

## Ensure Safety & OSHA Compliance with SURVIVOR® Catwalks

Designed for applications with unavoidable pedestrian traffic near a truck scale, Rice Lake's SURVIVOR catwalks are essential to maintain safety. These solid, A36 quality steel structures offer stable, OSHA-compliant solutions that can be either free-standing or attached directly to a truck scale.

While it is never recommended for drivers to exit their vehicle on a truck scale, many businesses encounter occasional driver or pedestrian traffic in the vicinity of their truck scale. Protecting truck drivers and pedestrians from accidents around vehicle scales begins with SURVIVOR catwalks.

- Constructed of A36 quality steel and finished with a high solids urethane finish over a high solids urethane primer
- 1,000 pound capacity
- 36-inch wide walking surfaces, 42-inch handrails and 9.5-inch stair depth
- Custom lengths and widths are available for both existing truck scales and new installations
