SURVIVOR[®] Advantage Series

IM-AXLE, IN-MOTION AXLE SCALE

Simplify Inventory Tracking

Keep trucks moving with an in-motion axle scale to ensure load compliance and streamline inventory tracking. The IM-Axle in-motion axle scale is a non-Legal for Trade solution for inventory tracking in a variety of industries from agriculture to forestry and everything in between.

Trucks drive over the in-motion axle scale at up to 4 mph, and axle weights are captured and totaled with 1% total error.

The IM-Axle System

The IM-Axle scale's weighbridge is 120 inches wide and 30 inches long, constructed with SURVIVOR durability for reliable performance in the most demanding conditions. The weighbridge is installed in a shallow pit with a 50-foot approach on each side and a speed sensor to help ensure weight is captured to the greatest accuracy.

The weighbridge is paired with the 1280 Enterprise™ Series indicator with software designed specifically for in-motion axle weighing. This program will record individual axle weights and automatically total the weights for individual truck IDs. Weights are then displayed on a LaserLight2 remote display for clear communication to drivers. An optional printer can be installed to print tickets.

STANDARD FEATURES

- Weigh vehicles in motion up to 4 mph
- Complete system composed of a weighbridge, 1280 Enterprise weight indicator with in-motion software, speed sensor and LaserLight2™ remote display
- Software records axle weights and gross weight per truck ID
- Concrete deck
- 11.2 in profile, pit mounted

SPECIFICATIONS

SIZE:	120 in x 30 in x 11.25 in
ESTIMATED WEIGHT:	2,850 lb (without concrete deck)
LOAD CELLS:	Flintec RC3, 22.5 t
ACCURACY:	< 1% error at 4 mph
FULL SCALE CAPACITY:	70,000 lb
WARRANTY:	2 years

Rice Lake's 1280 Enterprise Series indicator will record individual axle weights and automatically total the weights of individual trucks.
