CB-2 to CB-3 Upgrade Kit

CONCRETE BATCH CONTROLLER

CB-2 to CB-3 Upgrade Kit

CB-2 users can upgrade to the CB-3 concrete batch controller with an industrial PC. Upgrading a CB-2 to a CB-3 utilizes the same field wiring and panel configuration, but enhances batching capabilities by incorporating the CB-3's industrial PC and automated batching system.

From weighing raw material to automatic ticket printing and detailed reports, your entire operation can be centrally controlled with the CB-3.

The CB-3 can also streamline operations by performing secondary actions, such as prepping the next batch or monitoring inventory, while an order is batching.

The CB-3 software is browser-based, allowing multiple users to access the CB-3 at the same time.

FEATURES

- Onboard industrial PC interface
- 128 GB memory

OPTIONS

- 256 GB memory
- Accessory kit with monitor, keyboard, USB hub and mouse

PART NUMBER

- 175877 CB-2 to CB-3 upgrade kit

Certificate of Compliance and Batch Ticket
