact and Portable

The cart's smooth surfaces, stainless steel handle, rounded, low-profile bolt endings and flat, aluminum drawer pulls make for snag-free equipment that is easy to clean and sanitize. The four-inch wheels rotate 360 degrees for graceful steering and easy, multi-point turning when the cart needs to park in a tight space. Simple to assemble, the Pediatric Scale Cart can easily be ready for use at clinics, maternity suites and hospitals.

Pediatric Scale Cart Standard Features
