

Law Enforcement Approved

Load Ranger Wheel Pad Scale

Rice Lake Weighing Systems offers a portable scale option made to help law enforcement protect the roads from overload damage and unsafe conditions. Load Ranger wheel weigh pads are vehicle weighing scales ideal for mobile and temporary applications. Load Ranger gives on-the-spot verification for direct enforcement of vehicle weight limitations.

Load Ranger has NTEP Class III approval to write legal tickets based on weight in authorized locations. This saves your department time and money by not having to drive to an offsite certified truck scale.

The built-in weight indicator of each Load Ranger wheel pad is equipped with an industrial Bluetooth® with 2.4GHz wireless communication. To simplify operation, Load Ranger wheel pads can be paired with an optional digital weight indicator with color touchscreen and thermal printer in an ABS plastic transport case. The optional digital weight indicator features axle weighing software that sums axle weights to eliminate human error and prints off a totalized ticket in real time for the officer's records.

Why chose Load Ranger?

- Higher approved weight capacity and finer resolution of 22,000 x 20 lb
- Integrated ramps fitted with non-slip rubber base
- Internal rechargeable battery with 40 hours of battery life
- Ergonomic transport handle

Load Ranger Cart

For larger jobs, the Load Ranger cart can hold up to six Load Ranger wheel pads and one Load Ranger remote indicator.
